§107. Emergency Airstrip for Agricultural Purposes Program

A. Creation. There is hereby established within the Department of Agriculture and Forestry a program to designate certain roads as emergency airstrips to aid in the use of aircraft for agricultural purposes to be known as the "Emergency Airstrip for Agricultural Purposes Program."

B. Declaration of Emergency

1. The department may declare an agricultural emergency to exist which requires the use of portions of designated roads as airstrips for agricultural purposes when conditions are such that agricultural turf airstrips are rendered unavailable for safe use.

2. Each declaration of agricultural emergency shall be in writing and contain a declaration number, the date, and a list of the portions of designated roads which may be utilized as airstrips during the agricultural emergency.

3. The department shall provide a copy of the declaration to the sheriff and police jury for the parish in which each of the designated roads is located, and the aviation division of the State Department of Transportation and Development (hereinafter referred to as "DOTD") prior to utilization of the emergency airstrip. If the designated road is a state road, a copy of the declaration should also be provided to the communications center at State Police Headquarters and to the secretary of DOTD. If a designated road is located on the parish line, a copy of the declaration must be provided to the sheriff and police jury for both parishes.

4. The appropriate law enforcement entity as set forth in Paragraph B.3 above shall be responsible for implementing security and safety requirements for road traffic during periods when a road designated for use as an emergency airstrip to aid in the use of aircraft for agricultural purposes is actually utilized for that purpose. At a minimum, the appropriate law enforcement entity shall have at least one officer at the site and signs shall be placed at each end and at all approach ramps of a designated road to notify persons that the road is designated for use as an emergency airstrip to aid in the use of aircraft for agricultural purposes. The officer will insure that whenever aircraft are in the process of landing, taking off, or taxiing, there shall be no movement of vehicles on the emergency airstrip or within 500 feet of each landing threshold of the emergency airstrip. The enforcement entity providing said officer shall have the option of cost recovery for services from the party requesting use of the emergency airstrip.

C. Designation of Roads

1. Upon declaration by the department that an agricultural emergency exists, certain roads, including but not limited to dead-end roads and strategically placed parish roads, may be designated by the department for use as airstrips to aid in the use of aircraft for agricultural purposes.

2. Whenever possible, the department shall pre-designate a portion of a road for use as an emergency agricultural airstrip for use in the event a declaration of an agricultural emergency is made by the department. The request for pre-designation must be made by mail or facsimile to the department and include the following information:

- a. location of the road marked on a topography map;
- b. reason for designation; and
- c. a statement that the road meets all the criteria set forth in Paragraph C.3 or a statement setting forth the reasons why a waiver under Paragraph C.4 should be issued.

3. Predesignated emergency agricultural airstrips shall be inspected and registered by DOTD Aviation using similar criteria as utilized by DOTD in the registration of an agricultural use permanent airstrip. The registration certificate shall be issued to and held by the department. The registered and designated airstrip shall be marked and signed as such. Persons seeking predesignation must contact the aviation division of DOTD for specifications regarding the appropriate marking and signage required for the registered and designated emergency airstrip.

4. The department may authorize use of airstrips which have not been pre-designated and registered with the aviation division of DOTD, on a case-by-case basis, when safety and aircraft performance would not be compromised by such waiver and the use of said road as an emergency agricultural airstrip is deemed necessary by the department. Any such airstrip authorized shall, at a minimum, meet all of the following:

- a. the surface must be flat and straight for a minimum distance to 2,000 feet;
- b. the width shall be a minimum of 20 feet for the full length of the landing area. Sufficient wing tip clearance shall be provided as required for the aircraft utilizing the emergency agricultural airstrip;
- c. there shall be no potholes or depressions greater than 3 inches in depth over the entire landing surface;
- d. there shall be no vertical obstructions such as utility poles, trees, buildings, road signs, mail boxes, etc., on more than one longitudinal side of the landing surface;
- e. there shall be no overhead obstructions such as utility lines, overpasses, bridges, etc., for the full length of the landing area and within 500 feet of each landing area threshold;
- f. each landing area threshold shall be marked in such a way as to be readily identified from an aircraft in flight (e.g., white or orange cones, buckets, or painted tires); and
- g. threshold markers shall be placed on either side of the landing area at the thresholds and shall be no taller than 24 inches.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:18.

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of the Commissioner, LR 23:703 (June 1997).

1. a clear, concise written statement of applicable facts and supporting evidence, including the statutes, rules, or regulations at issue; and

2. the name, address, telephone number, and email address of the applicant and each person that may be called to testify as a witness.

B. Unless otherwise provided by statute or rule, all petitions for declaratory order or ruling shall be addressed to the commissioner of agriculture and forestry and shall be mailed or delivered to: Legal Division, 5825 Florida Blvd, Suite 2000, Baton Rouge, LA 70806.

C. If the petition seeks declaratory relief over which the commissioner has authority:

1. the petition shall be considered by the commissioner within a reasonable time; and

2. the commissioner will issue a written declaratory order, which shall be a final order.

D. If the petition seeks declaratory relief over which a public body created within the department has authority, the petition shall be considered as follows:

1. the petition shall be considered by the appropriate public body at its next regularly scheduled meeting;

2. the petitioner shall be provided adequate notice of the meeting; and

3. the public body shall issue a written, final declaratory order within a reasonable time.

E. Written declaratory orders shall be sent to the petitioner either by certified mail, hand delivery, or commercial courier.

F. A declaratory order shall have the same status as a final agency decision or an order in an adjudicated case. Declaratory orders may be appealed to district court in accordance with R.S. 49:968.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:3; R.S. 49:968; and R.S. 49:977.4.

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of the Commissioner; LR 51:783 (June 2025).

Chapter 2. Rebates of Registration Fees

§201. Findings

A. The commissioner of Agriculture and Forestry has the duty and authority to promote, protect, and advance Louisiana agriculture and to promote the building of Louisiana using Louisiana products. The constitution and laws of Louisiana grant the commissioner this authority both generally and particularly. Among the particular subject matters entrusted to the commissioner for the foregoing objectives is the regulation of pesticides. The preservation of a safe supply of pesticides and of the local capacity to manufacture pesticides is essential to maintain agricultural production year after year while some pestilences subside as new ones arise. Although registering labels of pesticides serves the above stated objectives, the pesticide registration fees the Department of Agriculture and Forestry charges for such registration may in some cases impose a burden that impairs the above stated objectives. The commissioner finds that in order to promote and protect Louisiana agriculture and Louisiana products it is appropriate and expedient to permit pesticide manufacturers to apply for a rebate of the pesticide registration fee and to receive such rebate under those circumstances provided for in this Chapter.

AUTHORITY NOTE: Promulgated in accordance with La. Const. Art. 4 §10; and R.S. 3:2(A), 3(B), 14(B), 1652, 1732, and 3203 (A).

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of the Commissioner, LR 24:626 (April 1998).

§203. Application

A. A pesticide manufacturer having paid the pesticide registration fee required by R.S. 3:3221(A) may make written application to the Department of Agriculture and Forestry on a form provided by said department for a rebate of not more than 50 percent of each pesticide registration fee paid by the pesticide manufacturer. This application must be submitted:

1. at the time of registration; or
2. at any time on or before December 31 of the year of registration; or
3. prior to July 1, 1998 where the application is for a rebate of a pesticide registration fee paid in 1997.

AGRICULTURE AND ANIMALS

Part III. Agricultural Finance

Chapter 1. General Provisions

§101. Definitions

A. The words and terms defined in R.S. 3:263 are applicable to this Part.

B. The following words and terms are defined for the purposes of this Part and are applicable to this Part.

Act—the Louisiana Agricultural Finance Act found in Chapter 3-B of Title 3 of the Louisiana Revised Statutes of 1950, (R.S. 3:261 et seq.).

Agricultural—the adjective form of *agriculture* as defined in R.S. 3:263(6).

Farm—the total of all areas of land, water, or both in Louisiana, used by an agricultural producer to produce or harvest one or more agricultural products, regardless of whether the area or areas are located in more than one parish.

Lafa—the Louisiana Agricultural Finance Authority.

C. The following words and terms are defined for the purposes of the Louisiana Direct Placement Agricultural Revenue Bond Program (§§105-141) only.

Bond or *Bonds*—Lafa Direct Placement Agricultural Revenue Bonds which are exempt from federal taxation. Such bonds are issued from time to time throughout the year, and each issue will be identified by a letter designation, e.g., Series 1984-A, Series 1984-B, etc. The letter designation merely identifies the date of issue of each series of bonds. The proceeds of such bonds are used to purchase loans and pay the costs of issuance of the bonds.

Bond Resolution—the resolution adopted by Lafa to authorize the issuance of a bond to be sold to a lender.

Borrower—an individual, partnership, firm, corporation, company, cooperative, association, society, trust or any other business unit or entity, including any state or federal agency, which uses proceeds of a loan for any project which meets the requirements of these regulations.

Borrower's Certificate—the certified statement which each borrower must execute, prior to submission of the offer, setting forth the borrower's eligibility to participate in the program.

Closing—the date on which a loan is originated by a lender, which shall be mutually agreed upon between lender and borrower and sold to Lafa.

Code—the Federal Internal Revenue Code of 1954 as amended. In these regulations, the term Code may have specific reference to section 103(b)(6) of the Internal

Revenue Code and/or to regulations enacted by the Internal Revenue Service pursuant thereunder.

Default or *In Default*—with respect to any loan, any payment of principal or interest which is more than 30 days in arrears.

Farm—includes stock, dairy, poultry, fruit, fur-bearing animal and truck farms; plantations; ranches; nurseries; ranges; greenhouses or similar structures used primarily for the raising of agricultural or horticultural commodities; and orchards.

Fee or *Fees*—any and all of the following:

a. *Application Fee*—a set fee based on the total value of the loan which is paid by the borrower and transmitted by the lender to Lafa for Lafa processing of the application for a loan.

b. *Commitment Fee*—a percentage of the total value of the loan which is paid by the borrower to the lender prior to submission of the offer to cover the costs of issuing the bond to support the loan granted to the borrower. This fee is refundable to the borrower under the conditions set forth in §121.B hereof.

c. *Cost of Issue Fee*—a percentage of the total value of the loan which is paid by the borrower to cover the costs of issuing the bond to support the loan granted to the borrower. The fee is paid in the form of a discount from the original principal amount of the loan when purchased by a Lafa from lender.

d. *Origination Fee*—a percentage of the total value of the loan which is paid by the borrower to the lender to cover the costs of processing, originating, and disbursing the proceeds of the loan granted to the borrower.

e. *Program Participation Fee*—a percentage of the remaining principal balance of the loan granted to borrower which is paid by the borrower to the lender on the due date of the annual payment directed by trustee. The lender transmits to the trustee along with the loan payment, and the proceeds thereof are used to cover the administrative costs of trustee and Lafa.

First-Time Farmer—an individual who has never had any direct or indirect ownership interest in substantial farmland in the operation of which such individual materially participated. Ownership or participation by a spouse or child is treated as ownership or participation by the individual. Substantial farmland means any parcel of land unless:

a. such parcel is smaller than 15 percent of the median farm size in the parish in which such parcel is located; and

b. the fair market value of the land does not at any time while held by the individual exceed \$125,000.

Intent Resolution—the resolution adopted by LAFA stating its intent to accept the offer and to issue a bond, the proceeds of which will be used to purchase an agricultural loan originated by the lender and accepting the offer.

Interest Rate—one of the following when applied to a loan:

a. *Fixed Interest Rate*—a rate of interest which does not change throughout the term of the loan.

b. *Variable Interest Rate*—a rate of interest which may change from time to time at stated intervals throughout the term of the loan.

c. *Prime Interest Rate*—the base rate on corporate loans at large U.S. money center commercial banks as published in The Wall Street Journal as the prime rate. When the prime rate is published in The Wall Street Journal as a range in the form of a low and high rate, then in that event, LAFA may designate a rate within the published range which shall be the prime interest rate. When LAFA does not designate a rate within the published range the prime interest rate shall be the high of the range.

IRS—the Internal Revenue Service of the United States.

LAFA—the Louisiana Agricultural Finance Authority, an agency of state government under the jurisdiction of the Department of Agriculture and Forestry, and any of its duly authorized agents; the term also means the issuer of Direct Placement Agricultural Revenue Bonds.

Lender—any of the following, when participating in the program: a bank, bank or trust company, federal land bank, production credit association, bank for cooperatives, building and loan association, homestead, insurance company, investing banker, mortgage banker or company, pension or retirement fund, savings bank or savings and loan association, small business investment company, credit union, any other financial institution authorized to do business in Louisiana or operating under the supervision of any federal agency or any Edge Act Corporation or agreement, or a corporation organized or operating pursuant to Section 25 of the Federal Reserve Act.

Loan or *Loans*—an interest-bearing agricultural loan, described by an offer, originated by a lender participating in the LAFA Program to an eligible borrower, and evidenced by a loan note.

Loan File—the loan documents pertaining to a particular loan, which consist of the following, all in the form provided by LAFA:

- a. loan purchase agreement;
- b. loan submission voucher;
- c. opinion of lender's counsel;

d. officer's closing certificate;

e. loan note;

f. mortgage or any other evidence of security securing the borrower's obligations under the loan note;

g. certificate of economic life; and

h. assignment of loan note.

Loan Note—a promissory note or other evidence of indebtedness executed by a borrower to evidence the borrower's obligation to repay the loan.

Loan Purchase Agreement—an agreement between LAFA and a lender under which, among other required provisions, LAFA agrees to purchase a loan after it is originated by the lender and the lender agrees to repurchase the loan in the event of default by the borrower.

Loan Submission Voucher—a document provided by LAFA and submitted by the lender to the trustee requesting the purchase of the loan by LAFA at a price equal to a specified percentage of the principal amount of the loan and which also contains substantially the same terms and conditions set forth in the loan terms schedule contained in the offer.

Loan Terms Schedule—a loan description form, to be attached to the offer, which describes the terms and conditions of the proposed loan and the project to be financed with loan proceeds.

Offer—the written document entitled Offer to Originate and Sell Agricultural Loans executed by a lender setting forth the terms and conditions whereby the lender agrees to originate and sell a loan to LAFA and to purchase a bond in the same principal amount as the loan.

Origination Period—a six-month period beginning with the date of issuance of a bond by LAFA.

Principal User—a person or company who uses more than 10 percent of a project, measured by the value paid by such user for the project. All capital expenditures for the project, must be taken into account to determine which are principal users of the project. For example, A, B, and C own Farm X in Parish X, each owning individually and not as a partner, respectively, 55 percent, 40 percent, and 5 percent by value, of the farm. A and B are principal users of Farm X (i.e., each owns more than 10 percent, by value), but C is not a principal user of Farm X because C only owns 5 percent by value. If A or B seek to acquire another Farm Y in Parish X, to be financed by a bond, the capital expenditures of A or B on Farm X will be deducted from the maximum principal amount of the bond (either \$1,000,000 or \$10,000,000; see §111). Since C is not a principal user of Farm X, if he acquired Farm Y with bond financing, he would not be required to deduct his capital expenditures on Farm X from the loan proceeds for the purchase of Farm Y.

Program—the Direct Placement Agricultural Revenue Bond Program administered by LAFA.

Project—the property to be financed with loan proceeds, pursuant to the terms and conditions contained in the offer and in the loan purchase agreement.

Rehabilitation Expenditures—any costs associated with renovation or modernization of an existing building or the equipment located within an existing building which can be properly charged to a capital account; the term does not include expenditures for enlargement of an existing building.

Related Person—

a. the following are related persons if borrower is an individual:

- i. borrower's spouse or a spouse's ancestors or lineal descendants;
- ii. borrower's siblings (i.e., brothers and sisters);
- iii. borrower's ancestors and/or lineal descendants;
- iv. a corporation in which more than 50 percent in value of the outstanding stock is owned, directly or indirectly, by or for borrower;
- v. a trust of which borrower is the grantor or the beneficiary; and

vi. a partnership of which borrower owns, directly or indirectly, more than 50 percent of the capital or profits interest;

b. the following are related persons if borrower is a corporation:

- i. an individual who owns, directly or indirectly, more than 50 percent in value of the outstanding stock of the corporation;
- ii. a trust which owns, directly or indirectly, more than 50 percent in value of the outstanding stock of the corporation;
- iii. a corporation that is a member of the same parent-subsidiary controlled group, a brother-sister controlled group, or a combined group of corporations;
- iv. a partnership which owns, directly or indirectly, more than 50 percent of the outstanding stock of the corporation; and
- v. for purposes of these regulations, stock owned, directly or indirectly, by or for a corporation, partnership, estate or trust is considered to be owned proportionately by or for its shareholders, partners or beneficiaries. In addition, an individual is considered to be the owner of stock owned, directly or indirectly, by or for his family;

c. the following are related persons if borrower is a partnership:

- i. a partner who owns, directly or indirectly, more than 50 percent of the capital or profits interest of the partnership;
- ii. another partnership in which the same persons own, directly or indirectly, more than 50 percent of the capital or profits interest;

iii. if an individual owns stock in a corporation, other than constructively through his family, he is considered as owning the stock owned, directly or indirectly, by or for his partner; and

iv. a partner is considered as the owner of partnership interests:

(a). owned by a corporation, partnership, estate or trust, proportionately, if he is a shareholder, partner, or beneficiary; and

(b). owned by his brothers, sisters, spouse, ancestors or lineal descendants;

d. the following are related persons if borrower is a trust:

- i. its grantor;
- ii. another trust, if the same person is the grantor of both trusts;
- iii. a beneficiary of the trust;
- iv. a beneficiary of another trust, if the same person is the grantor of both trusts; and
- v. a corporation of which more than 50 percent in value of the outstanding stock is owned, directly or indirectly, by or for the trust or by or for a grantor of the trust.

TEFRA—the Tax Equity and Fiscal Responsibility Act of 1982 (federal).

Trustee—Capital Bank and Trust Company of Baton Rouge, Louisiana.

D. The following words and terms are defined for the purposes of the 2016 Louisiana Farm Recovery Grant Program.

Expected Gross Crop Revenue (for 2016)—the level of revenue that would have been expected to have been generated in 2016 under normal weather conditions and is calculated using the applicant's response to the number of acres harvested in 2016, a 5-year parish average for crop yields and the estimated average market price in 2016.

Gross Crop Revenue (for 2016)—calculated by multiplying total acres harvested times the total average yield times an estimated average selling price. The estimated average selling price is calculated by dividing the applicant's share of crop revenue by the amount of the crop marketed by the applicant.

Increases in either Harvest or Production Costs—the costs of having to replant crops that were ruined due to high levels of rainfall and flooding; costs associated with harvesting crops under excessively wet field conditions causing reduced harvest speeds and efficiency; and costs associated with increased tillage and land preparation due to damage caused to land resulting from either having to harvest under excessively wet conditions or resulting from the impact of pounding rainfall and flooding.

Loss of Stored Hay—calculated by using the number of bales destroyed and then converting them into tons of hay assuming an average bale weight of 1,200 pounds. A market value for hay lost due to flooding is then calculated using the average 2016 market price as defined by the 2016 *Louisiana Summary* publication.

Lost or Dead Cattle—cattle that were lost or killed and calculated on a value per head by for the two classes of cattle using average 2016 market prices obtained from the 2016 *Louisiana Summary* publication and assuming an average weight for calves of 500 pounds and breeding animals of 1,200 pounds.

Net Estimated Losses—the amount of losses eligible for assistance under the 2016 Louisiana Farm Recovery Grant Program calculated by the difference between the total estimated losses and any assistance received by the applicant from other sources.

Producer—one who engages, as an occupation, in farming operations as a distinct activity for the purpose of producing a farm crop and assumes the production and market risks associated with the agricultural production of those crops. A corporation or farmer's cooperative may be a "producer" if engaged in actual farming of the nature and extent there indicated.

Reductions in Grazing Availability—the economic loss associated with pastures that were flooded making grazing unavailable to cattle which is calculated using a hay equivalent methodology. The methodology assumes the economic loss is equal to the value of the amount of hay that would be needed to compensate for the lost grazing. The methodology assumes that each mature cow weighs 1,200 pounds and eats 2 percent of her body weight per day. With this information, the total amount of hay needed for the number of days grazing was unavailable is calculated. The value of that hay is then estimated using the average 2016 market price for hay as defined by the 2016 *Louisiana Summary* publication.

Total Estimated Losses (suffered by the farming operation)—a summation of the estimated economic losses associated with each crop produced and any cattle related losses.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:266.

F. There shall be no voting by proxy.

G. The chairman shall designate a hearing officer, who may or may not be a LAFA member, to preside at all adjudicatory proceedings. HISTORICAL NOTE: Promulgated by the Department of Agriculture, Agricultural Finance Authority, LR 10:867 (November 1984), amended LR 36:466 (March 2010).

§105. Program Authorization; Applicability of Federal Law

A. State Statutes. The Louisiana Direct Placement Agricultural Revenue Bond Program is authorized by Louisiana Revised Statutes of 1950, Title 3, Chapter 3-B, Sections 261-283. These statutes permit funding by Agricultural Revenue Bonds of a wide range of agricultural loans.

B. Federal Statutes. However, Federal income tax law contains provisions which restrict the type of projects which may be financed through the Louisiana program. In order for LAFA's bonds to qualify as tax-exempt bonds under the code, each bond and each loan is subject to the restrictions contained in the code, particularly the provisions of Section 103(b)(6) and regulations promulgated by IRS pursuant thereto.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:262, R.S. 3:266, R.S. 3:270 and Section 103(b)(6) of the Internal Revenue Code of 1954, as amended.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Agricultural Finance Authority, LR 10:868 (November 1984).

§107. Projects Eligible for Loans Funded with LAFA Bond Proceeds

A. Loan proceeds may be used for acquisition, construction, reconstruction, equipping or installation of any property which, under the code, is eligible for a depreciation allowance or chargeable, for federal income tax purposes, to a capital account (or that would be chargeable to a capital account either with a proper election by the borrower or but for a proper election by the borrower), including but not limited to the following.

1. Improvements to real estate such as land clearing, fencing, land forming, land leveling, terracing, wells and

water impoundment, subject to an approving opinion of nationally recognized bond counsel.

2. Acquisition of depreciable personal property used in:

a. a farmer's or rancher's trade or business, including but not limited to:

i. new equipment, such as tractors, combines, plows, rakes, cultivators and related equipment; trucks and pickups;

ii. irrigation systems, including center pivot operations and equipment for ditch operations;

iii. buildings used to shelter livestock, store equipment, store and preserve grain, such as cribs, bins; and equipment used to dry grain, such as grain dryers and seed cleaners; and

iv. breeding stock, such as bulls, heifers, dairy cows, boars and sows;

b. an individual's or company's agribusiness, including but not limited to cotton gins, grain elevators, sugar mills and equipment contained therein; meat or crawfish processing plants; and related equipment.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:266, R.S. 3:270 and Section 103(b)(6) of the Internal Revenue Code of 1954, as amended.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Agricultural Finance Authority, LR 10:868 (November 1984).

§109. Projects Ineligible for Loans Funded with LAFA Bond Proceeds; Exceptions

A. LAFA bonds may not be used for the following purposes, except as provided under this rule:

1. land acquisition, except that:

a. 25 percent of a loan may be used to acquire non-farm land; and

b. first-time farmers may utilize a maximum of \$250,000 in loan proceeds to purchase land to be used for farming; if

i. the borrower meets the definition of *first-time farmers* contained in §101;

ii. the borrower will be the *principal user* (as defined in §101) of the land; and

iii. the borrower will materially and substantially participate in the operation of the farm of which the land is a part;

2. acquisition of existing agribusiness facilities (used buildings or equipment), except that, the restriction against use of loan proceeds to purchase existing facilities does not apply to any building, and the equipment therein if at least 15 percent of the cost of acquiring the building and equipment are used for rehabilitation expenditures;

3. working capital;

4. production expenses;

5. refinancing of existing indebtedness;

6. financing of residential housing;

7. purchase of any property from any *related person* (as defined in §101 of these regulations); or

8. purchase of property from a partner of the borrower, when the borrower is a partnership, regardless of the degree of the partner's interest in the borrower.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:266, R.S. 3:270 and Section 103(b)(6) of the Internal Revenue Code of 1954, as amended.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Agricultural Finance Authority, LR 10:868 (November 1984).

