

# Grantee: Louisiana

## Grant: B-18-DP-22-0001

### July 1, 2022 thru September 30, 2022 Performance

---

<b>Grant Number:</b> B-18-DP-22-0001	<b>Obligation Date:</b>	<b>Award Date:</b>
<b>Grantee Name:</b> Louisiana	<b>Contract End Date:</b> 09/16/2032	<b>Review by HUD:</b> Original - In Progress
<b>Grant Award Amount:</b> \$1,213,917,000.00	<b>Grant Status:</b> Active	<b>QPR Contact:</b> Amanda Clark
<b>LOCCS Authorized Amount:</b> \$1,213,917,000.00	<b>Estimated PI/RL Funds:</b>	
<b>Total Budget:</b> \$1,213,917,000.00		

## Disasters:

### Declaration Number

FEMA-4272-TX  
FEMA-4263-LA  
FEMA-4277-LA

## Narratives

### Mitigation Needs Assessment:

Beginning with Hurricane Katrina's landfall in August 2005, each of Louisiana's 64 parishes has been included in a federal major disaster declaration as a result of a named tropical event. Moreover, the Great Floods of 2016 - two rainfall events six months apart affected wide swaths of the state - causing severe flash and riverine floods. These floods led to major disaster declarations in 56 parishes. These events have left an indelible mark on Louisiana and have exposed new challenges within the state's approach to flood risk reduction.

Since Hurricanes Katrina and Rita, the state has adopted stricter building codes, newer flood maps in some areas, and has formed the Coastal Protection and Restoration Authority (CPRA), which relies on science and engineering to produce, implement, and regularly update the state's Coastal Master Plan. After Hurricane Isaac, with funds provided by HUD's National Disaster Resilience Competition, Louisiana created the Strategic Adaptations for Future Environments Program (LA SAFE) which became a model for engaging citizens in planning for the long-term resilience of their communities.

The Great Floods of 2016 exposed another challenge the state faces: the need to better manage riverine and flash flooding caused by extreme precipitation events. The state identified regional watershed-based flood risk management as a means to systematically address water management and avoid interventions that may unintentionally increase runoff or subsequent flooding on adjacent communities, upstream and downstream.

Soon after, the state began its investigation of this new approach. Per the Bipartisan Budget Act of 2018, Congress allocated \$1,213,917,000 CDBG-MIT funds to the State of Louisiana for the specific purpose of mitigation activities as specified in Public Law 115-123 and FR-6109-N-02.

As the next step in Louisiana's response to its increasingly complex flood risk profile, the state completed its investigation of watershed management and Governor John Bel Edwards charged state agencies with coordinating statewide floodplain management efforts through a watershed-based approach, referred to as the Louisiana Watershed Initiative or LWI.

Building on the efforts and methodologies of both the Coastal Master Plan and LA SAFE, the LWI takes a statewide approach to watershed-based floodplain management to reduce flood risk vulnerabilities through pre-disaster mapping, modeling, and watershed management planning - backed by large-scale investments in projects and programs that directly mitigate risks.

The LWI combines the Coastal Master Plan's focus on data, science and engineering with the community engagement lessons learned through LA SAFE to work across all sectors of government. The state commits to working in partnership with local communities statewide toward an integrated, watershed-based approach to floodplain management that combines physical, biological, ecological, socioeconomic, and policy-based solutions emanating from a comprehensive scientific understanding of the state's hydrologic processes.

**Most Impacted and Distressed Areas:** Combined, these disasters affected 56 of the state's 64 parishes, with 51 parishes declared eligible for FEMA IA. HUD has identified the 10 most impacted parishes from these two events as Acadia, Ascension, East Baton Rouge, Lafayette, Livingston, Ouachita, St. Tammany, Tangipahoa, Vermilion and Washington.

### Proposed Use of Funds:

#### Program Area No. 1: Local and Regional Watershed Projects and Programs

As local, regional and state governments and organizations work through the LWI toward regional, watershed-based coordination and as the LWI develops datasets and modeling tools to inform watershed management policy and project mitigation activities (see Program Areas 3 and 4 in this Section for more detail), the LWI will provide funding and assistance to local and regional organizations to implement identified projects and programs with demonstrable and quantifiable mitigation outcomes. These projects and programs may include, but are not limited to, direct physical improvements to the watershed, ecological and waterway restoration projects, code enforcement activities, floodplain/floodway easements, and strategic land acquisitions and other projects that demonstrably enhance the storage and ecosystem capacity of the land

and water systems within the state’s respective watersheds.

