- a) When funding is available, and
- b) In compliance with a policy developed by the section and approved by the appointing authority, and

II. PURPOSE:

To remain competitive with the pay practices of employers in the area. To compensate employees for working less desirable hours. To assign responsibility for aspects of the policy and to explain the process for adhering to the policy.

III. APPLICABILITY:

This policy applies to employees of the Division of Administration, in sections which maintain an approved policy, who occupy the specified positions in the specified jobs, when and if they work hours of the applicable shifts.

IV. DEFINITIONS:

Shift Differential: an hourly rate over and above the base rate per hour paid on shifts outside the normal work day. Shift differential is paid only for hours worked during the time period determined to qualify for the differential. Shift differential is not considered part of base pay for the purposes of retirement or calculation of leave. However, shift differential is included in the overtime calculation and is subject to normal tax withholding.

Specific shifts will be defined in individual policies.

V. PROCEDURE:

Sections wishing to pay shift differential shall prepare a written policy which:

- a) Defines shifts which will be used, and
- b) Establishes shift differential rates for each shift, and
- c) Identifies how positions will be selected to be eligible for shift pay, and
- d) Establishes a non-discriminatory basis for assigning shifts.

The policy must be approved by the appointing authority and an approved copy must be forwarded to the Office of Human Resources.

Sections shall request authorization to pay shift differentials to certain positions (as well as removal of that authorization) on the OF-756 (copy attached). The completed OF-756 must be forwarded to the Office of Human Resources for review and approval.

The Office of Human Resources will assure that the position is eligible for shift differential based on the section's policy and, if appropriate, adjust the position attribute in SAP.