§111. Maximum Amount of Agricultural Loans for Capital Expenditures

A. Section 103(b)(6) of the code restricts use of tax-exempt bonds to small issues, which thereby limits the principal amount of the corresponding loans. To determine whether a bond is eligible under the established limits, the code requires that certain sums be added to the principal amount of the bond. Therefore, the following amounts must be subtracted from the established limit to determine the maximum principal amount of bonds and corresponding loans:

1. \$1,000,000 Limit. If:

a. the facilities to be financed with proceeds of LAFA bonds are located in the same incorporated municipality or in unincorporated areas of the same parish (i.e., the same political subdivision); and

b. the *principal user* as defined in §101 of the property financed by a prior bond issue was the borrower or a related person, the sum of the following may not exceed \$1,000,000 (but see also §111.A.2):

i. the face amount of the bond to be issued; plus

ii. the remaining principal balance(s) of any loan(s) granted to the borrower or a related person of the borrower with proceeds of earlier bond issues (regardless of the issuer) which were exempt from taxation under Section 103(b)(6) of the code.

2. \$10,000,000 Limit. If LAFA files the proper election with IRS, the maximum amount of LAFA bonds and corresponding loans may be increased to \$10,000,000. In such event, the same qualifying factors (i.e., location of the property to be financed and identity of the principal user of bond proceeds) will apply, and the sum of the following may not exceed \$10,000,000:

a. the face amount of the bond to be issued; plus

b. the remaining principal balance(s) of any loan(s) granted to the borrower or a related person of the borrower with proceeds of earlier bond issues (regardless of the issuer) which were exempt from taxation under Section 103(b)(6) of the code; plus

c. all capital expenditures on the property to be financed with bond proceeds which were paid or incurred during the six-year period beginning three years before and ending three years after the date of issuance of the bond, as follows:

i. capital expenditures which were financed other than out of the proceeds of a tax-exempt bond; and

ii. capital expenditures which are properly chargeable to the capital account of any person or state or local government unit (whether or not such person is the principal user or a related person), in which event capital expenditures are determined without regard to any rule of the code which permits expenditures properly chargeable to capital accounts to be treated as current expenses; plus

d. all other capital expenditures of any principal user in the political subdivision for which the bonds were issued.

3. The requirements of the code, as effective on the date of issuance of the bond and/or origination of the loan, shall determine the procedures to be followed with respect to all loans exceeding \$1,000,000 in principal amount. If the requirements of the code are different from the requirements stated in this rule, the requirements of the code shall supersede this rule.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:266, R.S. 3:270 and Section 103(b)(6) of the Internal Revenue Code of 1954, as amended.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Agricultural Finance Authority, LR 10:868 (November 1984).

§113. Minimum Amount of Bonds/Agricultural Loans

A. The minimum amount of loans originated by any one lender shall be \$10,000.

B. The minimum amount of a loan shall be \$10,000.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:266, R.S. 3:270 and Section 103(b)(6) of the Internal Revenue Code of 1954, as amended.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Agricultural Finance Authority, LR 10:869 (November 1984).

§115. Lenders

A. Eligibility Requirements

1. The lender must be an entity listed in §101 and must be experienced in originating and servicing agricultural loans.

2. The lender must be qualified and in good standing under all state and federal laws applicable to lenders.

3. Within the past three years, the lender cannot have been listed on the federal comptroller's Supervised or Watch List, or any substantially similar listing of any state or federal regulatory agency responsible for regulating banks and financial institutions.

4. Each lender must be approved by LAFA prior to participating in the program; LAFA retains the right to reject

any lender, even though that lender meets the minimum requirements established by these regulations, or to accept a lender which does not meet these minimum requirements.

B. The lender must collect all payments required under the terms and conditions of a loan note and pay such amounts to the trustee. All such payments must be accompanied by a certification of the lending officer, in a form acceptable to trustee, stating that the computation of interest on the loan is in accordance with terms as approved by LAFA, and affirming correctness of the amount being submitted.

C. The lender must notify the trustee in no more than five days after any default in any loan and upon LAFA's request, declare all payments on such loan to be due and owing and take such action as may be required by LAFA to obtain the amounts owed thereunder, which amounts shall be paid to the trustee.

D. Whenever any loan is in default (see §101), the lender shall, on or before the twenty-fifth day of each month (or, if such day is not a business day, the next business day thereafter), submit a report to the trustee, containing, as of the twentieth day of the month (or, if such day is not a business day, the next business day after the twentieth of the month), the following information:

1. the principal balance due under the loan note;

2. a statement of the procedures undertaken by the lender to collect such amount and the result of such procedures; and

3. a statement as to the overall status of the loan. This report is not due in any month when there are no delinquencies or defaults in any loan serviced by the lender.

E. Each lender must administer and service loans originated by the lender and must maintain the loan file for each loan for three years following the date when the loan is fully paid or otherwise terminated.

§117. Borrowers

A. Each borrower must be eligible to receive a loan with proceeds of LAFA bonds. See in particular definitions of principal user and related person contained in §101 hereof in order to make a determination as to each borrower's eligibility.

B. Each borrower must be approved by the lender to whom the borrower makes application for a loan; lenders shall apply the same criteria for approval of borrowers applying for loans to be funded with proceeds of LAFA bonds as they apply to borrowers in the lenders' conventional agricultural loan program.

C. The borrower must expend the proceeds of loan solely to finance the project described in the offer and the loan terms schedule and not for any other purpose.

D. The borrower or a related person of the borrower must be the *principal user* (as defined in §101 hereof) of the project.

E. A borrower will not be eligible for a loan if prior to LAFA's written acceptance of the offer and adoption of an intent resolution, the borrower or any related person of the borrower has taken any of the following actions:

1. commenced acquisition or construction to be financed with loan proceeds;
2. entered into any building agreement or purchase agreement covering the facilities to be constructed with loan proceeds;
3. commenced the installation or acquisition of any property to be acquired with loan proceeds;
4. commenced any on-site work in connection with construction of the project to be financed with loan proceeds; or
5. commenced any off-site fabrication or acquisition of any portion of the project to be financed with loan proceeds.

F. Each borrower must execute a borrower's certificate, in the form required by LAFA, setting forth the borrower's compliance with the requirements of Section 103(b)(6) of the code. When the original principal amount of a loan exceeds \$1,000,000, the principal amount of the bond must be aggregated with certain capital expenditures of the borrower in accordance with regulations applicable under Section 103(b)(6) of the code to determine the total loan proceeds for which the borrower is eligible. In such circumstances, the borrower must execute, in addition to the borrower's certificate required in the first sentence of this rule, an additional borrower's certificate setting forth the assurances required under the code.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:266, R.S. 3:270 and Section 103(b)(6) of the Internal Revenue Code of 1954, as amended.

§119. Required Terms and Conditions for Loans Funded with Proceeds of LAFA Bonds

A. The terms and conditions of each loan, except as required under this rule, shall be determined by the lender and the borrower, but are subject to LAFA approval prior to acceptance of the offer.

B. Each loan must be secured by a promissory note (the loan note) in the full principal amount of the loan and such other security as may be required by the lender.

C. The maximum loan term shall be the lesser of 30 years or 100 percent of the average reasonably expected economic life of personal property to be financed with the

proceeds of the LAFA bond, using IRS Asset Depreciation Guidelines provided by LAFA in the loan terms schedule. The minimum average life of the bonds shall not be less than five years.

D. The agreement between lender and borrower must require payments sufficient to meet the debt service requirements of the bond (i.e., in principal and interest). The loan repayment schedule (amount and due date of each payment) must be approved by LAFA prior to acceptance of the offer.

E. The lender and the borrower will determine the rate of interest to be charged on the agricultural loan subject to §119.F, but such rate of interest must be approved by LAFA prior to acceptance of the offer. The interest rate agreed on by the lender and the borrower must be stated in the offer.

F. Interest rates on loans may be either fixed or variable.

1. A variable interest rate may not exceed 85 percent of the prime *interest rate*, as defined in §101:

- a. on the date of disbursement of loan proceeds; or
- b. on any subsequent date when the interest rate for the loan is established for a subsequent period.

2. Loans with fixed interest rates are subject to LAFA review and approval on a case-by-case basis and must comply with the goals of the program.

3. If a borrower defaults on a loan and the loan is repurchased by the lender, the interest rate for the loan may be increased in accordance with the terms and provisions of the loan note executed at origination of the loan.

4. The lender may impose interest on payments which are not timely made by the borrower, but only if the loan note provides therefor and only in accordance with provisions relative to late payments expressed in the loan note.

G. All loans must be prepayable in whole, without a prepayment penalty.

H. Loans may be assumed by a third party, with the prior approval of the lender, if:

1. in the opinion of nationally recognized bond counsel or special tax counsel, such assumption does not adversely affect the tax-exempt status of the LAFA bond; and
2. the third party assuming the loan meets the qualifications of a borrower as set forth in these regulations.

§121. Fees Required

A. Application Fee

1. Each borrower must pay an application fee to cover LAFA's cost of processing the loan application. The application fee is non-refundable.

2. The application fee shall be paid by the borrower to the lender and transmitted to LAFA by the lender when the offer is submitted.

3. The amount of the application fee is determined by the total principal amount of the loan requested, as follows.

- | | |

B. Fees Imposed by Lender

b. The commitment fee is paid by the borrower to the lender on or before the loan closing.

c. The commitment fee will be refunded by the lender as follows:

i. in whole if the bonds are not issued by LAFA within one year after acceptance of an offer;

ii. in whole if the loan is not closed during the origination period specified in the offer and accepted by LAFA, if the failure to close the loan is due to any action or inaction by the lender for which the borrower is not responsible;

iii. in whole if the lender cannot finance the loan without exceeding the lender's aggregate authorization for sale and repurchase of loans under the program; and

iv. in whole when the loan is funded by the lender.

2. Origination Fee

a. The lender may impose an origination fee to defray expenses incurred by the lender in processing, originating, and disbursing the proceeds of the loan granted to the borrower in an amount not to exceed 1 percent of the original principal amount of the loan.

b. The origination fee is paid by the borrower to the lender at the loan closing.

3. The lender may impose lender's reasonable and customary charges for insurance premiums, surveys, and other similar closing costs.

C. Fees Imposed by LAFA

1. Cost of Issue Fee

a. LAFA will impose a cost of issue fee to defray expenses incurred in issuance of the bond in an amount not to exceed 2 1/2 percent of the original principal amount of the loan.

b. The cost of issue fee is paid by the borrower to LAFA in the form of a discount of 2 1/2 percent from the original principal amount of the loan when the loan is purchased by LAFA from the lender.

2. Program Participation Fee

a. LAFA shall charge a program participation fee in an amount not to exceed 1/8 of 1 percent per annum on the outstanding principal amount of the loan.

b. The program participation fee shall be paid by the borrower to the lender on each required loan payment date and transmitted by the lender to the trustee to be used to cover the administrative costs of the trustee and LAFA.

§123. Program Description; Procedures Required for Funding of Loans with LAFA Bond Proceeds

A. Loan applicants (i.e., borrowers) will initially apply for a loan to a participating lender and must be approved by the lender. Borrowers must meet all eligibility criteria established by these regulations and by individual lenders for conventional agricultural loans.

B. After a lender approves a borrower for a loan, the lender will apply to LAFA for a determination of the project's eligibility for tax-exempt bond proceeds and, if the project is approved by LAFA, for issuance of a bond. To apply for LAFA approval of a loan, the lender shall submit the following documents to LAFA, each to be submitted on the form provided by LAFA in fully-executed form:

1. the offer, to be executed by the lender, which must contain the lender's commitment to originate a loan to each eligible borrower;

2. the loan terms schedule, which must specify the principal amount, the interest rate, and the amortization schedule of the loan to be funded;

3. the borrower's certificate, to be executed by the borrower;

4. a letter from lender's credit or loan committee or an authorized officer that lender has completed a satisfactory review of each borrower's credit-worthiness; and

5. the borrower's application fee, payable to LAFA.

C. After submission of the above documents to LAFA, the lender may issue a commitment to fund the loan, but lender's commitment shall in no way represent a commitment by LAFA to issue bonds or cause any specific loan to be funded.

D. Upon receipt of the lender's offer, LAFA will officially accept or reject the offer. Upon acceptance of the offer, LAFA will adopt a resolution stating its intention to issue the bond (the intent resolution), a copy of which shall

be provided to lender and conduct the hearing required under TEFRA prior to issuing the bond.

E. No lender may permit interim financing prior to receipt of written notification of LAFA's acceptance of the offer and adoption of the intent resolution. Funding a loan prior to LAFA approval of the offer and adoption of the intent resolution may disqualify the borrower and jeopardize the tax-exempt status of the bonds.

F. LAFA will signify acceptance of the offer by signature of an authorized LAFA representative in the acceptance section of the offer. Upon receipt of written notification of LAFA's approval of the offer and adoption of the intent resolution, the lender may originate the loan. However, any funding of a loan by a lender prior to delivery of the bond is strictly at lender's risk, there being no assurance by LAFA that bond proceeds will be sufficient to fund any or all such loans.

G. From time to time, as the demand warrants and at LAFA's sole discretion, LAFA will issue and deliver bonds, pursuant to a bond resolution, to the lender. The proceeds from sale of the bond will be deposited with and invested by the trustee in accordance with the bond resolution prior to the purchase of the loan from the lender.

H. During the origination period after delivery of the bond, the lender shall:

1. originate the loan; and
2. sell the loan to LAFA. To help defray the costs of issuing the bonds, each loan will be funded to the borrower and purchased by LAFA in an amount equal to 97.5 percent of the original principal amount of the loan (i.e., principal amount less the cost of issue fee). If the lender fails to originate and sell the loan prior to expiration of the origination period, LAFA will redeem the bond held by lender at 97.5 percent of the outstanding principal amount of the bond plus any accrued interest thereon.

I. Prior to the loan closing, the lender must enter into a loan purchase agreement with LAFA, whereby the lender must agree in addition to other provisions to repurchase the loan in the event of default on the loan by the borrower.

J. No later than 15 days prior to the date scheduled for each loan closing, the lender must deliver the loan file to the trustee consisting of the following instruments in the form required by LAFA:

1. the loan purchase agreement, executed by the lender;
2. a copy of the executed loan submission voucher (Exhibit A attached to agreement), which shall request the purchase of the loan by LAFA at a price equal to 97.5 percent of the principal amount of the loan;
3. an executed opinion of lender's counsel (Exhibit B attached to the agreement), to be dated the date of the bond closing;

4. a copy of the executed officer's closing certificate (Exhibit C attached to agreement), to be dated the date of the loan closing;

5. a copy of the executed loan note, post-dated to loan closing date;

6. a certified or other copy of the mortgage or other evidence of security (the mortgage) securing the borrower's obligations under the loan note, if any, showing recordation information;

7. an executed certificate of economic life; and

8. an executed assignment of loan note (Exhibit D attached to the agreement), to be dated the date of loan closing.

K. The trustee shall review the loan file solely to determine:

1. whether the loan file contains all required documents; and

2. whether such documents relate to the loan identified in the offer. The trustee is not required to make any further examination of any document in any loan file. The trustee shall notify LAFA and the lender of its approval of the documents in the loan file prior to the date scheduled for closing the loan.

L. Subsequent to issuance of a bond, the loan purchase agreement may not be amended, changed, modified, altered, or terminated without the written consent of LAFA and the bondholder.

M. If any provisions of the loan purchase agreement is breached by either party and thereafter waived by the other party, such waiver shall be limited to the particular breach so waived and shall not be deemed to waive any other provisions of the loan purchase agreement.

N. Simultaneously with the closing of the loan, or at such other time as the trustee and the lender may mutually agree upon, the lender shall sell and LAFA shall purchase the loan. Under the required loan purchase agreement, the lender will service the loan.

O. If a lender fails to maintain its eligibility under the program after the issue and delivery of the bond, but before sale of the loan to LAFA, LAFA will redeem the bond held by the lender in an amount equal to 97.5 percent of the aggregate principal amount of the bond plus any accrued interest thereon.

P. Upon default on a loan and repurchase of the loan pursuant to the provisions of the loan purchase agreement, the corresponding bond shall be redeemed by LAFA at 100 percent of the outstanding principal amount thereof together with any accrued interest thereon.

§125. Causes for Termination of Loan Purchase Agreement

A. LAFA may terminate a loan purchase agreement with any lender in any of the following circumstances:

1. lenders failure to pay loan note repayments over to the trustee if such failure continues for a period of five days;
2. lenders failure to observe or perform in any material respect any other covenant or condition of a loan purchase agreement for more than 30 days after receipt of written notice thereof from LAFA or the trustee. Prior to the expiration of such period, LAFA may extend the period by written authorization. If the failure stated in the notice cannot be corrected within 30 days, LAFA will not unreasonably withhold its consent to an extension of such time if corrective action is instituted by the lender within the applicable period;
3. if any representation of or warranty by lender to LAFA is false in any material respect and LAFA has notice thereof;
4. the issuance of an order against the lender by any court or other supervisory authority having jurisdiction in the premises for the appointment of a conservator, receiver, or liquidator in any insolvency, readjustment of debt, marshaling of assets and liabilities, or liquidation of lender's affairs which remains in force undischarged or unstated for a period of 60 days;
5. lender's consent to the appointment of a conservator, receiver, or liquidator in any insolvency, readjustment of debt, marshaling of assets and liabilities, or similar proceedings relating to lender or all or substantially all of its property;
6. lender's admission, in writing, of its inability to pay its debts generally as they become due, filing of a petition to take advantage of any applicable insolvency or reorganization statute, making an assignment for the benefit of its creditors, or voluntarily suspending payment of its obligations.

B. In any of the circumstances enumerated in §125.A, LAFA or the trustee, on LAFA's behalf, may take one or both of the following steps:

1. make written demand on the lender for lender's repurchase of the unpaid portion of the loan note at a price equal to the unpaid principal plus any interest which has accrued and is unpaid as of the date of repurchase. Such demand shall be made when the lender fails for more than five days to pay over to the trustee the proceeds of loan note repayments;
2. take whatever other action at law or in equity may appear necessary or desirable to collect any amounts due or to become due under the loan purchase agreement or to enforce performance and observance of a loan purchase agreement, including actions for costs of legal fees and other expenses incurred in such actions. Any amounts collected pursuant to action taken under this rule shall be deposited in the bond fund.

C. No delay or omission in exercising the remedies set forth above shall impair any right or be construed to be a waiver thereof; such remedies may be exercised from time to time, as often as may be deemed expedient, without any notice other than the notice required by this rule.

§129. Definition of Program

A. Under the Act, the issuer is authorized to issue revenue bonds to alleviate the serious shortage of capital and credit available for investment in agriculture, for domestic and export purposes, at interest rates within the financial means of persons engaged in agricultural production and agricultural exports. The Act also authorizes the issuer:

1. to purchase or make contracts to purchase agricultural loans made by lenders to borrowers; and

2. to make loans or contract to make loans to and deposits with certain lending institutions, who will in turn make agricultural loans to borrowers with the proceeds.

§131. Types of Loans to be Purchased or Made

A. The issuer shall only purchase agricultural loans made by lenders or enter into repurchase obligations with certain national banks who will in turn make agricultural loans to borrowers.

B. Acquisition of Eligible Loans

1. Moneys in the loan fund shall be used only for the acquisition of eligible loans pursuant to agreements or to enter into repurchase obligations, as described below. No eligible loan shall be purchased unless such eligible loan

bears interest, payable semiannually on April 1 and October 1 of each year, at a rate no less than 9.10 percent, and matures no later than October 1, 1996. No repurchase obligation shall be entered into unless such repurchase obligation carries with it an interest component as a part of the resale price of 9.10 percent, and matures no later than October 1, 1996. No eligible loan or repurchase obligation shall be purchased unless it requires that any principal amounts prepaid under such eligible loan or repurchase obligation, for whatever reason, shall be paid to the trustee in accordance with Section 4.14 of the Indenture, and in no event shall any prepayment (including prepayments due to casualty or condemnation) be in an amount less than \$100,000. Prior to the disbursement of any funds from the loan fund to acquire an eligible loan or enter into a repurchase obligation, the trustee shall complete a program checklist and submit the same to the issuer and to Standard and Poor's Corporation.

2. Moneys in the loan fund shall be used to acquire any eligible loans presented to the issuer and the trustee by a lender in accordance with the provisions set forth herein, pursuant to an agreement at a price described below upon receipt by the trustee of all documents, opinions and certificates required in the agreement and the program checklist. Each eligible loan shall be purchased at a purchase price of 99.78 percent of the outstanding principal amount of such eligible loan, less a surrender charge (as that term is defined in the investment agreement and which shall be payable to the insurance company), in the amount determined by the investment agreement provided that the purchase price of an eligible loan shall not be in an amount less than \$100,000 and shall not exceed \$5,000,000. The average principal amount of eligible loans must be at least \$500,000. Eligible loans may not be acquired after September 30, 1991, and the total amount of withdrawals (as such term is defined in the investment agreement) at any point in time shall not exceed the applicable maximum cumulative withdrawal amounts (as defined in the investment agreement). Payments made by a credit provider under a letter of credit or guaranty shall be applied as a credit against amounts owing by a borrower under a financed eligible loan with respect to which such letter of credit or guaranty was issued.

3. The issuer will cooperate with each lender, and shall require each lender to cooperate with the issuer, such that all accrued interest through the date on which the eligible loan is acquired by the issuer is paid directly or reimbursed to each lender.

4. Each eligible loan shall be secured by an irrevocable letter of credit, a guaranty, or a comparable instrument which shall effectively guarantee payment of all principal and interest on such eligible loan, such letter of credit, guaranty or comparable instrument being issued by a credit provider whose long-term unsecured debt rating is rated at least as high as the initial rating on the bonds, as confirmed in writing by Standard and Poor's Corporation, or, if not so rated (and then only in the case of a letter of credit delivered by a savings and loan association insured by

FSLIC or a state-chartered banking association insured by FDIC such credit provider shall pledge securities sufficient to maintain the initial rating on the bonds; the types of eligible collateral securities, and the level of collateralization required for each type of collateral security in order to obtain such a rating from Standard and Poor's Corporation, are set forth in Exhibit F; provided that if any such securities to be pledged consist of FHA/VA Mortgage Notes, Conventional Mortgage Notes, FHA/VA Mortgage Notes—ARMS and Conventional Mortgage Notes—ARMS (as those terms are used in the Collateral Pledge Agreement FSLIC), then prior to the acquisition of the eligible loan the trustee shall receive notice from Standard and Poor's Corporation (at the expense of the respective borrower) to the effect that the delivery of FHA/VA Mortgage Notes, Conventional Mortgage Notes, FHA/VA Mortgage Notes—ARMS and Conventional Mortgage Notes—ARMS by such credit provider will not adversely affect the rating on the bonds. In the event that an eligible loan is to be secured by an instrument other than a letter of credit or a guaranty in precisely the forms attached to the Indenture, such eligible loan shall not be purchased with bond proceeds until such time as the trustee receives written confirmation from Standard and Poor's Corporation (at the expense of the respective borrower) that such purchase will not adversely affect the rating of the bonds.

