

DECLARATION OF EMERGENCY

Department of Wildlife and Fisheries Wildlife and Fisheries Commission

Shrimp Season Closure in Remaining State Inside Waters

The secretary of the Department of Wildlife and Fisheries has been notified that recent biological sampling conducted by the department has indicated that average white shrimp size within these waters to be closed is smaller than the minimum possession count and this action is being taken to protect these small white shrimp and provide opportunity for growth to larger and more valuable sizes. R.S. 56:498 provides that the possession count on saltwater white shrimp for each cargo lot shall average no more than 100 (whole specimens) per pound except during the time period from October 15 through the third Monday in December.

In accordance with the emergency provisions of R.S. 49:962 of the Administrative Procedure Act which allows the Wildlife and Fisheries Commission to use emergency procedures to set shrimp seasons; R.S. 56:497 which allows the Wildlife and Fisheries Commission to delegate to the secretary of the Department of Wildlife and Fisheries the powers, duties and authority to set shrimp seasons; and in accordance with a Declaration of Emergency adopted by the commission on August 3, 2023, which authorizes the secretary of the department to close the fall inshore shrimp season when biological and technical data indicate the need to do so or if enforcement problems develop, the secretary does hereby declare:

The 2023 fall inshore shrimp season will close on Sunday, February 25, 2024, at official sunset in remaining state inside waters with the exception of the open waters of Breton and Chandeleur Sounds as bounded by the double-rig line described in R.S. 56:495.1(A)2.

Existing data do not currently support shrimping closures in additional state inside waters. Notice of any opening, delaying or closing of a season by the secretary will be made by public notice at least 72 hours prior to such action.

Madison D. Sheahan
Secretary