C. Repurchase Obligations. Moneys in the loan fund shall also be used by the issuer to enter into any repurchase obligation presented to it by a credit provider in accordance with the provisions set forth herein (to enable such credit provider to in turn finance an eligible loan). Securities purchased under a repurchase obligation shall be purchased at a price of 99.78 percent of the purchase price, less a surrender charge (as that term is defined in the investment agreement and which shall be payable to the insurance company) in the amount determined by the investment agreement. The purchase price of a repurchase obligation shall not be in an amount less than \$100,000 and shall not exceed \$5,000,000. The average principal amount of repurchase obligations must be at least \$500,000. Repurchase obligations may not be acquired after September 30, 1991, and the total amount of withdrawals (as such term is defined in the investment agreement) at any point in time shall not exceed the applicable maximum cumulative withdrawal amounts (as defined in the investment agreement).

D. There shall be included as a provision to every loan note, the agreement of the maker thereof to the effect that the loan note shall continue to bear interest until such time as the trustee has on deposit available moneys representing sufficient funds for the payment of such loan note.

E. No eligible loan shall be purchased by the trustee, and no repurchase obligation shall be entered into by the trustee, during any period commencing with the date which would (if such eligible loan were otherwise purchased) constitute a draw date for such eligible loan and ending on the immediately succeeding interest payment date.

A. The following financial institutions shall qualify as credit providers and shall meet the following conditions.

1. A savings and loan association insured by FSLIC may act as credit provider and shall deliver a letter of credit and in the event such savings and loan association does not have a long-term unsecured debt rating by Standard and Poor's Corporation at least equal to the initial rating on the bonds, such letter of credit shall be collateralized in accordance with a Collateral Pledge Agreement (FSLIC) which shall be delivered to the Trustee.

2. A national bank may act as a credit provider and if it does not have a long-term credit rating at least equal to the initial rating on the bonds, shall enter into a repurchase obligation which shall be delivered to the trustee.

A lender may submit to the issuer, the trustee and the co-trustee a proposal to sell agricultural loans in substantially the form attached as Exhibit B hereto. Such form shall include a description of the rates, fees and terms of the loans made by the lender to the borrower and a description of the project financed, including its location and characteristics. The lender shall also describe the security for the loan. Upon receipt of a proposal to sell agricultural loans, the issuer, the trustee and the co-trustee, on behalf of the issuer, shall review such proposal. hereto, to the lender. The form of agreement shall be enclosed with the conditional approval.

B. Initiation of Repurchase Obligation. A national bank may submit to the issuer, the trustee and the co-trustee a proposal to enter into repurchase obligation in substantially the form attached as Exhibit D hereto. Such form shall include a description of the rates, fees, and terms of the loans to be made by the national bank to the borrower and a description of the project financed, including its location and characteristics. H. In the event the land upon which a new agricultural plant will be constructed or an existing plant which will be expanded is already subject to a lien, mortgage or encumbrance which the applicant proposes to pay off with loan proceeds from the market commission or any other lender, such application can be approved only if the amount of the loan does not exceed 75 percent of the value of all security to be provided, the amount of the loan left after satisfying the encumbrances will finance the construction or improvements proposed and the applicant does not realize any cash from the loan except for operating capital, market development or product inventories. If the amount of the lien, mortgage or encumbrance to be satisfied out of the loan proceeds is disproportionate to the amount to be used for new construction, improvement or expansion, then the commission may reject the application on the grounds that it is a refinancing and is prohibited by the law creating the program. The commission considers disproportionate to be an amount in excess of 25 percent of the loan amount sought in the application.

§705. Linked Deposit Loan Program Authorization; Lending Institution Requirements; Applicants Requirements and Conditions for Approval

A. The treasurer may invest in linked deposits, as provided and defined by R.S. 49:327.2, and, also defined herein, provided that at the time of placement of any linked deposit the total amount of such investments at any one time shall not exceed, in the aggregate, \$10,000,000. When deciding whether to invest in linked deposits, the treasurer shall give priority to the investment, liquidity, and cash flow needs of the state and a determination of the financial soundness of the eligible lending institution.

B. An eligible lending institution that desires to receive a linked deposit shall accept and review applications for loans from eligible agricultural products processing businesses. The eligible lending institution shall apply all usual lending standards to determine the credit worthiness of each eligible agricultural products processing business. The eligible lending institution shall not charge, levy or collect any loan application fee, processing fee, or other charges other than its normal loan application fee, processing fee, or other charges when handling a linked deposit application.

C.1. Only one loan through the linked deposit program shall be made and shall be outstanding at any one time to any eligible agricultural products processing business.

2. The maximum amount available to any eligible agricultural products processing business, under this program, at any one time shall be \$200,000.

3. No loan shall be made to any officer or director of the lending institution making the loan.

D. An eligible agricultural products processing business shall certify on its loan application that the reduced rate loan will be used exclusively to create new jobs or preserve existing jobs and employment opportunities in the state. Whoever knowingly files a false statement concerning such application shall be guilty of the offense of filing false public records and shall be subject to penalty provided for in R.S. 14:133.

E. In considering which eligible agricultural products processing business to include in the linked deposit loan package for reduced rate loans, the eligible lending institution shall give priority to the economic needs of the area of the state in which the business is located, the number of jobs to be created or preserved in the state by the receipt

of such loans, and such other factors as the eligible lending institution considers appropriate to determine the relative financial need of the eligible agricultural products processing business.

F. The eligible lending institution shall forward to the commissioner and the treasurer for review a linked deposit loan package. The package shall include such information as required by the commissioner including the amount of the loan requester, the number of jobs to be created or sustained in the state by each eligible agricultural products processing business, the ratio of state funds to be deposited to jobs sustained or created, and any reports, statements, or plans applicable to the business, the overall financial need of the business, and such other factors as the commissioner considers appropriate. The eligible financial institution shall certify that each applicant is an eligible agricultural products processing business as defined herein and shall, for each eligible agricultural products processing business, certify the present borrowing rate applicable to each specific eligible agricultural products processing business. Within 45 days after receipt, the commissioner shall provide written recommendations to the treasurer on each linked deposit loan package received from eligible financial institutions.

G. The treasurer may accept or reject a linked deposit loan package or any portion thereof, based on the treasurer's review of the recommendations of the commissioner, the availability and amount of state funds to be deposited, and a determination of the financial soundness of the financial institution in which the deposit is to be made. The treasurer shall notify the commissioner and the eligible lending institution of acceptance or rejection of a linked deposit loan package within 15 days of receipt of the recommendations of the commissioner.

H. Upon acceptance of the linked deposit loan package or any portion thereof, the treasurer may place certificates of deposit with the eligible lending institution at 3 percent below the current investment rates, as determined and calculated by the treasurer. When necessary, the treasurer may place certificates of deposit prior to acceptance of a linked deposit loan package.

I. The eligible lending institution shall enter into a deposit agreement with the treasurer, which shall include the requirements necessary to carry out the purposes of this Chapter. The requirements shall reflect the market conditions prevailing in the eligible lending institution's lending area. The agreement may specify the period of time in which the lending institution is to loan funds upon the placement of a linked deposit, and shall include provisions for the certificates of deposit to mature within a period not to exceed one year. The treasurer may renew a certificate of deposit in one-year increments but in no event shall the total period of time that a certificate of deposit is placed with any lending institution exceed three consecutive years. Interest shall be paid at the times determined by the treasurer. However, upon placement of a linked deposit, the treasurer will give priority to renewal of existing linked deposits prior to placement of new linked deposits. Prior to renewal of linked deposits, the treasurer shall continue to give priority

to the investment, liquidity cash flow needs of the state and a determination of the financial soundness of the eligible lending institution.

J. The period of time for which each certificate of deposit is placed with an eligible lending institution shall be neither longer nor shorter than the period of time for which the linked deposit shall be used to provide loans at reduced interest rates. The agreement shall further provide that the state shall receive investment interest rates on any certificate of deposit or any portion thereof for any period of time for which there shall be no corresponding linked deposit loan outstanding to an eligible agricultural products processing business.

K. Upon placement of a linked deposit with an eligible lending institution, the institution shall lend such funds to each approved eligible agricultural products processing business listed in the linked deposit loan package. Each loan shall be at a fixed rate of interest for a period of one year which shall be 3 percent below the current borrowing rate applicable to each eligible agricultural products processing business. All records and documents pertaining to the linked deposit program shall be segregated by each lending institution for ease of identification and examination. A certification of compliance with this Section in the form and manner prescribed by the treasurer shall be completed by the lending institution and filed with the treasurer and the commissioner.

L.1. If it is discovered that there is a linked deposit made for any purpose not authorized, the certificate may be matured and/or rewritten, if appropriate, without penalty to the state treasurer.

2. If the eligible lending institution fails to pledge securities to the treasurer as required under R.S. 49:321 or if such securities shall be unsatisfactory to secure the deposit, in his sole discretion, the treasurer may declare the deposit and interest earned thereon, or any part thereof, to become immediately due and payable, notwithstanding any agreement or contract to the contrary.

AUTHORITY NOTE: Promulgated in accordance with R.S. 49:327.2.

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of Marketing, Market Commission, LR 19:1305 (October 1993).

§715. Linked Deposit Loan Program Authorization; Lending Institution Requirements; Applicants Requirements and Conditions for Approval

A. The treasurer may invest in linked deposits, as provided and defined by R.S. 49:327.1, and, also defined herein, provided that at the time of placement of any linked deposit the total amount of such investments at any one time shall not exceed, in the aggregate, \$10,000,000. When deciding whether to invest in linked deposits, the treasurer shall give priority to the investment, liquidity, and cash flow needs of the state and a determination of the financial soundness of the eligible lending institution.

B. An eligible lending institution that desires to receive a linked deposit shall accept and review applications for loans from eligible farmers. The eligible lending institution shall apply all usual lending standards to determine the credit worthiness of each eligible farmer. The eligible lending institution shall not charge, levy or collect any loan application fee, processing fee, or other charges other than its normal loan application fee, processing fee, or other charges when handling a linked deposit application.

C.1. Only one loan through the linked deposit program shall be made and shall be outstanding at any one time to any eligible farmer.

2. The maximum amount available to any eligible farmer, under this program, at any one time shall be \$100,000.

3. No loan shall be made to any officer or director of the lending institution making the loan.

D. An eligible farmer shall certify on his loan application that the reduced rate loan will be used exclusively in accordance with §711. Whoever knowingly files a false statement concerning such application shall be guilty of the offense of filing false public records and shall be subject to penalty provided for in R.S. 14:133.

E. In considering which farmer to include in the linked deposit loan package for reduced rate loans, the eligible lending institution shall give priority to the economic needs of the area of the state in which the business is located, the prevailing agricultural conditions, and such other factors as the eligible lending institution considers appropriate to determine the relative financial need of the eligible farmer.

F. The eligible lending institution shall forward to the commissioner and the treasurer for review a linked deposit loan package. The package shall include such information as required by the commissioner including the amount of the loan requested, and any reports, statements, or plans applicable to the business, the overall financial need of the business, and such other factors as the commissioner considers appropriate. The eligible financial institution shall certify that each applicant is an eligible farmer as defined herein and shall, for each eligible farmer, certify the present borrowing rate applicable to each specific eligible farmer. Within 45 days after receipt, the commissioner shall provide written recommendations to the treasurer on each linked deposit loan package received from eligible financial institutions.

G. The treasurer may accept or reject a linked deposit loan package or any portion thereof, based on the treasurer's review of the recommendations of the commissioner, the availability and amount of state funds to be deposited, and a determination of the financial soundness of the financial institution in which the deposit is to be made. The treasurer shall notify the commissioner and the eligible lending institution of acceptance or rejection of a linked deposit loan package within 15 days of receipt of the recommendations of the commissioner.

H. Upon acceptance of the linked deposit loan package or any portion thereof, the treasurer may place certificates of deposit with the eligible lending institution at 3 percent below the current investment rates, as determined and calculated by the treasurer. When necessary, the treasurer may place certificates of deposit prior to acceptance of a linked deposit loan package.

I. The eligible lending institution shall enter into a deposit agreement with the treasurer, which shall include the requirements necessary to carry out the purposes of this Chapter. The requirements shall reflect the market conditions prevailing in the eligible lending institution's lending area. The agreement may specify the period of time in which the lending institution is to loan funds upon the placement of a linked deposit, and shall include provisions for the certificates of deposit to mature within a period not to exceed one year. The treasurer may renew a certificate of deposit in one-year increments. Interest shall be paid at the times determined by the treasurer. However, upon placement of a linked deposit, the treasurer will give priority for a period of two more years to renewal of existing linked deposits prior to placement of new linked deposits. Prior to renewal of linked deposits, the treasurer shall continue to give priority to the investment, liquidity cash flow needs of the state and a determination of the financial soundness of the eligible lending institution.

J. The period of time for which each certificate of deposit is placed with an eligible lending institution shall be neither longer nor shorter than the period of time for which the linked deposit shall be used to provide loans at reduced interest rates. The agreement shall further provide that the state shall receive investment interest rates on any certificate of deposit or any portion thereof for any period of time for which there shall be no corresponding linked deposit loan outstanding to an eligible agricultural products processing business.

K. Upon placement of a linked deposit with an eligible lending institution, the institution shall lend such funds to each approved eligible farmer listed in the linked deposit loan package. Each loan shall be at a fixed rate of interest for a period of one year which shall be 3 percent below the current borrowing rate applicable to each eligible farmer. All records and documents pertaining to the linked deposit program shall be segregated by each lending institution for ease of identification and examination. A certification of compliance with this Section in the form and manner prescribed by the treasurer shall be completed by the leading institution and filed with the treasurer and the commissioner.

L.1. If it is discovered that there is a linked deposit made for any purpose not authorized, the certificate may be matured and/or rewritten, if appropriate, without penalty to the state treasurer.

2. If the eligible lending institution fails to pledge securities to the treasurer as required under R.S. 49:321 or if such securities shall be unsatisfactory to secure the deposit, in his sole discretion, the treasurer may declare the deposit and interest earned thereon, or any part thereof, to become immediately due and payable, notwithstanding any agreement or contract to the contrary.

§1203. Definitions

A. The definitions set forth in R.S. 3:921 are applicable to this Chapter, except where specifically defined herein.

B. The following words and terms are defined for the purposes of this Chapter.

Adequately Reduce Microorganisms of Public Health Significance—reduce the presence of such microorganisms to an extent sufficient to prevent illness.

Agricultural Tea—a water extract of biological materials (such as stabilized compost, manure, non-fecal animal byproducts, peat moss, pre-consumer vegetative waste, table waste, or yard trimmings), excluding any form of human waste, produced to transfer microbial biomass, fine particulate organic matter, and soluble chemical components into an aqueous phase. Agricultural teas are held for longer than one hour before application. Agricultural teas are soil amendments for the purposes of this rule.

Agricultural Tea Additive—a nutrient source (such as molasses, yeast extract, or algal powder) added to agricultural tea to increase microbial biomass.

Agricultural Water—water used in covered activities on covered produce where water is intended to, or is likely to, contact covered produce or food contact surfaces, including water used in growing activities (including irrigation water applied using direct water application methods, water used for preparing crop sprays, and water used for growing sprouts) and in harvesting, packing, and holding activities (including water used for washing or cooling harvested produce and water used for preventing dehydration of covered produce).

Animal Excreta—solid or liquid animal waste.

Application Interval—the time interval between application of an agricultural input (such as a biological soil amendment of animal origin) to a growing area and harvest of covered produce from the growing area where the agricultural input was applied.

Biological Soil Amendment—any soil amendment containing biological materials such as stabilized compost, manure, non-fecal animal byproducts, peat moss, pre-consumer vegetative waste, sewage sludge biosolids, table waste, agricultural tea, or yard trimmings, alone or in combination.

Biological Soil Amendment of Animal Origin—a biological soil amendment which consists, in whole or in part, of materials of animal origin, such as manure or non-fecal animal byproducts including animal mortalities, or table waste, alone or in combination. The term “biological soil amendment of animal origin” does not include any form of human waste.

Commissioner—the Commissioner of Agriculture and Forestry.

Composting—a process to produce stabilized compost in which organic material is decomposed by the actions of microorganisms under thermophilic conditions for a designated period of time at a designated temperature, followed by a curing stage under cooler conditions.

Covered Activity—growing, harvesting, packing, or holding covered produce on a farm. Covered activity includes the manufacturing or processing of covered produce on a farm, but only to the extent that such activities are

performed on raw agricultural commodities and such activities are within the meaning of “farm” as defined in this Chapter. Providing, acting consistently with, and documenting actions taken in compliance with written assurances as described in 21 CFR §112.2(b) are also covered activities. This definition does not apply to activities of a facility that are subject to 21 CFR 110.

Covered Produce—produce that is subject to the requirements of this Chapter in accordance with 21 CFR §§112.1 and 112.2. The term “covered produce” refers to the harvestable or harvested part of the crop.

Covered Produce Farm—any farm engaged in the growing, harvesting, packing, or holding of produce for human consumption which is subject to the requirements of the FDA Food Safety Modernization Act, 21 CFR §112.4, but shall not include farms that have twenty-five thousand dollars or less of gross income from sales of produce in a year.

Curing—the final stage of composting, which is conducted after much of the readily metabolized biological material has been decomposed, at cooler temperatures than those in the thermophilic phase of composting, to further reduce pathogens, promote further decomposition of cellulose and lignin, and stabilize composition. Curing may or may not involve insulation, depending on environmental conditions.

Department—the Louisiana Department of Agriculture and Forestry.

Food—food as defined in section 201(f) of the Federal Food, Drug, and Cosmetic Act, 21 USC 321 et seq., and includes seeds and beans used to grow sprouts.

Fruit—the edible reproductive body of a seed, plant, or tree nut. “Fruit” means the harvestable or harvested part of a plant developed from a flower.

Harvesting—activities that are traditionally performed on farms for the purpose of removing raw agricultural commodities from the place they were grown or raised and preparing them for use as food. Harvesting is limited to activities performed on raw agricultural commodities, or on processed foods created by drying/dehydrating a raw agricultural commodity without additional manufacturing or processing, on a farm. “Harvesting” does not include activities that transform a raw agricultural commodity into a processed food as defined in Section 201(gg) of the Federal Food, Drug, and Cosmetic Act, 21 USC §321 et seq. The process of harvesting includes, but is not limited to the following: cutting (or otherwise separating) the edible portion of the raw agricultural commodity from the crop plant and removing or trimming part of the raw agricultural

commodity; cooling; field coring; filtering; gathering; hulling; removing stems and husks from; shelling; sifting; threshing; trimming of outer leaves of; and washing raw agricultural commodities grown on a farm.

Holding facilities could include warehouses, cold storage facilities, storage silos, grain elevators, and liquid storage tanks.

Known or Reasonably Foreseeable Hazard—a biological hazard that is known to be, or has the potential to be, associated with the farm or the food.

Manufacturing/Processing—making food from one or more ingredients, or synthesizing, preparing, treating, modifying or manipulating food, including food crops or ingredients. Manufacturing/processing activities include, but are not limited to the following: baking, boiling, bottling, canning, cooking, cooling, cutting, distilling, drying/dehydrating raw agricultural commodities to create a distinct commodity, evaporating, eviscerating, extracting juice, formulating, freezing, grinding, homogenizing, labeling, milling, mixing, packaging (including modified atmosphere packaging), pasteurizing, peeling, rendering, treating to manipulate ripening, trimming, washing, or waxing. For farms and farm mixed-type facilities, manufacturing/processing does not include activities that are part of harvesting, packing, or holding.

Manure—animal excreta, alone or in combination with litter for use as a soil amendment.

Microorganisms—yeasts, molds, bacteria, viruses, protozoa, and microscopic parasites including species having public health significance. The term “undesirable microorganisms” includes those microorganisms that are of public health significance, that subject food to decomposition, that indicate that food is contaminated with filth, or that otherwise may cause food to be adulterated.

Mixed-Type Facility—an establishment that engages in both activities that are exempt from registration under Section 415 of the Federal Food, Drug, and Cosmetic Act and activities that require the establishment to be registered.

Packing—placing food into a container, other than packaging, the food and o includes activities performed incidental to packing a food such as sorting, culling, grading, and weighing or conveying incidental to packing or repacking, but does not include activities that transform a raw agricultural commodity, as defined in Section 201(r) of the Federal Food, Drug, and Cosmetic Act, into a processed food as defined in Section 201(gg) of the Federal Food, Drug, and Cosmetic Act.

Pest—any objectionable animals or insects, including, but not limited to, birds, rodents, flies, and larvae.

Pre-Consumer Vegetative Waste—solid waste that is purely vegetative in origin, not considered yard trash, and derived from commercial, institutional, or agricultural operations without coming in contact with animal products, byproducts or manure, or with an end user (consumer). “Pre-consumer vegetative waste” includes material generated by farms, packing houses, canning operations, wholesale distribution centers and grocery stores; products that have been removed from their packaging (such as out-of-date juice, vegetables, condiments, and bread); and associated packaging that is vegetative in origin (such as paper or corn-starch based products). “Pre-consumer vegetative waste” does not include table waste, packaging that has come in contact with materials (such as meat) that are not vegetative in origin, or any waste generated by restaurants.

Primary Production Farm—an operation under one management in one general (but not necessarily contiguous) physical location devoted to the growing of crops, the harvesting of crops, the raising of animals including seafood, or any combination of these activities. The term “farm” includes operations that, in addition to the aforementioned activities, also:

- a. pack or hold raw agricultural commodities;

Produce does not include food grains meaning the small, hard fruits or seeds of arable crops, or the crops bearing these fruits or seeds, that are primarily grown and processed for use as meal, flour, baked goods, cereals and oils rather than for direct consumption as small, hard fruits or seeds.

Qualified End-User—a consumer of food (where the term consumer does not include a business); or a restaurant or retail food establishment, as defined in 21 CFR §1.227, that is located:

- a. in the same state or the same Indian reservation as the farm that produced the food; or
- b. not more than 275 miles from such farm.

Soil Amendment—any chemical, biological, or physical material intentionally added to the soil to improve the chemical or physical condition of soil in relation to plant growth or to improve the capacity of the soil to hold water. The term “soil amendment” also includes growth media that serve as the entire substrate during the growth of covered produce.

Stabilized Compost—a stabilized (*i.e.*, finished) biological soil amendment produced through a controlled composting process.

Static Composting—a process to produce stabilized compost in which air is introduced into biological material, in a pile or row, that may or may not be covered with insulating material, or in an enclosed vessel by a mechanism that does not include turning.

Table Waste—any post-consumer food waste, irrespective of whether the source material is animal or vegetative in origin, derived from individuals, institutions, restaurants, retail operations, or other sources where the food has been served to a consumer.

Turned Composting—a process to produce stabilized compost in which air is introduced into biological material, in a pile, row, or enclosed vessel, by turning on a regular basis. §1213. Domesticated and Wild Animals, Relative to Covered Produce

A. The requirements of this Section apply when a covered activity takes place in an outdoor area or a partially-enclosed building and when, under the circumstances, there is a reasonable probability that animals will contaminate covered produce.

B. The requirements of this Section do not apply:

1. when a covered activity takes place in a fully-enclosed building; or
2. to fish used in aquaculture operations.

C. If there is reasonable probability that grazing animals, working animals, or animal intrusion will contaminate covered produce, then:

1. the relevant areas used for a covered activity shall be assessed for evidence of potential contamination of covered produce as needed during the growing season; and

2. if significant evidence of potential contamination is found, such as observation of animals, animal excreta or crop destruction, the covered produce shall be evaluated to determine whether it can be harvested in accordance with the requirements of 21 CFR §112.112, and reasonably necessary measures shall be taken during growing to assist later during harvest when covered produce that is reasonably likely to be contaminated with a known or reasonably foreseeable hazard shall be identified and not harvested.

D. Nothing in this regulation authorizes the “taking” of threatened or endangered species, as that term is defined by the Endangered Species Act (16 U.S.C. 1531-1544) (i.e., to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct). This regulation does not require covered farms to take measures to exclude animals from outdoor growing areas, or to destroy animal habitat or otherwise clear farm borders around outdoor growing areas or drainages.

If a covered produce farm grows, harvests, packs, or holds produce that is not covered in this part (i.e., excluded produce in accordance with 21 CFR §112.2) and also conducts such activities on covered produce, and the excluded produce is not grown, harvested, packed or held in accordance with this Chapter, measures shall be taken during these covered activities, as applicable, to:

1. keep covered produce separate from excluded produce, except when covered produce and excluded produce are placed in the same container for distribution; and
2. adequately clean and sanitize, as necessary, any food contact surfaces that contact excluded produce before using such food contact surfaces for covered activities on covered produce.

B. All reasonably necessary measures shall be taken to identify, not harvest, covered produce that is reasonably likely to be contaminated with a known or reasonably foreseeable hazard, including steps to identify and not harvest covered produce that is visibly contaminated with animal excreta. At a minimum, identifying and not harvesting covered produce that is reasonably likely to be contaminated with, or that is visibly contaminated with, animal excreta requires a visual assessment of the growing area and all covered produce to be harvested, regardless of the harvest method used.

C. Harvested covered produce shall be handled during covered activities in a manner that protects against contamination with known or reasonably foreseeable hazards.

D. Dropped covered produce shall not be distributed. Dropped covered produce is covered produce that drops to the ground before harvest. Dropped covered produce does not include root crops that grow underground, crops that grow on the ground, or produce that is intentionally dropped to the ground as part of harvesting.

E. Covered produce shall be packaged in a manner that prevents the formation of *Clostridium botulinum* toxin if such toxin is a known or reasonably foreseeable hazard.

F. Food-packing material that is adequate for its intended use shall be used, which includes being:

1. cleanable or designed for single use; and
2. unlikely to support the growth or transfer of bacteria.

G. If food-packing material is reused, adequate steps shall be taken to ensure that food contact surfaces are clean.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:921, R.S. 3:922, and R.S. 9:923.

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of Animal Health and Food Safety, LR 48:399 (March 2022).

§111. Sampling Procedures

A. Sampling of fertilizer is the responsibility of the director of Agricultural Chemistry Programs of the Department of Agriculture and Forestry.

B. All samples of fertilizer that are shipped or stored in bulk shall be composite samples.

C. When taking a composite sample, the inspector will follow the procedures accepted by the Association of Official Analytical Chemists (A.O.A.C.) and/or American Association of Plant Food Control Officials (A.A.P.F.C.O.). No less than 10 probe samples shall constitute a composite sample from any kiln, truck or pull type trailer. No less than 10 probe samples shall be taken to secure a composite sample in bulk warehouse storage area. When a composite sample is taken directly from a blender, prior to loading or storage, then the inspector shall cut the stream of flow according to A.O.A.C./A.A.P.F.C.O. standards and guidelines. If no sample splitter is provided by the guarantor, the inspector shall take a sample of approximately five pounds. This entire sample will be transported to the laboratory for analysis. A fertilizer blender may request a sample of not less than 20 pounds, nor more than 50 pounds provided the fertilizer company furnishes the inspector with a sample splitter and containers. The inspector will then split the sample to approximately five pounds. This portion will be properly labeled and transported to the laboratory for analysis. The remainder of the sample will be returned to the original lot from which the sample was taken.

D. When prepackaged fertilizer is sampled, the composite sample shall be taken in the following amounts:

1. lots containing 10 packages or less, every package shall be sampled;

2. lots containing less than 1,000 packages, 5 percent of the packages shall be sampled, but not less than 10 packages will be sampled from the lot; and

3. lots containing 1,000 or more packages, 50 different packages shall be sampled.

E. When the fertilizer is in liquid form, and stored in quantities other than small packages, one sample is to be taken from each storage container in accordance with the procedures accepted by the A.O.A.C. and/or A.A.P.F.C.O. When the fertilizer is in liquid form and prepackaged for sale in small containers, a single package may be taken.

F. Each official sample shall be placed in a suitable container and clearly marked for identification while the inspector taking the sample is still on the premises of the guarantor, and the guarantor or his agent shall be permitted to examine the marking. The identification so affixed to the sample shall contain all information called for on the official fertilizer inspection form of the Department of Agriculture and Forestry.

G. All samples shall be forwarded by the inspector to the state chemist within two working days, and the inspector shall record the date of mailing or delivering of said sample.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:1382.

B. All samples received in the laboratory shall be reduced to approximately 0.5 pounds for chemical analysis by splitting the sample in accordance with A.O.A.C. procedures.

C. In analysis of fertilizers, the state chemist shall follow the procedures set forth in the current edition of Official Methods of Analysis of the Association of Official Analytical Chemists (A.O.A.C.) or the procedures recognized by the American Association of Plant Food Control Officials (A.A.P.F.C.O.).

D. In any situation which is not expressly covered by the authorities cited in §113.B above, the state chemist shall select the method of analysis to be followed and shall document the rationale for his selection.

E. Results of the fertilizer analysis shall be mailed to the guarantor within 30 days after the sample is taken. If the test results are not mailed to the guarantor within 30 days after the sample was taken, the guarantor may request in writing, within 10 days of receipt of notice of deficiency, a hearing before the commission for a determination of the validity of any penalties assessed.

F. When analysis indicates a deficiency, then an additional analysis shall be made from the unground portion of that sample being held in the laboratory. If the results of the two analyses differ, then the official results shall be the analysis that indicates the higher percentage of plant nutrients.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:1382.

§101. Definitions

A. The definitions in R.S. 3:1431 and the following definitions are applicable to this Part.

Coated Seed—any seed unit covered with any substance that changes the size, shape, or weight of the original seed. Seeds coated with ingredients such as, but not limited to, rhizobia, dyes, and pesticides that do not significantly change the size, shape, or weight of the original seed are excluded.

Declaration—a written statement of a grower, shipper, processor, dealer, or importer, given for any lot of seed the kind, variety, type, origin, or the use for which the seed is intended.

Prohibited Noxious Weed Seed—the seeds of weeds that not only reproduce by seed, but also spread underground roots or stems, and which, when established, are highly destructive and difficult to control in the state by ordinary good cultural practices. These seeds are prohibited from being present in agricultural, vegetable, flower, tree, or shrub seed, or from being sold as a labeled seed kind.

Registered Seed Technologist—as applied in these regulations, means a seed technologist who has attained

registered membership in the Society of Commercial Seed Technologists (society) through qualifying tests and experiences as required by the society.

(1) Samples of seeds that are unclean, field run or containing high inert matter shall be charged an additional \$10.00 per sample.

(2) Fees for tests on seed kinds not listed shall be based on the cost of a kind with a similar test.

(3) Louisiana Noxious Weed Seed Examination included in Purity Exam.

(4) For germination tests of mixtures of two or more kinds of seed, the fee is the sum of the fees established for germination tests for the components of the mixture. For a purity analysis performed in conjunction with a germination analysis of seed mixtures, the fee is the same as for that component of the mixture for which the highest charge would be made if separately analyzed. For purity analysis not performed in conjunction with a germination analysis the fee is the sum of the fees established for the purity tests for the components of the mixture if separately analyzed.

2. All State Noxious Weed Seed Examination—\$20. Species appearing on the USDA state noxious-weed seed requirements recognized in the administration of the FSA, reported as number found and rate per unit weight.

NOTE: Excludes AK and HI noxious weed seeds, Orbanche spp., Phelipanche spp., and Striga spp., which can be determined by request for an additional hourly fee.

3. Seed Count—\$10. Used to determine the number of seed per lb. or kg.

4. Seed Vigor Test—\$20. Including, but not limited to, accelerated aging and cool germination tests.

5. Varietal Purity—\$20. Including, but not limited to, seed and seedling morphology and fluorescence tests.

6. Red Rice Examination, 4 lb.—\$10; 8 lb.—\$20. Examination of rice sample for the presence of red rice.

7. Herbicide Bioassay—\$25.

8. Bulk Examination—Hourly Fee. Based on complexity of required examination. Examination conducted to determine the occurrence of particular components, including seeds of individual species or particles of specific inert matter (e.g. soil, ergot, sclerotia) in the sample.

9. Service Sample taken by LDAF Inspector—\$15. Sample taken in accordance with the AOSA or FSA seed sampling procedures.

10. Priority Rush Sample—\$25. A priority rush may be requested by the person submitting a sample for testing. Priority rush samples will be processed immediately upon receipt of sample; however, availability of sample results will depend upon the seed kind and the type of tests requested.

11. Hourly Fee—\$50. Applies to especially contaminated or extraordinary samples; also used for custom work such as sample preparation and special bulk samples. Total final cost to be negotiated and agreed upon by both parties prior to work being performed.

§515. Seed Sampling

A. Seed sampling will be performed at the request of the grower.

B. Except as provided by §515.D.2, official samples to determine eligibility for certification shall be drawn only after the seed is conditioned.

C. Sampling of Bagged Seed

1. Each lot of seed must be stacked so as to facilitate sampling.

2. A LDAF inspector will sample at random, by probing, a specific number of bags from each lot. The number of bags to be sampled from each lot is as follows: five bags, plus 10 percent of the total number, not to exceed 30 bags per lot. In lots containing six bags or less, every bag will be sampled.

D. Sampling of Bulk Seed**1. Cleaned Seed in Bulk**

a. A LDAF inspector will collect a minimum of four samples, at intervals of 4 feet, by probing the entire depth of the bin or storage area.

b. All samples will be blended into one representative sample for each bin or storage area.

2. Uncleaned Seed in Bulk

a. A LDAF inspector will collect a minimum of four samples, at intervals of 4 feet, by probing the entire depth of the bin or storage area. All samples will be blended into one representative sample for each bin or storage area.

b. A second representative sample will be drawn within 60 days after the first sample, after conditioning, for determining purity.

E. Analysis of samples shall be performed according to the current rules of the Association of Official Seed Analysts.

F. Resampling Policy

1. Except in special instances, as described below, only one sample shall be obtained from each certified lot.

a. When a certified seed lot fails certification requirements due to physical or mechanical purity factors, such as excess inert matter or weed seed, the seed may be reconditioned if the contaminants are separable. A complete purity analysis and germination test will be required on the reconditioned lot of seed. Certified seed rice which fails certification due to the presence of red rice seed in the sample shall be subject to the terms of Subparagraph e below.

b. Should a seed lot fail certified seed germination standards on the first laboratory test, a re-sample for germination test only for that seed lot will be permitted. Only one re-sample per seed lot will be permitted.

c. Whenever a certified seed lot is divided into sub-lots, both a purity and a germination test will be required for all sub-lots.

d. The last and most recent laboratory test report for a seed lot shall be the final analysis used to establish the eligibility for certification and will determine the information to be placed on the tag.

e. When a certified seed rice lot fails certification requirements due to the presence of one red rice seed in the original four pound sample, then a second 8 pound sample may be drawn from the lot. If one or more red rice seeds are found in the second sample, the lot will be disqualified on the basis of red rice content. If no red rice seed is found in the second sample, the lot would meet certification requirements. Certified seed rice whose original sample contains the presence of more than one red rice seed may not be re-sampled.

These seed lots shall meet the standards set forth in §143. Standards for Agricultural Seed.

6. Labels will be issued only for seed proven by laboratory analysis to meet required germination and purity standards.

7. The number of labels issued will be determined by the inspector's estimate of the quantity of seed at the time of sampling. All unused labels must be returned to LDAF.

Such labels can be pre-issued upon receipt of completed field inspection reports showing that field production standards have been met. The state may grant a waiver on the movement of seed if an acceptable preliminary test is made on the seed lot. If prelabeled lots fail laboratory analysis standards, all labels shall be destroyed or returned to the LDAF. Failure to comply with this regulation will result in suspension of future prelabeling privileges.

**Fields entered for certification must be isolated at least 600 feet from Sea Island cotton, red leaf cotton, or other cottons which vary greatly in plant characteristics from the variety entered for certification, and at least one-half mile from G. barbadense and interspecific hybrids involving G. barbadense.

B. Handling and Storage Requirements

1. **Ginning.** Cottonseed in all classes of certification, to be certified, shall be ginned on a thoroughly cleaned, one-variety gin approved by LDAF prior to ginning. With special permission of the Department of Agriculture and Forestry:

a. cottonseed for all classes of certification may be ginned on thoroughly cleaned, mixed variety gins either with:

i. a notarized ginner's agreement previously approved by LDAF, or

ii. in the presence of a LDAF inspector.

b. cottonseed produced for only the certified class may be ginned on a mixed-variety gin if a minimum of three bales are "blown" through the gin prior to catching of the cottonseed to be certified. An inspector of LDAF may be present if cottonseed for certification is ginned under special permission.

2. **Delinting.** Delinters must conform to the same requirements set forth for ginner's. No cottonseed entered for certification may be delinted outside the state of Louisiana except by special permission of LDAF.

§743. Hybrid Seed Corn Certification Standards

A. Eligibility Requirements. Hybrid corn may be one of the following.

1. *Single Cross*—the first generation hybrid between two inbred lines.

2. *Double Cross*—the first generation hybrid between two single crosses.

3. *Three-Way Cross*—a first generation hybrid between a single cross and an inbred line.

4. *Top Cross*—the first generation hybrid of a cross between an inbred line and an open-pollinated variety or the first generation hybrid between a single cross and an open-pollinated variety.

5. *Foundation Single Cross*—a single cross used in the production of a double cross, a three-way, or a top cross.

B. Field Inspection

1. Seed fields shall be inspected at least once prior to the pollination period for purity as to plant type. Any off-type or doubtful plants must be destroyed before they shed pollen.

2. At least three field inspections shall be made during the pollinating period, said inspections to be made without previous notification to the grower.

C. Field Standards

1. Unit of Certification. The entire acreage of any one specific commercial hybrid must be entered for certification.

2. Isolation Requirements. Fields in which commercial hybrid corn is being produced must be so located that the female parent is not less than 660 feet in all directions from other corn of a different kernel color or type (sweet, pop, flint, white, red, etc.).

3. Border Rows. When the kernel type and color of the corn in the contaminating field are the same as those of the parent in the crossing field, the isolation distance may be modified by the planting of border rows of the pollen parent. The following table indicates the minimum number of border rows required for fields of various sizes when located at different distances from other corn.

Minimum Distance from Other Corn	Field Size	
	1 to 20 acres	20 acres or more
Feet	(Minimum) Border Rows	
410	0	0
370	2	1
330	4	2
290	6	3
245	8	4
205	10	5
165	12	6
125	14	7
85	16	8
0		10

a. The above isolation requirements do not apply to crossing fields when the same male or pollen parent is used in each. In such cases the two fields must be clearly divided by use of an area not less than 14 feet or a natural boundary which is permanent and distinctive (e.g., ditch, road, headland, etc.).

4. Detasseling

a. A commercial hybrid will be disqualified for certification when 5 percent or more of the female seed parent plants have receptive silk:

i. if more than 1 percent of the female seed parent plants have shed pollen on one inspection; or

ii. if a total of 2 percent of the female seed parent plants have shed pollen on three inspections.

b. Sucker tassels, portions of tassels or tassels on main plants will be counted as shedding pollen when 2 inches or more of the central stem, the side branches, or a combination of the two have anthers extended from the glumes. In cases where a few silks are out and tassels of the seed parent have begun to shed pollen, the field can be approved by immediate and complete detasseling of the seed parent and removal of the ear shoots with exposed silks, if done to the satisfaction of LDAF.

§755. Sweet Potato Certification Standards (Virus and Non Virus-Tested)

A. The standards for certification of virus-tested and non virus-tested sweet potatoes are the general seed certification standards for roots, plants and cuttings as adopted in Subchapter B of this Part and the following specific standards.

B. The following definitions apply to this Section only.

Certified G0 Plant—a plant grown in a greenhouse and which has been produced by a certified greenhouse grower from a foundation plant.

Daughter Plant—a plant produced by cuttings from a mother plant.

Foundation Plant—a plant that has been produced by the LAES from a virus-tested nuclear stock plant recognized by LDAF if the plant is grown in a greenhouse under strict isolation in a screen cage in which only plants that are virus-tested are grown.

Mericlone—plants clonally propagated from a single meristem tip. For example, *mericlone* B-63 includes all plants descended from the sixty-third meristem-tip culture derived from the variety Beauregard.

Micropropagated—plant multiplication in vitro. The process includes many steps; stock plant care, explant selection and sterilization, media manipulation to obtain proliferation, rooting, acclimation, and growing on. Sweet potato is most commonly micropropagated in tissue culture by aseptic transfer of stem segments containing 1-3 nodes to sterile tissue culture medium.

Mini-Roots—storage roots produced on plants grown in certified G0 greenhouses that may be used to establish certified G2 field plantings.

Mother Plant—a plant obtained from LAES.

Nuclear Stock Plant—plant that is derived from Source Seed and which has been micropropagated, virus-tested, is apparently free of other pests, and has been evaluated in field test for trueness to variety.

Source Seed—material entering the LAES seed program obtained by methods acceptable to LDAF.

Symptomatic Plant—a plant that shows an indication or symptom of a disease, mutation, pest, virus, or other problem that may affect sweet potato production.

Vine Cutting—a section of a vine, preferably 10-12 inches in length, capable of being transplanted.

Virus-Tested—a plant that has been previously tested for the presence of viruses by grafting a sweet potato shoot to the Brazilian morning glory (*Ipomoea setosa*) on at least three separate occasions and by at least one negative assay by the DNA and PCR assay for sweet potato geminiviruses using the Li et al. method (Li, R., Salih, S., and Hurtt, S. 2004. Detection of geminiviruses in sweet potato by polymerase chain reaction. Plant Dis. 88:1347-1351).

C. Plant Generations

1. Mother plants may be cut repeatedly for no more than five months and the cuttings propagated to produce daughter plants.

2. Daughter plants may be cut repeatedly for no more than five months and the cuttings propagated to produce additional daughter plants. All daughter plants shall be designated as certified G0 and may be used to establish certified G1 field plantings.

3. All plants, vine cuttings and roots produced from mini-roots shall be designated as certified G2.

4. Certified G1 (field generation 1) plantings will be established from certified G0 plants. Vine cuttings may be taken repeatedly from this original G1 planting, to establish a second G1 planting. Vine cuttings may be taken repeatedly from the second G1 planting to establish a third G1 planting. No additional plantings may be established from this third G1 planting. All vine cuttings and roots produced during this first year of field production shall be designated as certified G1.

5. Certified G2 (field generation 2) plantings will be established from certified G1 stocks. Vine cuttings may be taken repeatedly from this original G2 planting, to establish a second G2 planting. Vine cuttings may be taken repeatedly from the second G2 planting, to establish a third G2 planting. No additional plantings may be established from this third G2 planting. All vine cuttings and roots produced during this second year of field production shall be designated as certified G2.

6. Certified G3 (field generation 3) plantings will be established from certified G2 stocks. Vine cuttings may be taken repeatedly from this original G3 planting, to establish a second G3 planting. Vine cuttings may be taken repeatedly from the second G3 planting to establish a third G3 planting. No additional plantings may be established from this third G3 planting. All vine cuttings and roots produced during this third year of field production shall be designated as certified G3.

D. Greenhouse Requirements for Certification of Virus-Tested Sweet Potatoes

1. LDAF must approve greenhouses before mother plants are released to the grower.

2. Mother plants grown in a greenhouse shall be kept isolated in screen cages.

3. Greenhouses used for production of mother plants shall meet the following requirements.

a. The entry points shall use a set of double doors.

b. A system for sanitizing hands and feet prior to entry into the growing areas of the greenhouse.

c. Yellow sticky traps shall be used to monitor aphids and other insects.

d. Screens of such mesh as to prevent entry of aphids shall cover all openings (vents, fans, windows, etc.).

e. A legible signs shall be prominently placed in front of every entrance to each greenhouse so as to be clearly visible by workers and other persons warning them that they shall not enter, if they are coming from the field or from non-certified greenhouses.

f. An integrated pest management program shall be in place to control aphids, whiteflies or other insects with sucking, mouthparts.

g. Cutting tools used in a greenhouse shall be decontaminated on a regular basis and shall always be decontaminated prior to being used on another group of stock plants or plant lots.

h. All growing medium, including benches, containers, etc. used in the greenhouse shall be cleaned by a method approved by LDAF.

i. All plants shall be removed from the greenhouse and the greenhouse kept free of plants for a minimum of six weeks between crop years.

j. No plants shall be allowed to grow within 10 feet of the greenhouse, except for turf grass used for stabilization of the soil.

k. No plants other than mother plants shall be allowed in the greenhouse.

l. Greenhouses shall be a minimum of 200 feet away from sweet potato storage sheds, cull piles or other potential sources of sweet potato viruses unless LDAF approves a closer distance.

m. Different varieties or mericlones must be clearly identified and separated.

4. Producer shall inspect vines twice weekly. If symptomatic plants are found, they shall be removed and destroyed and parent plants shall be inspected for disease symptoms. The grower shall keep a log showing that inspections were made and if plants were removed.

5. Producers shall inspect each greenhouse and its perimeter at least once weekly to ensure that the greenhouse isolation requirements are being met. LDAF shall be

immediately notified if an inspection indicates that one or more of the isolation requirements have been breached.

6. LDAF shall inspect certified greenhouses at least once prior to cuttings going to the field and as needed if problems are observed. If symptomatic plants are found during these inspections the grower must rogue and dispose of these plants properly.

7. Once shipping of plants begins, final certification will not be allowed if symptomatic plants are found.

8. A unit of certification shall be the entire greenhouse and such unit cannot be divided for the purpose for certification.

3. Source of registered stock is limited to plantlets produced through tissue culture of foundation material or the second ratoon. Stock that meets all standards except insect and/or weeds standards be maintained in the program as seed increase fields only, but may not be marketed to producers. Such stocks are eligible for re-certification once they come in compliance with applicable regulations.

4. Source of certified stock is limited to:

- a. three consecutive years from planting of registered stock; and
- b. two consecutive harvests of certified stock.

B. Greenhouse Requirements

1. Foundation plants and plantlets shall be kept in certified greenhouses.

2. Certified greenhouses shall comply with the following requirements:

a. all sugarcane plants within the certified greenhouse must have been processed through the LSUAC sugarcane quarantine program;

b. greenhouses shall be clearly marked to warn workers that they shall not enter if they are coming from the field or from other non-certified greenhouses;

c. doors shall be kept locked when the greenhouse is not in use;

d. sticky traps or other monitoring devices shall be used to monitor aphids and other insects;

h. different varieties must be clearly identified and separated.

3. Foundation stock shall be tested on a yearly basis for sugarcane ratoon stunting disease (RSD) and sugarcane yellowleaf virus.

a. Tissue sample testing and protocol shall be provided by the LSU Ag Center Sugarcane Disease Detection Lab. The certifier shall provide to LDAF verification that foundation stock has been tested for sugarcane ratoon stunting disease (RSD) and sugarcane yellowleaf virus.

4. LDAF must approve greenhouses before foundation plants can be entered into the certification program.

5. Inspections

a. Producer shall inspect and/or sample the greenhouse on a regular basis for harmful diseases and insects. If symptomatic plants are found either visually or by sample test results, they will be removed and destroyed. The grower will keep a log showing that inspections were made and if plants were removed.

b. If problems are observed during these inspections the producer should notify LDAF.

c. LDAF may inspect certified greenhouses several times during the year as needed. If symptomatic plants are found during these inspections they must be rogued and disposed of properly.

C. Field Inspections and Sampling

1. At least three field inspections by LDAF inspectors shall be made each year to determine if certified seedcane is being produced that apparently meets field standards.

2. The second inspection to be conducted in June by LDAF inspectors will include the collection of leaf samples for the detection of Sugarcane Yellow Leaf Virus.

3. Individual fields shall be sampled by LDAF inspectors for the detection of Sugarcane Yellow Leaf Virus according to the following guidelines.

Subchapter H. Sampling, Testing, Remediation, and Destruction

§1335. THC Sampling and Testing

A. All industrial hemp plants or plant parts, whether harvested or unharvested, shall be subject to sampling and testing for THC levels by LDAF as set forth in this Section.

B. The licensee shall be responsible for the cost of all sample testing fees, as set forth in this Chapter.

C. Sample Collection

1. Licensees shall submit a Harvest Report for each field, greenhouse or indoor growing structure to LDAF prior to harvesting any industrial hemp plants.

2. LDAF will attempt to notify the licensee of the date and approximate time when samples will be collected.

3. The licensee or designated responsible party shall be present during the sample collection.

4. LDAF will collect samples from each plot within any field, greenhouse, or indoor growing structure.

5. LDAF may retain and transport samples of industrial hemp plants and plant parts collected from an industrial hemp licensee as required by the Industrial Hemp Law (R.S. 3:1461 et seq.) and this Chapter.

6. All samples collected by LDAF become the property of the LDAF and are non-returnable. No compensation shall be owed by LDAF for samples collected under this Chapter.

7. The licensee shall not harvest industrial hemp plants or plant parts prior to samples being collected by LDAF.

8. The licensee shall harvest industrial hemp plants or plant parts within 30 days of the sample collection by LDAF, unless an exception is authorized in writing by LDAF. Should a licensee fail to complete harvest within 30 days and no exception was authorized by LDAF, a second sample and test of the plot shall be performed and the licensee shall be assessed an additional testing fee per sample in an amount not to exceed \$250 per sample.

D. Performance-based Sampling

1. Industrial hemp lots produced for research purposes may not be subject to sampling and testing requirements outlined in this Section when all of the following requirements are met:

a. LDAF has a confidence level that 95 percent of the industrial hemp plants in each lot subject to alternate method will not test above the acceptable industrial hemp THC level;

b. no industrial hemp will enter the stream of commerce;

c. the research institution has submitted and received written approval of an industrial hemp research plan from LDAF;

d. the research institution maintains records documenting the strain or variety's compliance with the acceptable industrial hemp THC level.

2. LDAF may inspect, sample, and test any industrial hemp plants or plant parts, at any time to ensure compliance with this Chapter.

3. LDAF shall conduct random inspections, including records reviews on research institutions, regardless of whether or not they are subject to the sampling and testing requirements.

E. Laboratory Testing

1. Quantitative determination of THC levels measured using liquid chromatography with ultraviolet detection (LC-UV) or mass spectral detection if required by matrix interference (LC/MS/MS) shall be the accepted analytical technique to avoid the risk of incomplete decarboxylation, therefore, removing the need for any post-decarboxylation.

2. The testing methodology shall consider the potential conversion of THC-A in industrial hemp into THC and the test result shall measure the total available THC derived from the sum of the THC and THC-A content. Appropriately, the THC-A result will be modified by the molecular weight conversion factor 0.877 prior to summation with THC. The total THC concentration level shall be reported on a dry weight basis.

3. Analytical testing for purposes of detecting the concentration levels of THC shall meet the following standards:

a. laboratory quality assurance must ensure the validity and reliability of test results;

b. analytical method selection, validation, and verification must ensure that the testing method used is appropriate (fit for purpose), and that the laboratory can successfully perform the testing;

c. the demonstration of testing validity must ensure consistent, accurate analytical performance;

d. method performance specifications must ensure analytical tests are sufficiently sensitive for the purposes of detectability requirements of this Chapter;

e. an effective disposal procedure in accordance with DEA regulations for samples of industrial hemp plants and industrial hemp plant parts that do not meet the requirements of R.S. 3:1461 et seq. or this Chapter.

f. the measurement of uncertainty shall be estimated and reported with the results.

5. The results of the THC analysis shall be reported to the licensee and, if tested by an approved third party laboratory, to LDAF.

6. A notification of analysis shall be issued for samples with a THC concentration that do not exceed the acceptable industrial hemp THC level and no further action shall be required. The plot or harvested plant material from which the sample was obtained shall be released for marketing or further processing.

7. A notification of analysis shall be issued for samples that exceed the acceptable industrial hemp THC level and a licensee may request a resample of any harvested cannabis that has undergone remediation as set forth in §1337 of this Chapter. If no request is made within 10 calendar days of the sample results being reported to the licensee, or the retested sample results exceed the acceptable industrial hemp THC level, then the plot or harvested plant material from which the sample was taken shall be subject to destruction as set forth in §1337.

8. A notification of analysis for official LDAF collected samples shall not be released until the licensee has submitted a valid FSA 578 form to LDAF for the lot represented by the sample.

9. No industrial plants or plant parts for which a THC analysis is pending shall be transferred, transported, sold, marketed, or otherwise disposed of until approved by LDAF.

B. Producers may choose to remediate any non-compliant industrial hemp plants by one of the following methods:

1. removing and destroying all flower material, while retaining stalk, stems, leaf material, and seeds; or

2. shredding the entire plant into a biomass-like material.

C. All remediated industrial hemp plants or plant parts shall be resampled and tested for THC concentration levels, and shall comply with the acceptable industrial hemp THC level.

Washed and packed sweet potatoes shall be completely enclosed with nylon, fiberglass, plastic or other synthetic screen material immediately following packing and must remain enclosed until shipment. The screen mesh must be of a size sufficient to prevent entry of sweetpotato weevil and shall be free from tears, rips and holes. Fumigated, screened sweet potatoes awaiting shipment shall be labeled with the dates of fumigation.

7. Trucks or other vehicles used to ship fumigated sweet potatoes from sweetpotato weevil infested areas or properties or premises shall be cleaned of all sweet potatoes, parts, and any other regulated materials prior to hauling fumigated sweet potatoes. A. All persons who know of or suspect an infestation or infection of any bees or regulated articles with any disease or pest shall immediately report such information to the department.

B. All colonies of bees infected with American foulbrood shall be destroyed by burning the frames, bees and combs in the presence of or by an agent or specialist of the department. Hive bodies and top and bottom boards saved from infected colonies shall be moved from the yard during the burning process or by a time prescribed by agents of the department and are to be scorched or properly treated to remove possible sources of reinfestation before re-use. Failure to adhere to this requirement shall result in destruction of all infected equipment including hive bodies, top and bottom boards.

C. Nuclei exposed to American foulbrood infection by the transfer of combs with brood or bees from an infected colony or yard shall be destroyed by burning.

D. If any apiary or yard of bees has 4 percent or less American foulbrood infestation, as noted below, the infected colony(ies) shall be burned immediately and a stop order issued. This shall mean that a second inspection shall be made within 21-30 days to insure control of the disease. Where a second inspection is required, colonies shall not be moved except under special permit issued by the state entomologist.

If after 21-30 days an inspection shows that the apiary or yard is found free from American foulbrood infestation, the quarantine shall be lifted. However, if American foulbrood is again found, an additional 21-30 day quarantine period shall be enforced and infested colonies shall be burned immediately. An additional 60-day quarantine shall be enforced on any quarantined apiary or yard found to be treated with drugs to mask the infection.

E. All colonies of bees found infected with European foulbrood shall be requeened or treated within 30 days after infection is found. European foulbrood found in excess of 4 percent upon second inspection shall be quarantined until the disease is under control.

F. All other bee diseases and/or pests found that are considered detrimental to the honeybee industry shall be treated as prescribed by the state entomologist or his designee for the control of same. Bees or regulated articles infested with any pest or infected with any disease shall be subject to being placed under a quarantine and treated as determined by the commissioner and state entomologist.

If the report is not filed and payment made within 30 days after the date due, a penalty of 25 percent of the amount due shall be assessed against the registrant. If payment is not made within 30 days after the due date, the amount of fees due, plus the penalty, shall constitute a debt and become the basis of a judgment against the registrant. All information as to the amount of feed sold and business practices of the registrant obtained from tonnage reports or from inspection of records and books shall remain confidential and shall not be revealed by the commissioner or his employees to the public or to any other person.

E. The inspection fee shall be collected only once on each lot of ingredients. To achieve this end, the following provisions shall apply.

1. No fee shall be paid on a commercial feed if a previous manufacturer has paid the fee.
2. No fee shall be paid on customer-formula feeds if the inspection fee has been paid on the commercial feeds, which are used as ingredients therein.

§123. Deficiency Assessments and Penalties

A. For the purpose of assessing penalties for protein deficiencies in feeds, as provided for in R.S. 3:1400(A)(1), the value of crude protein will be updated each quarter.

B. The value of crude protein will be calculated as follows:

1. The quarterly average price of four feedstuff protein sources shall be used. These are 46.5-48 percent soybean meal, 41 percent cottonseed meal, 60 percent corn gluten meal, and 46-50 percent meat and bone meal from ruminant and porcine sources. The average price will be determined using the Monthly National Grain and Oilseed Processor Feedstuff Report and the Monthly National Animal By-Product Feedstuff Report, published by the United States Department of Agriculture, Agriculture Market Service, AMS Livestock, Poultry and Grain Market News. The average value for each month of the preceding quarter will be used for calculation purposes.

C. For all other guarantees, a deficiency assessment of ten percent of the retail purchase price of the feed if the deficiency or excess, where applicable, is greater than ten percent of the guarantee.

D. Penalties shall be assessed as provided for in R.S. 3:1400. If an official sample shows that feed ingredients bought by a feed manufacturer is deficient, any penalties from this deficiency shall be paid by the supplier of the ingredients to the manufacturer that bought the ingredients.

Subchapter B. Pet Food

§125. Definitions and Terms

Immediate Container—the unit, can, box, tin, bag or other receptacle or covering in which a pet food is displayed for sale to retail purchasers, but does not include containers used as shipping containers.

Ingredient Statements—a collective and contiguous listing on the label of the ingredients of which the pet food is composed.

Principal Display Panel—the part of a label that is most likely to be displayed, presented, shown or examined under normal and customary conditions of display for retail sale.

NOTE: The commission adopts all definitions of R.S. 3:1391 and those that appear in §101.F of the official feed rules and regulations.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:1392.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Feed Commission, LR 11:224 (March 1985).

§127. Label Format and Labeling

A. The statement of net content and product name must be shown on the principal display panel. All other required information may be placed elsewhere on the label but shall be sufficiently conspicuous as to render it easily read by the average purchaser under ordinary conditions of purchase and sale.

B. The declaration of the net content shall be made in conformity with the United States *Fair Packaging and Labeling Act* and the regulations promulgated thereunder.

C. The information which is required to appear in the *Guaranteed Analysis* shall be listed in the following order:

1. crude protein (minimum amount);
2. crude fat (minimum amount);
3. crude fiber (maximum amount);
4. moisture (maximum amount);
5. additional guarantees shall follow moisture.

D. The label of a pet food shall specify the name and address of the manufacturer, packer or distributor of the pet food. The statement of the place of business should include the street address, if any, of such place.

E. If a person manufactures, packages or distributes a pet food in a place other than his principal place of business, the label may state the principal place of business in lieu of the actual place where each package of such pet food was manufactured or packaged or is to be distributed, if such statement is not misleading in any particular.

F. A vignette, graphic or pictorial representation of a product on a pet food label shall not misrepresent the contents of the package.

G. The use of the word *proven* in connection with label claims for a pet food is improper unless scientific or other empirical evidence establishing the claim represented as *proven* is available.

H. No statement shall appear upon the label of a pet food which makes false or misleading comparisons between that pet food and any other pet food.

I. Personal or commercial endorsements are permitted on pet food labels where said endorsements are factual and not otherwise misleading.

J. When a pet food is enclosed in any outer container or wrapper which is intended for retail sale, all required label information must appear on such outside container or wrapper.

K. The words *dog food*, *cat food* or similar designations must appear conspicuously upon the principal display panels of the pet food labels.

L. The label of a pet food shall not contain an unqualified representation or claim, directly or indirectly, that the pet food therein contained or a recommended feeding thereof, is or meets the requisites of a complete, perfect, scientific or balanced ration for dogs or cats unless such product or feeding:

1. contains ingredients in quantities sufficient to provide the estimated nutrient requirements for all stages of the life of a dog or cat, as the case may be, which have been established by a recognized authority on animal nutrition, such as the Committee on Animal Nutrition of the National Research Council of the National Academy of Sciences (to the extent that the product's ingredients provide nutrients in amounts which substantially deviate from those nutrient requirements estimated by such a recognized authority on animal nutrition, or in the event that no estimation has been made by a recognized authority on animal nutrition of the requirements of animals for one or more stages of said animals' lives, the product's represented capabilities in this regard must have been demonstrated by adequate testing); or

2. contains a combination of ingredients which when fed to a normal animal as the only source of nourishment will provide satisfactorily for fertility of females, gestation and lactation, normal growth from weaning to maturity without supplementary feeding, will maintain the normal weight of an adult animal whether working or at rest and has had its capabilities in this regard demonstrated by adequate testing.

M. Labels for products which are compounded for or which are suitable for only a limited purpose (i. e., a product designed for the feeding of puppies) may contain representations that said pet food product or recommended feeding thereof, is or meets the requisites of a complete, perfect, scientific or balanced ration for dogs or cats only:

1. in conjunction with a statement of a limited purpose for which the product is intended or suitable (as, for example, in the statement a *complete food for puppies*). Such representations and such required qualification therefor shall be juxtaposed on the same panel and in the same size, style and color print; and

2. such qualified representations may appear on pet food labels only if:

- a. the pet food contains ingredients in quantities sufficient to satisfy the estimated nutrient requirements established by a recognized authority on animal nutrition, such as the Committee on Animal Nutrition of the National Research Council of the National Academy of Sciences for such limited or qualified purpose; or

- b. the pet food product contains a combination of ingredients which when fed for such limited purpose will satisfy the nutrient requirements for such limited purpose and has had its capabilities in this regard demonstrated by adequate testing.

N. Except as specified by §129.A, the name of any ingredient which appears on the label other than in the product name shall not be given undue emphasis so as to create the impression that such an ingredient is present in the product in a larger amount than is the fact, and if the names of more than one such ingredient are shown, they shall appear in the order of their respective predominance by weight in the product.

O. The label of a dog or cat food (other than one prominently identified as a snack or treat as part of the designation required upon the principal display panel under §127.K) shall bear, on either the principal display panel or the information panel (as those terms are defined in 21 C.F.R. 501.1 and 501.2 respectively), in type of a size reasonably related to the largest type on the panel, a statement of the nutritional adequacy or purpose of the product. Such statement shall consist of one of the following:

1. a claim that the pet food meets or exceeds the requirements of one or more of the recognized categories of nutritional adequacy, gestation, lactation, growth, maintenance and complete for all life stages, as those categories are set forth in §127.L and M;

2. a nutrition or dietary claim for purposes other than those listed in §127.L and M if the claim is scientifically substantiated;

3. the statement: *Use only as directed by your veterinarian*, if it is a dietary animal food product intended for use by, or under the supervision or direction of, a veterinarian;

4. the statement: *This product is intended for intermittent or supplemental feeding only*, if a product does not meet either the requirements of §127.L and M or any other special nutritional or dietary need and so is suitable only for limited or intermittent or supplementary feeding.

P. If the pet food is manufactured with raw milk or raw milk products:

1. The express words “WARNING: NOT FOR HUMAN CONSUMPTION – THIS PRODUCT HAS NOT BEEN PASTEURIZED AND MAY CONTAIN HARMFUL BACTERIA,” shall be displayed in a conspicuous manner and shall not be smaller than the height of the minimum form required by the Federal Fair Packaging and Labeling Act for the net quantity statement in the table below:

Panel Size		Minimum Warning Statement Type Size
≤ 5 in.2	----	1/16 in.
> 5 - ≤ 25 in.2	----	1/8 in.
> 25 - ≤ 100 in.2	----	3/16 in.
> 100 - ≤ 400 in.2	----	1/4 in.
> 400 in.2	----	1/2 in.

2. When pet food or specialty pet food consists of raw milk, the words, “Raw (BLANK) Milk” shall appear conspicuously on the principal display panel. “BLANK” is to be completed by using the species of animal from which the raw milk is collected.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:1392, 1393, and 1394.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Feed Commission, LR 11:224 (March 1985), amended by the Department of Agriculture and Forestry, Office of Animal Health and Food Safety and Agricultural Chemistry and Seed Commission, LR 51:649 (May 2025), repromulgated LR 51:769 (June 2025).

§129. Brand and Product Names

A. No flavor designation shall be used on a pet food label unless the designated flavor is detectable by a recognized test method or is one the presence of which provides a characteristic distinguishable by the pet. Any flavor designation on a pet food label must either conform to the name of its source as shown in the ingredient statement or the ingredient statement shall show the source of the flavor. The word flavor shall be printed in the same size type and with an equal degree of conspicuousness as the ingredient term(s) from which the flavor designation is derived.

1. Distributors of pet food employing such flavor designation or claims on the labels of the product distributed by them shall, upon request, supply verification of the designated or claimed flavor to the appropriate control official.

B. The designation *100 percent* or *all* or words of similar connotation shall not be used in the brand or product name of a pet food if it contains more than one ingredient. However, for the purpose of this provision, water sufficient for processing, required decharacterizing agents and trace

amounts of preservatives and condiments shall not be considered ingredients.

C. The term *meat* and *meat by-products* shall be qualified to designate the animal from which the meat and meat by-products are derived unless the meat and meat by-products are from cattle, swine, sheep and goats. For example, *horse-meat* and *horse-meat by-products*.

D. The name of the pet food shall not be derived from one or more ingredients of a mixture of a pet food product unless all components or ingredients are included in the name except as specified by §129.A, E, or F; provided that the name of an ingredient or combination of ingredients may be used as a part of the product name if:

1. the ingredient or combination of ingredients is present in sufficient quantity to impart a distinctive characteristic to the product or is present in amounts which have a material bearing upon the price of the product or upon acceptance of the product by the purchaser thereof; or

2. it does not constitute a representation that the ingredient or combination of ingredients is present to the exclusion of other ingredients; or

3. it is not otherwise false or misleading.

E. When an ingredient or a combination of ingredients derived from animals, poultry or fish constitutes 95 percent or more of the total weight of all ingredients of a pet food mixture, the name or names of such ingredient(s) may form a part of the product name of the pet food; provided that where more than one ingredient is part of such product name, then all such ingredient names shall be in the same size, style and color print. For the purpose of this provision, water sufficient for processing shall be excluded when calculating the percentage of the named ingredient(s). However, such named ingredient(s) shall constitute at least 70 percent of the total product.

F. When an ingredient or a combination of ingredients derived from animals, poultry or fish constitutes at least 25 percent but less than 95 percent of the total weight of all ingredients of a pet food mixture, the name or names of such ingredient or ingredients may form a part of the product name of the pet food only if the product name also includes a primary descriptive term such as *meatballs* or *fish cakes* so that the product name describes the contents of the product in accordance with an established law, custom or usage or so that the product name is not misleading. All such ingredient names and the primary descriptive term shall be in the same size, style and color print. For the purpose of this provision, water sufficient for processing shall be excluded when calculating the percentage of the named ingredient(s). However, such named ingredient(s) shall constitute at least 10 percent of the total product.

G. Contractions or coined names referring to ingredients shall not be used in the brand name of a pet food unless it is in compliance with §129.A, D, E, or F.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:1392, 1393, and 1394.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Feed Commission, LR 11:225 (March 1985).

§131. Expression of Guarantees

A. The sliding scale method of expressing a guaranteed analysis (for example, *protein 15-18 percent*) is prohibited.

B. Pursuant to R.S. 3:1394(A)(3), the label of a pet food which is formulated as and represented to be a mineral additive supplement, shall include in the guaranteed analysis the maximum and minimum percentages of calcium, the minimum percentage of phosphorus and the maximum and minimum percentages of salt. The minimum content of all other essential nutrient elements recognized by NRC from sources declared in the ingredient statement shall be expressed as the element and in units of measurement established by a recognized authority of animal nutrition, such as the National Research Council.

C. Pursuant to R.S. 3:1394 (A)(3), the label of pet food which is formulated as and represented to be a vitamin supplement, shall include a guarantee of the minimum content of each vitamin declared in the ingredient statement. Such guarantees shall be stated in units of measurements established by a recognized authority on animal nutrition such as the National Research Council.

D. The vitamin potency of pet food products distributed in containers smaller than one pound may be guaranteed in approved units per ounce.

E. If the label of a pet food does not represent the pet food to be either a vitamin or a mineral supplement, but does include a table of comparison of a typical analysis of the vitamin, mineral or nutrient content of the pet food with levels recommended by recognized animal nutrition authority, such comparison may be stated in the units of measurement used by the recognized authority on animal nutrition such as the National Research Council. The statement in a table of comparison of the vitamin, mineral or nutrient content shall constitute a guarantee, but need not be repeated in the guaranteed analysis. Such table of comparison may appear on the label separate and apart from the guaranteed analysis.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Feed Commission, LR 11:226 (March 1985), amended by the Department of Agriculture and Forestry, Feed, Fertilizer, and Agricultural Liming Commission, LR 38:2525 (October 2012).

§133. Ingredients

A. The maximum moisture in all pet foods shall be guaranteed and shall not exceed 78 percent or the natural moisture content of the constituent ingredients of the product, whichever is greater. Pet foods such as those consisting principally of stew, gravy, sauce, broth, juice or a milk replacer which are so labeled, may contain moisture in excess of 78 percent.

B. Each ingredient of the pet food shall be listed in the ingredient statement, and names of all ingredients in the ingredient statement must be shown in letters or type of the same size. The failure to list the ingredients of a pet food in descending order by their predominance by weight in

nonquantitative terms may be misleading. Any ingredient for which the Association of American Feed Control Officials has established a name and definition shall be identified by the name so established. Any ingredient for which no name and definition has been so established shall be identified by the common or usual name of the ingredient. Brand or trade names shall not be used in the ingredient statement.

C. The term *dehydrated* may precede the name of any ingredient in the ingredient list that has been artificially dried.

D. No reference to quality or grade of an ingredient shall appear in the ingredient statement of a pet food.

E. A reference to the quality, nature, form or other attribute of an ingredient shall not be made unless such designation is accurate and unless the ingredient imparts a distinctive characteristic to the pet food because it possesses that attribute.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:1392, 1393, and 1394.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Feed Commission, LR 11:226 (March 1985).

§135. Drugs and Pet Food Additives

A. An artificial color may be used in a pet food only if it has been shown to be harmless to pets. The permanent or provisional listing of an artificial color in the United States Food and Drug Regulations as safe for use, together with the conditions, limitations and tolerance, if any, incorporated therein, shall be deemed to be satisfactory evidence that the color is, when used pursuant to such regulations, harmless to pets.

B. Prior to approval of a registration application and/or approval of a label for pet food, which contains additives, (including drugs, other special purpose additives, or non-nutritive additives) the distributor may be required to submit evidence to prove the safety and efficacy of the pet food, when used according to directions furnished on the label. Satisfactory evidence of the safety and efficacy of a pet food may be:

1. when the pet food contains such additives, the use of which conforms to the requirements of the applicable regulation in the *Code of Federal Regulations*, Title 21, or which are *prior sanctioned* or *generally recognized as safe* for such use; or

2. when the pet food itself is a drug as defined in R.S. 3:1391(3) and is generally recognized as safe and effective for label use or is marketed subject to an application approved by the Food and Drug Administration under Title 21, U.S.C. 360(b).

C. The medicated labeling format recommended by Association of American Feed Control Officials shall be used to assure that adequate labeling is provided.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:1392 and R.S. 3:1394.

HISTORICAL NOTE: Promulgated by the Department of Agriculture, Feed Commission, LR 11:226 (March 1985), amended by the Department of Agriculture and Forestry, Feed, Fertilizer, and Agricultural Liming Commission, LR 38:2525 (October 2012).

4. any filthy, putrid, or decomposed substance, causing the material to be unfit for pet food.

B. Pet Food may be considered adulterated if:

1. the manufacture, processing, packaging, distribution, or use does not comply with the requirements of Title 21, Code of Federal Regulations, Part 507, Subparts A, B, C, E, and F where applicable; or
2. it is, in whole or in part, the product of a diseased animal or of an animal or of an animal which has died otherwise than by slaughter which is unsafe within the meaning of Section 402(a)(1) or (2) of the Federal Food, Drug, and Cosmetic Act.

C. All screenings or by-products of grains and seeds containing weed seeds, when used in commercial feed or sold as such to the ultimate consumer, shall be ground fine enough or otherwise treated to destroy the viability of such weed seeds so that the finished product contains no more than four viable prohibited weed seeds per pound and not more than 200 viable restricted weed seeds per pound.

D. If a registrant had no sales in a given quarter, he must still file a tonnage report and pay a minimum tonnage fee of

\$10 for that quarter. A registrant shall keep all records necessary to accurately indicate the tonnage and kind of pet food sold and shall permit the commissioner or his authorized representative to examine these records and to verify the statement of tonnage. Tonnage reports shall be made on forms supplied by the commissioner and suitable for providing the necessary tonnage and statistical information. The tonnage reports and inspection fees shall be due and payable on the first day of October, the first day of January, the first day of April and the first day of July. If the report is not filed and payment made within 30 days after the date due, a penalty of 25 percent of the amount due shall be assessed against the registrant. If payment is not made within 30 days after the due date, the amount of fees due, plus the penalty, shall constitute a debt and become the basis of a judgment against the registrant. B. The value of crude protein in pet food will be calculated as follows.

1. The quarterly average price of four feedstuff protein sources shall be used. These are 46.5-48 percent soybean meal, 41 percent cottonseed meal, 60 percent corn gluten meal, and 46-50 percent meat and bone meal from ruminant and porcine sources. The average price will be determined using the Monthly National Grain and Oilseed

B. Any person seeking or receiving registration of any processed animal waste product shall test, by representative sampling and assaying of such samples and keep accurate records thereof, the processed animal waste product for which the registration is sought or received. The sample shall be of sufficient size so as to provide meaningful data, statistically reliable in carrying out the purpose of such sampling and analysis. For example, 10 1-pound samples taken randomly from one day's production run or other identifiable lot, should be packaged in sealed air-tight bags for prompt shipment to the analytical laboratory.

C. The registrant, manufacturer or producer of any such processed animal waste product ingredient shall conform to the following sample and analyses requirements.

1. Analyses specified by the commissioner to meet the requirements of the quality standards of §143 and R.S. 3:1396 and these regulations shall be conducted on three sequential production runs to establish that the feed ingredient is consistently within the limitations specified prior to registration and/or sale of the processed animal waste product. In addition to quality standards, testing on the same production runs or lots should include potential hazardous substances such as the following:

- a. drugs suspected or known to be used in the feed or as a therapeutic treatment of the animals;
- b. pesticides used on the animal, facilities and waste for pest control;

Less frequent testing may be allowed where the analytical results show continued uniformity and a consistent margin of compliance. More frequent tests shall be required where the analytical results show a wide range, or show levels close to the established quality standards. Any processed animal waste product that does not meet quality standards for the product shall be further processed until standards are met, shall be diverted to non-feed uses, or destroyed.

3. Sequential testing shall again be required when the periodic analyses required by §149.C.2 of this Section or other information available to the manufacturer of the ingredient indicates that:

- a. the ingredients are not within the limitations established in these regulations;
- b. changes are made in the manufacturing process;
- c. new or expanded sources of the raw ingredients are used;

1.a. Heifers 4 to 12 months of age, are to be official *Brucellosis* calfhood vaccinates prior to being sold or be vaccinated at the first point of sale but in no case shall any heifer 4 to 12 months of age remain unvaccinated for *Brucellosis* more than 15 days after the date of sale. Exceptions to this paragraph are:

- i. heifers sold to move directly to slaughter;
- ii. heifers sold to be moved directly to a quarantine feed lot;
- iii. heifers which are transported out of Louisiana within 15 days of the date of their sale.

b. Any person found in violation of Subparagraph 1.a of this regulation shall be fined no less than \$1,000 or more than \$5,000 for each count. Each nonvaccinated heifer shall be considered a separate violation and each day on

which the violation occurs shall be considered a separate count.

2. Effective while Louisiana is officially classified as *Brucellosis* class B in the *Code of Federal Regulations* by the USDA Animal and Plant Health Inspection Service, Veterinary Services, all heifers and cows over 12 months of age must originate from a herd not quarantined for *Brucellosis* and must be official *Brucellosis* vaccinates (calfhood or adult) or part of a herd that has had a complete negative *Brucellosis* test, conducted within the previous 12 months and be tested negative for *Brucellosis* 30 days prior to, or at the time of, being sold or purchased. Exceptions to this Paragraph are:

**§719. Sale and Use of *Brucella abortus* Antigen
(Formerly §315)**

A. The sale of *Brucella* antigen, manufactured for the purpose of detecting *Brucellosis* in food producing animals, shall be restricted, in Louisiana, to either the Department of Agriculture and Forestry, Livestock Sanitary Board or the USDA Animal and Plant Health Inspection Service, Veterinary Services.

B.1. The use of *Brucella* antigen manufactured for the purpose of detecting *Brucellosis* in food producing animals is restricted, in Louisiana, to authorized accredited veterinarians; authorized employees of the Department of Agriculture and Forestry, Livestock Sanitary Board; authorized employees of the USDA, Animal and Plant Health Inspection Service, Veterinary Services, and research projects approved by the state veterinarian.

2. It is a violation of the regulation for anyone other than authorized individuals to use and/or possess *Brucella* antigen. Accredited veterinarians; employees of the Department of Agriculture and Forestry, Livestock Sanitary Board; and employees of USDA Animal and Plant Health Inspection Service, Veterinary Services, are considered authorized to use *Brucella abortus* antigen to conduct a *Brucellosis* test only when proper documentation of the test (VS Form 4-33) and all blood samples are submitted to the state/federal laboratory.

to the *Brucellosis* Test

A. All cattle showing a positive reaction to the *Brucellosis* test shall be immediately branded on the left jaw with a hot B brand no less than 3 inches in height. In addition, a reactor tag shall be placed in the left ear. (Reactors should be slaughtered as soon as possible; however, slaughter may be delayed for 45 days after the date of test provided the animals have been identified and branded and separated from the remainder of the herd. A 45-day delay in slaughter of *Brucellosis* reactors nullifies owner's eligibility for federal indemnity which requires slaughter within 15 days from the date the animal is tagged and branded as a reactive.)

B. All *Brucellosis* reactors moving from the quarantined premises must be accompanied by Form VS 1-27. These movements shall be limited to slaughter establishments specifically approved to handle *Brucellosis* reactors or to approved livestock auction markets to be offered for sale specifically approved slaughter establishments only.

**§723. Sale and Use of *Brucella abortus* Vaccine
(Formerly §319)**

A. The sale and use of *Brucella abortus* vaccine shall be restricted to Louisiana accredited veterinarians and to Livestock Sanitary Board approved non-veterinary personnel who administer the vaccine under the supervision of state-federal veterinarians.

B. Biological supply houses and their distributors are hereby required to send to the Livestock Sanitary Board a copy of the invoices on all shipments of *Brucella abortus* vaccine into and within, the state of Louisiana.

C. Veterinarians, drug stores, biological houses, and all other wholesale and retail distributors of *Brucella abortus* vaccine, who sell *Brucella abortus* vaccine to persons other than Louisiana accredited veterinarians, shall be prosecuted as prescribed by state law.

D. *Brucella abortus* vaccine will be administered in accordance with the method approved by the United States Department of Agriculture.

E. All heifer calves between 4 and 12 months of age must be official *Brucellosis* calfhood vaccinated, prior to being sold.

F. Adult Vaccination of Cattle

1. Adult vaccination of female cattle 12 months old or older, for *Brucellosis*, may be performed on an individual herd plan by state or federal veterinarians, provided the owner signs the official agreement to comply with the following provisions:

a. test of entire herd and removal of *Brucellosis* reactors with *Brucellosis* vaccination completed within 10 days following herd test and removal of *Brucellosis* reactors;

b. all animals vaccinated as adults will be identified with an official AV tattoo in the right ear, preceded by the quarter of the year and followed by the last digit of the year, as well as the official metal ear tag (or individual animal registration tattoo or individual animal registration brand) and plastic bangle tag, which are to be correlated on test records with the official ear tag;

c. animals so vaccinated will be quarantined and tested on the schedule established in the herd plan. The quarantine will be released when the herd has a negative test, at least 180 days after the last reactor is removed from the herd. Exceptions to this regulation are steers and spayed heifers over 6 months of age.

2. Guidelines to conduct a referendum which would make *Brucellosis* testing and *Brucellosis* vaccination of all adult cows mandatory on a parish-wide basis.

The referendum will be held within 90 days after issuance of the call for the referendum. All producers of cattle in the affected area shall be eligible to participate in the referendum.

b. The referendum would give all producers of cattle in the parish an opportunity to vote for or against the referendum, which would require all cattle to be tested for *Brucellosis* and any herd which has one or more reactors, on more than one herd test, would have to be adult vaccinated for *Brucellosis* and tested according to the herd plan and adult vaccination agreement. In the absence of a herd plan,

the herd would have to be tested at intervals of 180 days or less.

c. If a majority of the eligible cattle producers vote in favor of the referendum, all producers of cattle in the area shall be required to test all their cattle and adult vaccinate any infected herds as described in §723.F.1.

d. The following herds would be exempt from the testing requirements:

i. certified *Brucellosis* free herds; and

§725. Establishing the Official Tests for *Brucellosis* in Cattle (Formerly §321)

A. Screening Test

1. Milk Ring Test (BRT). This test is conducted by the state-federal laboratory on a composite sample of milk collected at dairy farms. A follow-up individual serological test shall be conducted on all cattle represented in a composite sample which reacts to the test.

a. A commercial dairy herd that has passed four consecutive, negative milk ring tests within the last 12 months, the tests being no less than two months or more than four months apart, will be considered a negative herd and will not be required to be blood tested as long as the herd continues to have milk ring tests four times each year, the tests being no less than two months or more than four months apart, and the results of the tests remain negative.

b. A commercial dairy herd showing a positive milk ring test will be considered *Brucellosis* infected and will be quarantined and blood tested. The *Brucellosis* status of the herd will then be determined by the results of the blood test which shall be conducted within 30 days of official notification.

2. Card Test. This test will be used by approved personnel to classify cattle negative on surveillance samples collected at slaughter or at livestock auction markets on routine samples collected on farms and on tests of suspicious and infected herds. Positive samples from *Brucellosis* vaccinated animals will be given supplemental testing when possible to aid in classification of cattle as reactors.

B. Supplemental Tests

1. Standard Plate Agglutination Test. This test may classify as negative, suspect or reactors.
2. Rivanol Test. This test may classify cattle as negative or reactor.
3. Complement Fixation Test. This test may classify cattle as negative, suspect or reactor.
4. Particle Concentration Fluorescence Immunoassay Test (PCFIA). This test may classify as negative, suspect, or reactor.

§727. Testing and Vaccination of Cattle and the Movement of Cattle from *Brucellosis* Quarantined Herds (Formerly §323)

A. Testing of Cattle in Quarantined Herds

1. Within six months of the date the quarantine was issued, an exposed herd will be tested at a date agreed upon by the owner or his representative and an authorized agent of the Livestock Sanitary Board. If a date to test an exposed herd cannot be agreed upon, the state veterinarian will establish a date to test the exposed herd and notify the owner in writing 30 days prior to the date established. An exposed herd will remain under quarantine and be tested until it has passed one complete negative test. When more than one herd test is required to obtain a complete negative test, the test date will be established by the procedures used to establish the initial herd test.

2.a. An infected herd will be tested on a schedule established in an approved herd plan or be tested at intervals of 60 days or less. The adult herd will be tested and continue to be classified as infected and under quarantine until it has passed one complete negative herd test, not less than 30 days following the date the last reactor was removed from the herd, and, in addition, a second negative herd test, no less than 180 days from the date the last reactor was removed from the herd. In addition, all infected herds must be tested six to 12 months following their release from *Brucellosis* quarantine, provided that some or all of their herd is still intact;

b. heifer calves weaned after 8 months of age, from a known *Brucellosis* infected herd, must be quarantined and

held separate and apart from the known infected adult herd until they test negative for *Brucellosis* following their first calving; or

c. if heifer calves remain in a *Brucellosis* infected adult herd, the entire herd shall remain under quarantine until all the heifer calves have calved and the entire herd is tested negative for *Brucellosis*.

3. Any *Brucellosis* infected herd which has one or more reactors on more than one herd test, would be required to be adult vaccinated against *Brucellosis* and will be tested on a schedule established in an approved herd plan or be tested at intervals of 60 days or less. The herd will be tested and continue to be classified as infected and under quarantine until it has passed one complete negative test, not less than 30 days following the date the last reactor was removed from the herd and a second negative herd test, not less than 180 days from the date the last reactor was removed from the herd. In addition, the herd must be tested six to 12 months following its release from *Brucellosis* quarantine, provided that some or all of the herd is still intact.

B. Movement of Cattle from Quarantined Herds

1. *Brucellosis* reactors disclosed in a quarantined herd will be:

- a. "B" branded on the left jaw;
- b. identified with a reactor tag; and

c. removed from the herd and sold directly to slaughter or to an approved stockyard for sale to slaughter within 45 days from the date the animal is classified as a *Brucellosis* reactor.

2.a. All cattle over 6 months of age in beef herds, will be "S" branded and identified prior to movement from the quarantined premises by an authorized agent of the Livestock Sanitary Board. In cases where it is impractical to have exposed cattle branded on the farm of origin, the state veterinarian can authorize the movement of cattle from quarantined herds to a livestock auction market for branding and identification. Exceptions to this Subparagraph are:

- i. steers and spayed heifers;
- ii. official *Brucellosis* calfhood vaccinated heifers, no more than 8 months of age and in a herd participating in an approved herd plan to eliminate *Brucellosis* from the herd.

b. All cattle over 6 months of age in dairy herds, will be "S" branded and identified prior to movement from the quarantined premises by an authorized agent of the Livestock Sanitary Board. Exceptions to this Subparagraph are:

- i. steers and spayed heifers;
- ii. calves, no more than 6 months of age which were separated from the dam at no more than seven days of age, held separate and apart from the infected herd for at least 30 days, and be identified with an official ear tag prior

to movement from the premises. In addition, they must be from a herd participating in an approved herd plan to eliminate *Brucellosis*.

3. When part 78, of the *Code of Federal Regulations*, is amended to restrict the movement of all sexually intact heifer calves from *Brucellosis* quarantined herds, all cattle, regardless of age or vaccination status, will be "S" branded and identified prior to movement from any *Brucellosis* quarantined premises by an authorized agent of the Louisiana Livestock Sanitary Board. In cases where it is impractical to have exposed cattle branded on the farm of origin, the state veterinarian can authorize the movement of cattle from quarantined herds to a livestock auction market for branding and identification. Exceptions are steers and spayed heifers.

C. All movements from *Brucellosis* quarantined herds must be accompanied by a VS Form 1-27, listing the individual identification of each animal to be moved. This form must be delivered to an authorized representative at destination. These permits will be issued by an agent of the Livestock Sanitary Board.

D. All intrastate and interstate movements from *Brucellosis* quarantined herds are restricted to an approved slaughtering establishment for immediate slaughter, directly to an approved quarantined feedlot, or to an approved livestock auction market for sale to an approved slaughtering establishment or quarantined feedlot. (*Brucellosis* reactors must be sold for slaughter only, either directly to an approved slaughtering establishment or through an approved livestock auction market for sale to such establishment.) Exceptions to §727.D are:

1. steers and spayed heifers over 6 months of age;
2. heifer calves under 12 months of age that are official calfhood vaccinates, and they originate from herds participating in an approved herd plan to eliminate *Brucellosis* from the herd.

E. Bull calves under 6 months of age that are nursed by *Brucellosis* reactor or exposed cows, may move from the quarantined premises under permit, provided they have been weaned for not less than 30 days immediately preceding movement. Exceptions to this Subparagraph are:

1. steers and spayed heifers;
2. heifer calves from beef herds that are no more than eight months of age and are in a herd participating in an approved herd plan to eliminate *Brucellosis* from the herd;
3. calves from dairy herds that are not more than 6 months of age which were separated from the dam at no more than 7 days of age, held separate and apart from the infected herd for at least 30 days, and be identified with an official ear tag prior to movement from the premises. In addition, they must be from a herd participating in an approved herd plan to eliminate *Brucellosis*.

1. Eligibility for Payment. Producers of registered and grade cattle found to be infected with *Brucellosis* and dairymen whose herds are found to be infected with *Brucellosis* shall be eligible for an indemnity payment for each infected animal slaughtered regardless of the point of concentration where the *Brucellosis* is first identified.

2. Source and Amount of Indemnification. Indemnities may be paid by either the state or federal government. When indemnities are paid by the state of Louisiana, the amount of the payments shall be set by motion of the Livestock Sanitary Board and information concerning the level of indemnification shall be made available to all producers of livestock and dairymen.

3. Cattle Owners Not Eligible for Indemnification. No indemnity shall be paid to livestock owners who do not own the cattle 120 days prior to the testing. The owner must prove ownership of the cows tested.

Every bull moved into this state and every bull which is sold, exchanged, leased, rented, or otherwise transferred in ownership or possession (hereinafter collectively referred to as “transferred”) from one person or entity to another within this state shall be accompanied by a test result showing that the bull is free from trichomoniasis (hereinafter referred to as “negative test result” or “testing negative”) except for the following bulls:

1. exhibition and rodeo bulls that are temporarily in the state for the sole purpose of an event and will be leaving the state immediately after the event;
2. bulls going directly to slaughter or sold to go directly to slaughter;
3. virgin bulls accompanied by a certificate of virgin status, including the bull’s official animal identification number (“AIN”), and signed by the owner of the bull, the owner’s agent, or a Category II accredited veterinarian;
4. bulls being transported through this state in interstate commerce, unless offloaded and commingled with female cattle already in this state that are not going directly to slaughter; and

5. untested bulls traveling to a trichomoniasis quarantine facility with an official permit or quarantine notice.

B. Every bull required to be accompanied by a negative test result shall be tested no later than 60 days prior to being moved into the state or the date of transfer, except for bulls that are in a trichomoniasis-free certification program or a semen certification program recognized by the state veterinarian. Such bulls must not have commingled with breeding females within 60 days from the date the lab reported the sample.

C. Every bull moved into this state and every bull within this state which is transferred from one person or entity to another shall have official animal identification. This requirement does not apply to bulls going directly to slaughter or to bulls being sold to go directly to slaughter.

D. The requirements for testing cattle for trichomoniasis are as follows.

1. All test samples shall be drawn by a Category II accredited veterinarian.

2. The official test for *trichomoniasis* shall be one negative PCR for *Trichomonas foetus* that is performed at an NAHLN-approved laboratory. Pooled tests are not considered official tests in Louisiana;

3. Test results indicating that the tested animal has trichomoniasis (hereinafter referred to as “positive test results” or “testing positive”) shall immediately cause the tested animal to be classified as trichomoniasis-infected and subject to the restrictions of this Subchapter.

4. For trichomoniasis-positive bulls to be reclassified as negative or non-infected, two additional negative PCR tests must be obtained. The request for the confirmatory testing must be made to the state veterinarian within 5 business days of notification of the positive test result. Samples for retesting must be drawn a minimum of 7 days apart and must be submitted to the LADDL for testing.

a. If the confirming tests are negative, then the tested animal is considered negative for trichomoniasis and may be moved as such.

b. If either of the confirming tests reveal a positive result, then the tested animal shall be classified as trichomoniasis-positive and is subject to the restrictions for trichomoniasis-positive animals set forth in this Subchapter.

5. A bull tested for trichomoniasis shall be kept separate from female cattle at all times during the entire test period from the sample collection until receipt of the results from the initial test. A bull testing negative on the initial test shall be kept separate from all female cattle prior to change of possession. If a bull has been commingled with female cattle, all official tests for trichomoniasis prior to the commingling are invalid.

6. All test results for trichomoniasis, whether negative or positive, shall be reported to the state veterinarian within 24 hours after receipt of the results.

7. When a positive test result is received, the attending veterinarian shall consult with the state veterinarian on the first business day after receipt of the test results to determine a plan of action regarding the animal testing positive.

E. Bulls that are required to be tested for trichomoniasis prior to being moved into this state or prior to being transferred from one person to another but which have not been tested, shall be kept separate from female cattle over 12 months of age until a negative result is obtained.

F. A bull being moved directly to slaughter or sold to go directly to slaughter may be commingled with breedable-type cattle also being moved directly to slaughter or being sold to go direct to slaughter.

G. Bulls classified as trichomoniasis-infected are subject to the following restrictions:

1. no known trichomoniasis-infected bull shall be moved into or within this state or transferred within this state from one person to another, unless the bull is going directly to slaughter or sold to go directly to slaughter;

2. no known trichomoniasis-infected bull, whether being moved into or within this state, shall be used for breeding purposes and shall be kept separate from female cattle, from the time the first positive test result is received;

3. a trichomoniasis-infected bull shall be moved directly to slaughter or sold to go directly to slaughter within 30 days from receipt of the positive results of the original test or the results of the confirming test, whichever is later, unless otherwise specified by the state veterinarian; and

4. a trichomoniasis-infected bull may be moved only after a USDA form VS 1-27 permit is issued by the state veterinarian, or the state veterinarian's representative. The VS 1-27 permit shall accompany the bull upon movement of the animal.

H. If a trichomoniasis-infected bull has been in a herd with female cattle, then the infected bull and the other bulls in the herd, are subject to the following requirements.

1. The trichomoniasis-infected bull shall be immediately separated from the herd and all other bulls in the herd and shall be moved or transferred only as allowed by this Section.

2. If there is any other bull or bulls in the herd, then those bulls shall be immediately separated from, and kept separate from, all female cattle.

3. Each bull shall be tested for trichomoniasis within 30 days from separation from all female cattle. Test samples shall not be pooled.

4. A bull testing negative in an infected herd shall be immediately removed from all other bulls that have not been tested, or for which the test results have not been received, and shall have one additional official test with negative results, for a total of two negative tests, to be considered negative for trichomoniasis. The additional official test sample shall be drawn a minimum of seven days from the original test and must be submitted to LADDL for testing.

5. Bulls testing positive in an infected herd may be retested but shall have two additional negative PCR tests to be reclassified as negative or non-infected bulls and the request for the confirmatory testing must be made to the state veterinarian within five business days of notification of the positive test result. Samples for retesting shall be drawn a minimum of seven days apart and shall be submitted to the LADDL for testing.

- a. If the confirming tests are negative, then the tested animal is considered negative for trichomoniasis and may be moved as such.

- b. If either of the confirming tests reveal a positive result, then the tested animal shall be classified as trichomoniasis-infected and subject to the restrictions for trichomoniasis-infected animals set forth in this Subchapter.

I. A trichomoniasis infected herd is a herd known to contain or have contained a trichomoniasis infected bull or cow. If a virgin bull or bull that has tested negative for trichomoniasis is commingled with female cattle from a trichomoniasis-infected herd, then the virgin bull or bull with a negative test results shall be tested twice for and found to be free of trichomoniasis as set forth in this Subchapter before being moved, placed into another herd, or transferred from one person to another.

J. A cow is not required to be tested for trichomoniasis before being moved into this state or transferred from one person to another; but if a cow is tested then the same procedure set forth in this Section for testing a bull shall apply to testing a cow.

K. A cow testing positive for trichomoniasis shall be subject to the following restrictions.

- b. If the cow is quarantined, it may not be removed from quarantine until released in writing by the state veterinarian. The cow may be released from quarantine only by an order from the state veterinarian or the state veterinarian's representative if the cow is subsequently tested in accordance with the procedures set forth in this Subchapter and found to be free from trichomoniasis, or if the cow is to be moved directly to slaughter or sold to go directly to slaughter.

3. A trichomoniasis-infected cow may be moved only after a VS 1-27 permit is issued by the state veterinarian, or the state veterinarian's representative. The VS 1-27 permit shall accompany the cow upon movement.

L. The state veterinarian may grant a written exception or variance to the provisions of this Section, with such conditions as the state veterinarian deems appropriate, if such action is necessary to provide for unforeseen situations or circumstances. Subchapter B. Equine Infectious Anemia (EIA)

§911. Statement of Purpose (Formerly §513)

A. The purpose of these EIA rules and regulations is to better identify and control EIA infected equine and to remove EIA infected equine from the population in order to prevent the spread of EIA. Due to the persistent incidence of EIA in the equine population, a more stringent eradication program for removal of infected equine, which includes ending the life of EIA infected equine, is necessary. These EIA rules and regulations should be liberally construed in favor of ending the life of EIA infected equine. The authority granted therein is to be exercised only in carrying out this necessary EIA eradication program.

B. It is understood that title to an equine can be difficult to discern, that custodians and possessors are frequently the only persons exercising authority over nontitled equine and, therefore, effective enforcement of these EIA rules and regulations requires that possessors, custodians, and owners of equine share responsibility for eradication of a disease that has proven destructive to the industry and to equine. It is further understood that if in the board's view effective enforcement would not be jeopardized, the board should direct enforcement against titled owners over custodians and custodians over possessors. Notwithstanding the foregoing, the board may direct enforcement against any or all owners as defined in these EIA rules and regulations in any given case as it shall deem fit in its sole and exclusive judgment.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:2091-2097.

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of Animal Health Services, Livestock Sanitary Board, LR 23:944 (August 1997), repromulgated by the Department of Agriculture and Forestry, Office of Animal Health and Food Safety and the Board of Animal Health, LR 40:961 (May 2014).

2. All trenches shall be a minimum of four inches wide at the top angled toward the foundation and a minimum of six inches deep in order to permit application of the required chemical.

3. Application of the product mixture into the trench shall be made at the rate and manner prescribed on the label and labeling.

4. Rodding shall be acceptable only when trenching will damage irrigation equipment, utility equipment flowers and/or shrubs.

5. In lieu of trench and treat, a commission approved method of hydraulic injection shall be used in conjunction with an approved termiticide with label and labeling for hydraulic injection use.

6. Within 12 months of an initial supplemental treatment for a new construction contract, the perimeter shall be trenched and treated. The permittee or primary licensee shall report the completion of the perimeter trench and treat to the department on the termite perimeter application form no later than the tenth day of the month after the date of the perimeter application.

7. All new construction and post construction liquid trench and treat applications shall be contracted and reported according to R.S. 3:3370 and LAC 7:XXV.119.D and pay the fee as described in LAC 7:XXV.119.E.

C. Treatment of Existing Pier Type Construction

b. A minimum clearance of 12 inches from the bottom of the sill.

2. Required Clean-Up

a. Remove all cellulose-bearing debris, such as scrap wood, wood chips, paper, etc., from underneath buildings.

a. Where stucco extends to or below grade, dig trenches below and under the edge of the stucco and apply chemical as required by label and labeling.

b. Where ground slabs prevent treatment as required in Subparagraph (a) above, drill and treat slab as required by label and labeling. Where slab is drilled the holes shall be no more than 18 inches apart (unless label requires closer distance).

7. Masonry. Apply chemical to all porous areas, visible cracks and accessible voids in foundation walls, piers, chimneys, steps, buttresses, etc., as follows:

a. treat all cracks in concrete;

b. drill holes every second mortar joint, a minimum of three holes, in all two-course brick foundations (piers, foundation walls, steps, buttresses, L-shaped and T-shaped piers, etc.) and thoroughly treat wall voids. Holes shall be deep enough to reach the center mortar joint and chemical shall be applied under sufficient time and pressure to treat all cracks and voids. Drilling is not required when solid concrete footing extends above grade level or when wall is capped with solid concrete;

c. drill holes in mortar joints of all three-course brick foundation walls at the end of every second brick to the depth of the end of the second brick. Apply chemical under sufficient time and pressure to treat all cracks and voids;

d. drill holes into each compartment of the lowest accessible block of hollow concrete (or other lightweight aggregate) blocks and apply chemical into the openings under sufficient time and pressure to treat the area of the bottom of the foundation. When hollow concrete (or other lightweight aggregate) blocks have been filled with mortar, additional holes may be drilled below the sill plate and apply chemical into the openings using reduced pressure to treat the area of the bottom of the foundation. On T-shaped or L-shaped piers the connecting mortar joints (crotches) shall be drilled and treated. Drilling is not required if the opening in the block is accessible.

8. Ground treatment:

a. trench around each pier and/or foundation of the structure being treated;

9. Dirt filled porches:

a. where the sill or other wood extends to, or below, the under side of the concrete slab, the dirt shall be excavated so as to leave a horizontal tunnel at the junction of slab and foundation wall. The tunnel shall extend the full length of the fill and be at least 12 inches deep (or down to grade) and 12 inches wide. Soil in the tunnel shall be treated with chemical at all points of contact with wall and slab. Supports for the slab shall be erected in the tunnel if necessary. Tunnel shall be well ventilated, but care shall be taken to assure that water does not run into those tunnels (see Figure 1);

Figure 1—Excavation of Dirt Filled Porches

Exception: If, due to construction, it is impractical to break

Excavation of Dirt Filled Porches (Figure 1)

into and excavate dirt-filled areas, a method of drilling, rodding and flooding as outlined in §141.C.9.b.ii below, may be employed.

b. Where the sill or other wood does not extend to or below the underside of the concrete slab, the fills shall be drilled, rodded and flooded as follows.

i. Drill floor slab at intervals of not more than 18 inches (unless label requires closer distance) along the junction of the porch and the buildings: rod and treat the fill along the foundation wall of the building.

ii. When it is impossible to rod and treat fill because of broken concrete, rock or other non-porous material in the fill, drill the floor slab as outlined in §141.C.9.b.i and apply sufficient chemical to treat the surface areas beneath the floor slab. When non-porous materials are present in the fill, drill holes in a multi-course brick foundation at 8 inch intervals with every other hole extending into the fill. When there is a hollow-brick foundation, drill holes into the fill area every 16 inches along the foundation wall.

NOTE: This is in addition to drilling and treating voids as outlined below (see Figure 2 and 3).

Dirt Filled Porch - Hollow Block (Figure 2)

i. Drill hollow-block walls and apply sufficient chemical to penetrate mortar joints and flow into the trench at the bottom of the foundation wall.

ii. Drill multi-course brick walls at intervals of every second brick and treat all voids, making certain that the chemical flows into the voids on both sides of the hole being treated.

10. Chimney Bases and Dirt Filled Steps. Chimney bases and dirt filled steps shall be treated by drilling the foundation walls as outlined in Step 2 for dirt filled porches, (see Figure 4 and 5).

2. The permittee or primary licensee shall report the completion of the application to the outside of the foundation slab or pier type construction to the department on the termite perimeter application form. Within 12 months after initial treatment, the outside perimeter of the foundation slab or pier type construction will be treated as follows:

a. trench around the entire perimeter of the structure being treated, adjacent to the foundation wall or pier type construction. All trenches shall be approximately 4 inches wide at the top, angled toward the foundation and sufficiently deep (approximately 6 inches) to permit application of the required chemical. Apply the product mixture into the trench at a rate and manner prescribed on the label and labeling. Rodding will be acceptable where trenching will damage irrigation equipment, utility equipment, flowers and/or shrubs. Maximum distance between rod holes shall be 4 inches;

b. rod under or drill through any slab(s) adjoining or abutting the initial pre-treated slab or pier type construction and treat all areas beneath adjoining or abutting slab(s) as per label and labeling instructions. When any slab(s) is drilled, the holes shall be no more than 18 inches (unless label requires closer distance) apart along the above stated areas;

c. in lieu of trench and treat, a commission approved method of hydraulic injection shall be used in conjunction with an approved termiticide with label and

labeling for hydraulic injection use. Hydraulic injection shall be performed around the slab to form a treatment zone.

3. If, during the treatment of any area which will be beneath a slab foundation or pier type construction, the operator shall leave the site for any reason prior to the completion of the application, the operator shall prominently display a poster, approved by the department, which states that the treatment of the area under the slab or pier type construction is not complete.

4. All pre-treatment of slabs or pier type construction shall be submitted by online form or called in to the department's district office in which the pretreat occurs, a minimum of one hour prior to beginning the application of termiticides. The information provided shall include treatment company name; treatment structure street address, city, zip code, parish; if available; and/or directions to the property being pre-treated; date and time of beginning the application of termiticides to the property; estimated square or linear footage of each structure to be treated; and number of reported structures. All pest control operators shall keep a log of all pretreats including the information noted. The following is a list of parishes in each of the department's eight district offices. 1. Spot treatments shall not be done on pier-type or slab construction except where a waiver of minimum specifications has been obtained from the owner of the property. All buildings that cannot be treated according to the minimum specifications shall have a waiver of the item or items signed by the owner prior to the treatment. A copy

of the signed waiver shall be filed with the department with the monthly termite eradication report.

2. Treatment will be allowed to any additions to the main structure or exterior slab enclosures and a fee shall be paid and a contract issued on this addition unless the main structure is under contract with the firm performing the treatment on this addition.

3. Each spot treatment reported on the wood-destroying insect eradication report shall include a waiver of minimum specifications and a complete diagram of the area(s) treated.

§117. Professional and Occupational Standards and Requirements

A. Floral Dealer

1. All cut flowers, ornamental plants, and living or freshly cut plant materials sold or offered for sale shall be fresh, of high quality, and free from injurious insects, diseases, and other pests. No plant material of low quality and no wilted or dead plant materials may be offered for sale to the general public or sold to a consumer except when specifically requested by the consumer.

2. Cut flowers and ornamental plants, and living or freshly cut plant materials shall be cared for in a manner that, to the extent reasonably possible, maintains their freshness and increases their longevity.

3. Coolers where cut flowers, ornamental plants, or living or freshly cut plant materials, are kept or stored shall be clean and maintained at a temperature conducive to prolonging the freshness of the said products kept or stored in the coolers.

4. Containers holding cut flowers or living or freshly cut plant materials shall be maintained in a manner that does not adversely affect the cut flowers or plant material. Water in containers shall be changed periodically so as to remain clean at all times.

5. Floral dealers may rent potted ornamental plants for special events such as weddings, conventions, trade shows, etc., if such plants are normally and customarily sold by floral dealers and such plants do not require maintenance, other than normal watering. Plants rented by floral dealers for a special event shall be rented only for the duration of that special event.

B. Landscape Architect

1. Without good cause, all designs shall make use of plant materials commonly found growing in Louisiana or

which are suitable for growth in Louisiana's growing conditions.

2. Licensees shall meet the standards established by the Council of Landscape Architects Registration Board.

3. Each landscape architect shall obtain a seal of the design authorized by the commission. The seal shall be placed on all professional documents, including contracts, maps, plans, designs, drawings, specifications, estimates and reports, issued by a licensed landscape architect for use in this state.

a. The seal required shall be circular and 1 5/8 inches in diameter. The words "State of Louisiana" shall be along the top circumference and the words "Licensed Landscape Architect" shall be along the bottom circumference. The individual's name shall be placed horizontally in the center of the field with his registration number below. Letters and figures shall be as shown on the example printed herein to insure uniformity.

b. A rubber stamp facsimile, which conforms to the official design of the seal described in §117.B.3.a of this Part, may be obtained and used in place of the seal by a licensed landscape architect.

c. The licensee shall sign his or her legal name on each document and shall then affix his or her seal over that signature. The presence of one's seal over the signature on any document constitutes proof that he or she accepts all legal and professional responsibility for the work accomplished. The seal shall be used only by the licensee responsible to this commission for authorship of the documents thus identified. No person other than the licensee represented shall use or attempt to use the prescribed seal, and no unlicensed person shall be authorized to use the prescribed seal. Authorized use of the prescribed seal is an individual act whereby the licensee shall personally inscribe the seal over his or her signature. The licensee is responsible for the security of the seal when not in use.

4. Continuing Education Requirements

a. Compliance with these continuing education requirements is necessary for a landscape architect ("licensee") to maintain a landscape architect license in this state.

b. The commission shall administer the continuing education requirements through a standing continuing education committee consisting of not more than two staff members and at least three licensed Louisiana landscape architects elected by mail ballot. The landscape architects on the committee will each serve a term of two years. The call

for nominations and balloting for committee service will be conducted concurrent with annual balloting for members of the Louisiana Landscape Architects Selection Board.

c. A licensee shall attend, or complete an approved substitute for attendance, a minimum of 8 credit hours of continuing education within each calendar year. If more than 8 credit hours are obtained during a calendar year, a licensee may carry over a maximum of 4 credit hours from one calendar year to the next. Any credit hours carried over into a following calendar year shall apply to that year only and may not be carried forward into subsequent years. A credit hour shall contain at least 50 minutes of actual instruction or education.

d. Activities that may be approved for continuing education credits shall contain instructional or educational components. Such activities include annual professional meetings, lectures, seminars, workshops, conferences, university or college courses, in-house training, and self-directed activities. The commission's staff shall make the initial determination as to whether an activity qualifies for continuing education credit. If the commission's staff determines that an activity may not qualify, that activity request will be automatically forwarded to the continuing education committee for review and the committee's determination. Any licensee or other applicant for approval of an activity may appeal any committee rejection of an activity for continuing education credit to the commission. However, the commission retains the right to review and approve or disapprove any activity as a qualifying continuing education activity and the number of credit hours arising from such activity, even if there is no appeal. Any appeal from any decision of the commission shall be taken in accordance with the Administrative Procedure Act (R.S. 49:950 et seq.).

e. A licensee shall keep all records showing attendance, or completions of an approved substitute for attendance, at continuing education activities for three years following the year in which attendance or completion was done.

f. Each licensee shall annually submit a written certification signed by the licensee that the licensee has, during that calendar year, attended, or completed an approved substitute for attendance, the number of credit hours stated in the certification. If credit hours carried over from the previous year are being used as a substitute for attendance then the certification shall state the number of carried over credit hours that are being used. The certifications shall be attached to the licensee's annual license renewal application. Any renewal application received without this certification shall not be processed for license renewal and the license fees submitted with the application shall be refunded to the licensee.

g. The commission shall cause an annual audit of licensees to be conducted. Licensees shall be selected for audit either by cross-section of licensees or by random audit. The provisions of this subsection notwithstanding, an investigation of a licensee for possible violation of these

continuing education requirements may be conducted if there is reason to believe that a violation may have occurred. Licensees selected for audit will be required to provide documented proof of their having obtained the continuing education credits for the year being audited. A licensee's failure to provide documented proof of having attended, or completed an approved substitute for attendance, for each credit hours certified for the year being audited shall be a violation of this Part. In the event that a licensee provides documented proof of having attended, or undertaken an approved substitute for attendance, any credit hour certified for the year being audited and such credit hour is disallowed then the licensee shall have six months from date of notification of the disallowance to attend, or complete an approved substitute for attendance, a sufficient number of approved credit hours to make up for the disallowed credits. The credit hours attended to make up for any disallowed credit hours shall not count toward the minimum credit hours needed for any other year. Failure to timely make up for the disallowed credit hours shall be deemed a violation of this Part. An appeal from a disallowance of any credit hour may be taken as provided in Subparagraph d of this Paragraph.

h. A licensee may submit a written request for an approved substitute for attendance or for a hardship exemption or extension of time in which to obtain the minimum credit hours for the year in which the request is made. The licensee shall detail the reason for the request, such as the benefit of any substitution, any physical disability, illness, or extenuating circumstance, and a specification of the requested substitute for attendance, including number of credit hours, course of study, etc. The licensee shall also provide any additional information asked for in consideration of the request.

§105. Testing Raw Milk Samples for Butterfat Content

A. No person shall test milk for butterfat content without benefit of license by the commissioner.

B. Babcock Method; Procedure. Deliver 17.5 ml. of milk into an 8 percent milk test bottle and temper to approximately 70° F. Add 17.5 ml. of sulphuric acid (sp. gr. 1.82 to 1.83 at 68° F) to contents of test bottle or such amount necessary to render a deep chocolate color. Mix the contents for three minutes in a mechanical shaker, then centrifuge for five minutes at proper speed. Add hot water 140-150° F to within 1/4 inch of the graduated neck on the test bottle and centrifuge for two minutes. Add 140-150° F water to approximately the 7 percent mark on the graduated test bottle and centrifuge for one minute. Remove the tests from the centrifuge and place into a 138-140° F tempering bath for five minutes, making certain that the water level is above all the fat columns. Measure the fat column from the extreme point of the lower meniscus to the uppermost point of the upper meniscus. Percentage of butterfat shall be determined to the nearest tenth percent and posted immediately. Glassware and equipment shall be drained and cleaned immediately upon termination of use.

C. Milko-Tester Mark III; Procedure. The diluent solution shall be prepared, mixed, stored and utilized according to manufacturer specifications. The accuracy of calibration and performance shall be ascertained. The device shall be flushed four times with diluent and 10 tests performed prior to calibration and official testing. During periods of official testing the device shall be flushed four times with diluent after two routes have been tested or at approximately 35 test intervals. Samples shall be tested at 98-100° F and applied to the automatic pipette in such manner as to avoid contact with the pipette. Test results from the Milko-Tester and other similar devices shall be determined to the nearest hundredths percent and posted

immediately following each test. Upon termination of its use the device shall be flushed four times with diluent solution and a Grade A Homogenized sample (3 3/10 to 3 1/2 percent) placed therein to remain until the device is used again the following day(s).

E. The standard base period for calculation of the authorized rate of volume discount for fluid milk will be the months of August, September and October of each year. The standard base period for calculation of the authorized rate of volume discount for frozen desserts will be November 1 through October 31 immediately preceding the retailer's application.

F. A retailer that has not been in operation during the entire standard base period may, with the approval of the board or commissioner, use for fluid milk, his first full three calendar month's purchases and, for frozen desserts, his first full 12 calendar month's purchases.

G. The authorized rate of volume discount on fluid milk purchases will be established by totaling the value of all fluid milk purchases from all suppliers during the approved base period and dividing said total by three.

H. The authorized rate of volume discount on frozen desserts will be established by totaling the value of all frozen dessert products purchased from all suppliers during the approved base period.

I. The authorized rate of volume discount for each retailer shall become effective on April 1 of the year following the application and shall remain in effect until the

following March 31, except as provided in §309.F. Volume discount rates for a new retailer shall become effective as of his first day of business and remain in effect until he has operated for a full volume discount year.

J. The authorized rates of volume discount of fluid milk purchases shall be as follows.

B. The following acts are, but not by way of limitation, disruptive trade practices.

1. It shall be prohibited for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of dairy products of like grade and quality, where either or any of the purchasers involved in such discrimination are in commerce, where such dairy products are sold for use, consumption, or resale within the state of Louisiana.

2. No person engaged in the processing, production, manufacture, distribution or sale of dairy products shall discriminate between different sections, communities, cities, or localities in the state by selling such dairy products at a lower rate in one section, community, city, or locality, than is charged for the dairy product by such person in another section, community, city or locality, after making due allowance for the difference, if any, in the grade or quality of the dairy product and in the actual cost of transportation of the dairy product from the point of production, if a raw product, or from the point of manufacture, if a manufactured product, where the effect of such discrimination may tend to harm competition. All sales so made shall be prima facie evidence of the unfair discrimination prohibited hereby.

5. It shall be unlawful for any person to discriminate in favor of one purchaser against another purchaser or purchasers of dairy products bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of any services or facilities connected with the processing, handling, sale or offering for sale of such dairy product so purchased upon terms not accorded to all purchasers on proportionally equal terms.

§323. Burdens and Presumptions

A. Sales below Cost

1. Upon proof being made at any adjudicatory hearing that a licensee has advertised, offered to sell, or sold dairy products at less than cost as defined herein plus applicable taxes, the licensee shall be presumed in violation of the regulations proscribing sales below cost.

2. The licensee may rebut that presumption by proving that:

a. such advertisement, offer to sell, or sale was not for the proscribed purpose, did not have a proscribed effect or was otherwise lawful, such as that it was made in good faith to meet an equally low price of a competitor when all of the following circumstances were present:

i. the advertisement, offer to sell, or sale was limited to that customer, group of customers or that market area to which the price was available from competitors;

ii. the advertisement, offer to sell, or sale occurred only while the competitive circumstances justifying such sale below cost existed; and

iii. the advertisement, offer to sell, or sale is reported in advance in writing to the board or commissioner, or, if advance notification is not possible, within 72 hours thereafter;

b. such advertisement, offer to sell, or sale was necessary in response to actual or imminent deterioration of dairy products, seasonal obsolescence of dairy products, distress sales under court process, final liquidation sales or sales in good faith in discontinuance of a business or in discontinuance of a dairy product, and provided that the price at which the dairy product is advertised, offered, or sold is reported in advance to the board or commissioner, or, if advance notification is not possible, within 72 hours thereafter.

3. In the event a representative of the board or of the commissioner has a reasonable basis upon which to believe that a licensee may be selling dairy products below costs and said licensee denies access, fails to produce or produces records which will not permit a determination of the cost of production then, in that event, the cost of the dairy products for the relevant period shall be presumed to be in excess of the selling price. This presumption shall be rebuttable but the burden of rebutting same shall be upon the licensee.

B. Price Discrimination

1. Upon proof being made at any adjudicatory hearing that there has been discrimination in price, services, facilities furnished, or any other proscribed discrimination, the licensee shall be presumed to be in violation of the rules and regulations proscribing discrimination.

2. The licensee may rebut that presumption by proving that:

a. the discrimination in price, services, or facilities was necessary in response to actual or imminent deterioration of dairy products, seasonal obsolescence of dairy products, distress sales under court process, final liquidation sales or sales in good faith in discontinuance of a business or in discontinuance of a dairy product; or

b. the discrimination in price, services, or facilities was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor and all of the following circumstances were present:

i. the discrimination in price, services, or facilities was limited to that customer, group of customers or that market area to which the price was available from competitors;

ii. the discrimination in price, services, or facilities occurred only while the competitive circumstances justifying such discrimination existed; and

iii. the discrimination in price, services or facilities is reported in advance in writing to the board or commissioner, or, if advance notification is not possible, within 72 hours thereafter.

Upon probable cause the board or commissioner may issue a cease and desist order to any licensee, describing with particularity the acts or omissions which the board or commissioner believes to constitute a violation of the Act or these rules or regulations and ordering such licensee to take the necessary and sufficient steps to establish immediate compliance.

B. Upon a finding of any violation of the Act or these rules and regulations by a licensee which violation occurred after the receipt of a relevant cease and desist order the board or commissioner may and should assess a penalty which is treble the normal penalty for any such offense.

C. The board or commissioner may suspend or revoke the license of any licensee found to have violated any provisions of the Act or these rules and regulations.

D. No license shall be suspended or revoked unless the licensee is given an adjudicatory hearing noticed and conducted in accordance with the Administrative Procedure Act (R.S. 49:950-49:970).

E. The board or commissioner may, in lieu of suspension or revocation of any license, impose a penalty in accordance with R.S. 3:4109(G) as a result of any violation of the Act or these rules and regulations which is sustained at such hearing. No penalty may be imposed until such time as an adjudicatory hearing in accordance with the Administrative Procedure Act is held.

G. The foregoing shall not limit any stipulated resolution of any alleged violation.

A. LDAF shall, no later than April 30 of each year, provide the Department of Revenue with a chart for the previous year for which the credit is applied for showing the names of each participating certified milk producer, the amount of milk produced by each, the anticipated amount of tax credit each certified milk producer is eligible to receive, and any other information necessary or proper for the Department of Revenue to pay the tax credits.

1. Prior to submission of the chart to the Department of Revenue, a review committee composed of a person appointed by the commissioner, one person appointed by the secretary of health and hospitals, one person appointed by the secretary of revenue, and one certified milk producer appointed by the commissioner shall review and approve the chart.

B. Determination of the amount of milk produced during a calendar year by a participating certified milk producer shall be based on information obtained from the non-pooled milk certification forms and from records maintained by the milk market administrator.

C. Determination of the anticipated amount of tax credit each certified milk producer is eligible to receive shall be based on:

1. the amount of milk produced by the certified milk producer;
2. the maximum amount of tax credit the certified milk producer would be eligible to receive based on the amount of milk produced by that certified milk producer and the tax credit schedule set out in R.S. 47:6032(C);
3. if applicable, the percentage or ratio shown by dividing the statutory cap on the tax credit by the aggregate of the tax credit that all the certified milk producers would be eligible to receive if there was no statutory cap in place; and
4. the number of eligible quarters to which the tax credit shall be prorated.
 - a. A quarter shall be considered to be an eligible quarter for purposes of the tax credit whenever the uniform price for any one month of the quarter drops below the announced production price.

NOTE: For example, assume that a participating certified milk producer produces between 2,000,001 and 2,500,000 pounds of pooled and non-pooled milk combined for the year in which he is applying for a tax credit. He would be eligible under the statute for a maximum tax credit of \$20,000, which, prorated over four quarters, would be \$5,000 per quarter. If the aggregate of the tax credits that all participating certified milk producers would be entitled to for that year is equal to or less than the statutory cap of \$2,500,000 and each quarter of the year is an eligible quarter then the certified milk producer in this example would receive a \$20,000 tax credit. If there are only two eligible quarters in the year then the maximum tax credit he would receive would be \$10,000, (\$5,000 per quarter X 2).

If, however, the aggregate of the tax credits that all participating certified milk producers would be entitled to exceeds the statutory cap of \$2,500,000 then all individual tax credits would have to be adjusted by a percent or ratio such that the aggregate cap of dairy tax credits for the taxable year would not exceed \$2,500,000. Suppose the aggregate tax credit in this example equaled \$3,100,000. Then the whole number percentage or ratio adjustment to individual tax credits necessary to maintain the aggregate tax credit for the year at or under \$2,500,000 would be 80 percent. The participating certified milk producer in this example would be eligible for a maximum credit of \$16,000, or \$4,000 per quarter, (80% of the maximum tax credit of \$20,000) if each quarter of the year is an eligible quarter. However, if there were only two eligible quarters in the year and the aggregate of the tax credits that all participating certified milk producers would be entitled to receive would, by virtue of that fact, be reduced to \$2,500,000 or less then the certified milk producer in this example would be eligible to receive the non-prorated maximum tax credit for each quarter. In this example that tax credit would be \$10,000, (\$5,000 per quarter X 2).

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:2(A) and R.S. 47:6032(B).

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of the Commissioner LR 34:1599 (August 2008).

§515. Payment of Tax Credit

A. The tax credit shall be paid by the Department of Revenue to a certified milk producer based on the name and tax identification number listed on the chart that LDAF provides to the Department of Revenue.

B. LDAF shall determine the name and tax identification number of the certified milk producer based on the name and tax identification number listed on the information release form.

C. If two or more milk producers combined their milk under one certified milk producer's permit then the division of the tax credit among such milk producers shall be the responsibility of those milk producers and not the responsibility of either LDAF or the Department of Revenue.

AUTHORITY NOTE: Promulgated in accordance with R.S. 3:2(A) and R.S. 47:6032(B).

HISTORICAL NOTE: Promulgated by the Department of Agriculture and Forestry, Office of the Commissioner LR 34:1600 (August 2008).

§517. Certification of Non-Pooled Milk

A. LDAF may certify non-pooled milk for inclusion in determining the amount of tax credit due to a certified milk producer if a non-pooled milk form or list is submitted by the certified milk producer or on his behalf by a milk handler not later than January 31 of the year immediately following the year for which the credit is applied for.

B. The milk producer or milk handler shall provide LDAF with documentation sufficient to show that the non-pooled milk was commercially produced in Louisiana and the reason why the milk is non-pooled milk.

C. LDAF may investigate the circumstances and require the milk producer or milk handler to provide additional information in determining whether the non-pooled milk is to be used for determining the milk producer's tax credit.

D. If LDAF determines that the non-pooled milk is to be used for determining the certified milk producer's tax credit then LDAF shall notify the milk producer of that determination and provide the information to the person or entity making the tax credit calculations.

E. If LDAF determines that the non-pooled milk is not to be used for determining the milk producer's tax credit then LDAF shall notify the milk producer of that determination on or before February 28 of the year immediately following the year for which the credit is applied for.

F. Any milk producer who is aggrieved by a decision of LDAF regarding the eligibility of non-pooled milk may petition the commissioner for an administrative hearing to determine the validity of the decision by LDAF.

1. Any such petition must be filed within 30 days after the milk producer receives notice from LDAF of the decision the milk producer is appealing.

2. The administrative hearing shall be held within 30 days after receipt of the milk producer's petition. The administrative hearing shall be conducted in accordance with the provisions of the Administrative Procedure Act.

3. The commissioner may conduct the hearing or appoint a hearing officer to conduct the hearing and make a recommendation to the commissioner. In all cases the commissioner shall make the final administrative decision.

4. Any petition for judicial review of the commissioner's decision shall be filed in accordance with the Administrative Procedure Act and within the time limits set out in the APA.

B. LDAF shall notify each participating certified milk producer of the amount of tax credit that the milk producer is entitled to at the time that the chart of tax credits is submitted to the Department of Revenue.

C. All announcements and notices relative to the tax credit that LDAF is required to provide by law or these regulations to milk producers shall be provided by means reasonably calculated to provide notice to the milk producers.

B. All disputes regarding eligibility for a tax credit or the amount thereof due the milk producer under the provisions of R.S. 47:6032 shall be decided by the Department of Revenue in accordance with the regulations and policies of that department.

§321. Classification and Method of Sale of Petroleum Products

A. When gasoline, gasoline-oxygenate blends, reformulated gasoline, M85 and M100 fuel methanol, ethanol flex fuels, biodiesel, biomass-based diesel, biomass-based diesel blend, diesel fuel, kerosene, aviation gasoline, aviation turbine fuels, or fuel oils are sold, an invoice, bill of lading, shipping paper, or other documentation must accompany each delivery other than a retail sale. This documentation must identify the quantity, the name of the product, the particular grade of the product, the applicable automotive fuel rating, oxygenate type and content (if applicable), the name and address of the seller and buyer, and the date and time of the sale. This documentation must be retained at the retail establishment for a period not less than one year. The sale of any product under any grade name that indicates to the purchaser that it is of a certain automotive fuel rating shall not be permitted unless the automotive fuel rating or ASTM grade indicated in the grade name is consistent with the value and meets the requirements of 16 CFR 306.5 and 306.6 for transfers to anyone who is not a consumer, 16 CFR 306.12 for automotive fuel sold to consumers, and this Subchapter.

B. All retail dispensing devices must identify conspicuously the type of product, the particular grade of the product, and the applicable automotive fuel rating. The device shall automatically show on its face the initial zero condition and the quantity delivered (up to the nominal capacity). However, the first 0.03 L (or 0.009 gal.) of a delivery and its associated total sales price need not be indicated. In the event of a power loss, the information

needed to complete any transaction in progress at the time of the power loss (such as the quantity and unit price, or sales price) shall be determinable for at least 15 minutes at the dispenser or at the console if the console is accessible to the customer. The device memory shall retain information on the quantity of fuel dispensed and the sales price totals during power loss. The primary indicating elements, and primary recording elements if the device is equipped to record, shall be readily returnable to a definite zero indication. However, a key-lock operated or other self-operated device may be equipped with cumulative indicating or recording elements, provided that it is also equipped with a zero-return indicating element. It shall not be possible to return primary indicating elements or primary recording elements beyond the correct zero position.

C. A computing or money-operated device shall be able to display on each face the unit price at which the device is set to compute or to dispense. Whenever a grade, brand, blend, or mixture is offered for sale from a device at more than one unit price, then all of the unit prices at which that product is offered for sale shall be displayed or shall be capable of being displayed on the dispenser using controls available to the customer prior to the delivery of the product. It is not necessary that all of the unit prices for all grades, brands, blends, or mixtures be simultaneously displayed prior to the delivery of the product. This Subsection shall not apply to fleet sales, other contract sales, or truck refueling sales (e.g., sales from dispensers used to refuel trucks).

D. A device shall be able to display conspicuously on each side the identity of the product being dispensed. A device designed to dispense more than one grade, brand, blend, or mixture of product also shall be able to display on each side the identity of the grade, brand, blend, or mixture being dispensed.

E. A computing device shall compute the total sales price at any single-purchase unit price (i.e., excluding fleet sales, other price contract sales, and truck stop dispensers used only to refuel trucks) for which the product being measured is offered for sale at any delivery possible within either the measurement range of the device or the range of the computing elements, whichever is less. The analog sales price indicated for any delivered quantity shall not differ from a mathematically computed price (quantity x unit price = total sales price) by an amount greater than the value in Paragraph E.1. The values of the graduated intervals representing money values on a computing type device shall be no greater than those in Paragraph E.1. Money-Value Divisions and Maximum Allowable Variations for Money-Value Computations on Mechanical Analog Computers. A computing type device with digital indications shall comply with the requirements of Paragraph E.1 and the total price computation shall be based on quantities not exceeding 0.05 L for devices indicating in metric units and 0.01 gal. intervals for devices indicating in inch-pound units. If a system is equipped with auxiliary indications, all indicated money value divisions of the auxiliary element shall be identical with those of the primary element.

1. Money-Value Divisions and Maximum Allowable Variations for Money-Value Computations on Mechanical Analog Computers

Unit Price		Money Value Division	Maximum Allowable Variation	
From	To and including		Design Test	Field Test
0	\$0.25/liter or \$1.00/gallon	\$0.01	± \$0.01	± \$0.01
\$0.25/liter or \$1.00/gallon	\$0.75/liter or \$3.00/gallon	\$0.01 or 0.02	± \$0.01	± \$0.02
\$0.75/liter or \$3.00/gallon	\$ 2.50/liter or \$10.00/gallon	\$0.01 or 0.02	± \$0.01	± \$0.02
\$0.75/liter or \$3.00/gallon	\$ 2.50/liter or \$10.00/gallon	\$0.05	± \$0.02 1/2	± \$0.05

F. When a product or grade is offered for sale at more than one unit price through a computing device, the selection of the unit price shall be made prior to delivery using controls on the device or other customer-activated controls except for dispensers used exclusively for fleet sales, other price contract sales, and truck refueling, e.g., truck stop dispensers used only to refuel trucks. A system shall not permit a change to the unit price during delivery of product. When a delivery is completed, the total price and quantity for that transaction shall be displayed on the face of the dispenser for at least five minutes or until the next transaction is initiated by using controls on the device or other customer-activated controls.

G. A retailer is not required to have a street sign or billboard to advertise available motor fuels and their prices or to advertise every grade of motor fuel available at the retail location. However, if a retailer chooses to use a street sign and/or billboard to advertise the retail location's available motor fuels, then the street sign and/or billboard shall conspicuously display the following:

1. type(s) or grade(s) of motor fuel being advertised; and
2. the highest price(s) for the advertised grade(s) of motor fuel(s). In the event that the same grade of motor fuel is sold at different prices at the same retail location, a lower price for that grade of motor fuel may be displayed as long as the conditions under which the lower price may be obtained are clearly posted on the sign and available to everyone who qualifies for that lower price. If the sign or billboard displays a flashing sign with multiple prices for each grade of motor fuel, each price displayed with the conditions under which it may be obtained shall be visible for a period of at least three seconds.

Confirmation of disposition of products shall be made available in writing to the commissioner. Specific variations or exemptions may be made for fuels used for blending purposes or designed for special equipment or services and for which it can be demonstrated that the distribution will be restricted to those uses.

E. The following methods are approved for nonconforming products:

1. the nonconforming product may be returned to the refinery for re-refining;
2. the nonconforming product may be disposed of by environmentally acceptable means; or

F. The commissioner or his designee may placard or seal any pump, dispenser, tank or container which contains a nonconforming product or which would dispense a petroleum product that does not conform to the appropriate specification in this Subchapter. No person shall deface, remove, or obscure any placard or seal posted or placed by the commissioner or his designee or act in any manner so as to interfere with or obstruct the commissioner or his designee in the discharge of his duties under this Section.

C. No seafood or honey harvested from or produced, processed, or packaged in a Chloramphenicol region may be held, offered or exposed for sale, or sold in Louisiana without first meeting the requirements of Subsection F.

D. The commissioner may make or rescind declarations related to Chloramphenicol in accordance with this Subsection.

1. The commissioner may declare a geographic area to be a Chloramphenicol region, based upon information that would lead a reasonable person to believe that Chloramphenicol is being used on, administered to, or found in seafood or honey in that geographic area.

2. Any declaration made pursuant to this Subsection and any rescission of any prior declaration shall be by rule promulgated in accordance with the provisions of the Administrative Procedure Act.

E. Declarations

1. The commissioner declares the following geographic areas to be Chloramphenicol regions for the following named seafood or honey because he has information that would lead a reasonable person to believe that Chloramphenicol is being used on, administered to, or found in seafood or honey in or from these geographic area(s):

- a. crab:
 - i. China;
 - ii. Vietnam;
 - iii. Thailand;
 - iv. Mexico;
 - v. Malaysia;
- b. crawfish and shrimp:
 - i. China;
- c. honey:
 - i. China;
 - ii. Thailand.

F. Seafood or honey that comes from a Chloramphenicol region must meet the following requirements for sampling, identification, sample preparation, testing, and analysis before being held, offered or exposed for sale, or sold in Louisiana.

1. Sampling of Seafood

a. The numbers of samples that shall be taken are as follows:

- i. two samples are to be taken of any seafood that is in lots of 50 pounds or less;
- ii. four samples are to be taken of any seafood that is in lots of 51 to 100 pounds;
- iii. twelve samples are to be taken of any seafood that is in lots of 10 pounds up to 50 tons;
- iv. twelve samples for each 50 tons are to be taken of any seafood that is in lots of over 50 tons.

b. Samples of unpackaged seafood must be approximately 1 pound, (454 grams), of seafood per sample from randomly selected areas.

c. For packaged seafood, each sample shall be at least 6 ounces, (170.1 grams), in size and shall be taken at random throughout each lot of seafood.

2. Sampling of Honey

a. The numbers of samples that shall be taken are as follows.

i. Two samples are to be taken of any honey that is in lots of 50 pounds or less.

ii. Four samples are to be taken of honey that is in lots of 51 to 100 pounds.

iii. Twelve samples are to be taken of honey that is in lots of 101 pounds up to 50 tons.

b. For honey in bulk wholesale containers, each sample shall be at least 1 pound or 12 fluid ounces and must be pulled at random throughout each lot.

c. For packaged honey, each sample shall be at least 8 ounces in size and shall be taken at random throughout each lot.

3. If the seafood or honey to be sampled consists of packages grouped together, but labeled under two or more trade or brand names, then the seafood or honey packaged under each trade or brand name shall be sampled separately. If the seafood or honey to be sampled are not packaged, but are segregated in such a way as to constitute separate groupings, then each separate grouping shall be sampled separately.

4. A composite of the samples shall not be made. Each sample shall maintain a separate identity so that each sample may be tested individually. Each sample shall be clearly identifiable as belonging to a specific group. All seafood samples shall be kept frozen and delivered to the lab unless it adversely affects the sample quality or the ability to accurately test the sample.

5. Sample Identification

a. Each sample shall be identified as follows:

i. any package label;

ii. any lot or batch numbers;

iii. the country, province, state and city of origin;

iv. the name and address of the importing company;

v. unique sample number identifying the group or batch sample and sub sample extension number for each sub sample.

6. Sample Preparation

a. Honey

i. For small packages of honey up to and including 8 ounces, use the entire sample. If honey sample includes more than one container, they shall be blended together. Divide the sample in half. Use half of the sample

for the original analysis portion and retain the other half of the sample as a reserve.

b. Seafood

i. For small packages of seafood up to and including 1 pound, use the entire sample. Shell the seafood, exercising care to exclude all shells from sample. Grind sample with food processor type blender while semi-frozen or with dry ice. Divide the sample in half. Use half of the sample for the original analysis portion and retain the other half of the sample in a freezer as a reserve.

7. Sample Analysis

a. Immunoassay test kits may be used if the manufacturer's published detection limit is 1 part per billion, (1 ppb) or less. Acceptable test kits are the Ridascreen Chloramphenicol enzyme immunoassay kit and the Charm II Chloramphenicol kit. The commissioner may authorize other immunoassay kits with appropriate detection limits of 1 ppb or below to be used. Each sample must be run using the manufacturer's test method. The manufacturer's specified calibration curve must be run with each set. All results 1 ppb or above must be assumed to be Chloramphenicol unless further testing by approved GC/LC method indicates the result to be an artifact.

b. HPLC-MS, GC-ECD, GC-MS methods currently approved by FDA, the United States Department of Agriculture or the Canadian Food Inspection Agency with detection limits of 1 ppb or below may also be used.

c. Other methods for sampling, identification, sample preparation, testing and analysis may be used if expressly approved in writing by the commissioner.

8. Any qualified laboratory may perform the testing and analysis of the samples unless the laboratory is located in a Chloramphenicol region. The commissioner shall resolve any questions about whether a laboratory is qualified to perform the testing and analysis.

9. The laboratory that tests and analyzes a sample or samples for Chloramphenicol shall certify the test results in writing.

10. 1. General Rules

a. Act Number 231 of 1958 provides for an annual state election on the second Saturday in June.

b. Nominating petition forms shall be distributed by the district supervisors through county agents, SCS district conservationists, and others. All should encourage our best landowners or farm operators to qualify as candidates for district supervisors.

c. In order to qualify as a candidate to run for district supervisor, the candidate must be a qualified landowner or farm operator, must be a qualified voter within the state, and must present to the state committee a petition containing the names of at least 25 qualified voters. This petition shall be signed by the registrar of voters attesting that the names on the petition are qualified voters in the named Soil and Water Conservation District.

2. Nominating Rules

a. There shall be a 30-day nominating period which shall begin 60 days before the annual election on the second Saturday in June.

b. Nominating petitions must be completed on the petition papers supplied by the Louisiana Soil and Water Conservation Committee and/or any Soil and Water Conservation District Office. Nominating petitions will be revised yearly and will be numerically numbered; all nominating petitions submitted for district elections must have a current revised date and carry the name assigned to that district by the state committee.

c. Petitions must be mailed by the state committee to each chairman in the 40 Soil and Water Conservation Districts on or before _____.

d. Petitions completed containing the names of candidates, together with the signatures of at least 25 legally qualified voters, must be in the state committee office on or before _____.

e. Instructions, together with the necessary ballots, shall be mailed to the chairman of each soil and water conservation district in due time before the election.

f. The chairman of the board and the four district supervisors in each district shall have charge of the election. It shall be their duty to select the polling places and notify the state committee of such selection in time to give due notice before the election. It shall also be their duty to appoint two election commissioners for each polling place, carry the ballots out to the polling places, and secure an accurate result of the election of each polling place or appoint a trustworthy person to carry out these duties. The chairman of each district shall immediately mail the results of the election to the state committee.

g. The state committee shall give due notice through the press before the election, of the election in districts where elections are necessary as soon as nominating petitions have been approved by the committee. The notice shall contain the polling places and hour that the polls will be opened and closed. In districts where there is no opposition, there will be no election.

h. The election commissioners at each poll where elections are being held shall open the poll at 8 a.m. and close at 7 p.m.

i. Each soil and water conservation district board shall provide the state committee with a list of names of the persons who served as commissioners at the annual election, second Saturday in June.

j. The state committee shall pay each commissioner who served at the polls for the state annual election \$25 per day and that districts may add up to an additional \$25 to this pay for commissioners from their state appropriated funds. k. No provisions will be made by the district for the qualified voters to vote by absentee ballot during this election.

l. The state committee shall, on the regular meeting date in June, promulgate the election returns and announce the names of the elected district supervisors. Nominees who had no opposition may be declared elected upon approval of their nominating petitions.

m. If the total number of candidates duly presented in nominating petitions does not exceed the name of supervisor places to be filled by election, then and in that event, the state committee is authorized and empowered to dispense with the election procedure and to declare each of said candidates duly qualified as a supervisor without the requirement of an election the same as if his name had been presented to the qualified voters in an election. Candidates so qualified shall be considered for all purposes "Elected Supervisors."

n. The state committee shall supervise the conduct and prescribe regulations of elections for district supervisors.

If none of the items of identification are available, the person must sign a sworn statement certifying that he is a registered voter. After identification has been produced, or the sworn statement has been signed, the voter will then enter his name on the tally sheet and will be given a ballot by the election commissioner in order to cast his vote.

p. Illiterate or blind voters will be assisted only by the election commissioner and only if the voter requests assistance in marking a ballot.

q. All candidates participating may appoint two poll watchers per polling place if they so desire. However, poll watchers will not receive pay from the state committee.

r. The official ballot is to be marked with an X by a black, ballpoint pen and folded out of the presence of the election commissioner and poll watchers, then dropped in the ballot box. If the ballot is not marked with an X, it will be considered spoiled.

s. All spoiled or excess ballots are to be accounted for by the commissioners. The ballot box, without being removed from the public view, shall be opened by the commissioners and they shall proceed with counting the ballots found therein without unfolding them except so far as to ascertain that each ballot is single, and by comparing the ballots found in the box with the number shown by the poll lists to have been deposited. If the ballots found in any box are more than the number of ballots shown to have been deposited, the ballots shall all be replaced without being unfolded in the box from which they were taken. One of the commissioners shall, without seeing the ballots and with his back to the box, thoroughly mingle them together, and another commissioner shall, without seeing the ballots and with his back to the box, publicly draw as many ballots as shall be equal to the excess. Without unfolding them, the commissioner shall at once mark them "uncounted in excess of poll list."

t. Ballot boxes are to be delivered only to election commissioners.

u. A sample of the current rules and regulations, official ballot and voters sworn statement for electing district supervisors will be posted in some conspicuous location at each polling place during the election so that voters will have the opportunity to review same.