**Program Area No. 2: State Projects and Programs**

Following the Great Floods of 2016, the state identified numerous projects and/or programs that are necessary for immediate implementation of a more comprehensive flood mitigation strategy. In these cases, the state – through the LWI – will award projects, as selected through a non-competitive process for immediate implementation. These projects and programs must align with the LWI’s approach to comprehensive statewide and regional watershed management focused on four dimensions: (1) evidence-backed flood control projects, (2) innovative floodplain management, (3) public education and (4) changing development patterns. For activities that use Urgent Need Mitigation as their national objective, the state will demonstrate how projects will result in a measurable and verifiable reduction in the risk of loss of life and property.

**Program Area No. 3: Watershed Monitoring, Mapping and Modeling**

This program addresses the unmet mitigation need for watershed data and modeling, and will enable long-term flood resilience, more targeted flood control project selection and regional coordination along watershed boundaries. This program can also be anticipated to reduce the need for disaster response and enhance such response efforts when deployed, aid in the provision of critical lifelines and enable a demonstrable reduction in flood risk within HUD-MID and LA-MID parishes.

**Program Area No. 4: Watershed Policy, Planning and Local Capacity Assistance**

While different levels of capacity and integration exist in various agencies and regions of the state, these entities are not currently coordinated on a regional watershed basis and their activities and authorities are often circumscribed within the boundaries of a single parish or municipality. State and local agencies, communities, and stakeholders must collaborate, organize, and make decisions on a watershed basis in order to plan for and manage water and flood events effectively. Through this program, the state will partner with federal, state, local agencies and experts, as well as private industry, to complete an assessment of state, regional, and local programs, as well as to offer technical assistance, educational and capacity building support services to state agencies, local governments, non-profit organizations, planning and development organizations, chambers of commerce, and other public-serving agencies and organizations in order to encourage the alignment of effort across watersheds to promote the LWI’s approach to watershed management. This technical assistance will also facilitate the establishment of coalitions among parishes and municipal governments – based on watersheds – to implement regional policies and projects funded through other programs within this grant. For activities that use Urgent Need Mitigation as their national objective, the state will require sub-grantees to demonstrate how their projects will result in a measurable and verifiable reduction in the risk of loss of life and property.

Many existing state, regional and local organizations have limited experience or capacity related to watershed-specific issues, such as floodplain policy development and implementation, or related to analyzing impacts of floodplain policies on local and regional economies, natural and built environments, and wildlife and fisheries. Under this program, the LWI will coordinate extensive public engagement, training, and research, and ultimately, will develop informed and collaborative policies and planning tools. This program area includes three specific elements: technical assistance, development of statewide and regional watershed management plans, and administration.

## Overall Progress Narrative:

Administration Activity  
Implementation of State Agency Operational Guidance (OGSA) continued this quarter with updates on the following recommendations:

- A2 - Ensure parish and municipal applicants are aware of the limitations and constraints of funding sources and establish a project proposal review process that facilitates the coordination of funding sources pre-award
  - Solicitation of Information survey was drafted and the content refined with LWI agencies and regional coordinators.
  - Process and mechanism for implementation underdevelopment
- C1 - Utilize the Nature-Based Solutions group within LWI to share information and resources among agencies and with stakeholders, and develop proactive mechanisms for conservation of existing floodplains and channels and the restoration of natural habitats
  - Final draft of "NBS for Flood Risk Management: An Information Guide" completed March 2022. Distributed to Regional Coordinators and posted on the LWI website as a resource
- D2 - First draft of turnkey uses and potential uses of H&H models and associated data under review by TDQ and Working Group

Watershed Projects Grants Program: Local and Regional

- Round 1: Agreements have been finalized for 24 of the 29 Round 1 projects. 5 are currently in stages of processing the CEA. Most are working on finalizing Plans and Specs or advertising their RFQ's for A/E services.

State Projects and Programs

- Large Area Buyouts Program: In 2022 Q3, OCD continued the development, outreach, application, and closing phases of its CDBG-MIT Buyout activities. For the Greenwich Terrace buyouts, 48 residences have been bought out with the remaining 37 to be completed in Q4. An additional 30 have been confirmed for Priority Zone 2 and a final offer to the Priority Zone 1

holdouts. 8 buyouts have been completed in Victoria Acres. The remaining 21 will be closed in 2022 Q4 and 2023 Q1. All but a single residence in the subdivision have elected to participate in the program. Denham Springs closings have been scheduled to start in Q4. The application process for the City of Scott opened on 7/21 and closed 8/21. 24 applications were received and are under review. The buyout area for West Monroe has been identified and a public meeting was conducted on October 13<sup>th</sup>.

- Regional Retention, Detention and Natural Flood Plain Management Program: OCD has approved agreements with six State Projects and Programs applicants. Three projects are in the design phase, one is still in construction for its drainage improvements project, and one began construction last. All other projects are anticipated to begin construction in 2023.

**Non-Federal Cost Share Assistance Program**

- All potential applications have been submitted. Current grantees are providing information to finalize CEAs. While this is ongoing, OCD is coordinating with GOHSEP to ensure that all identified projects receive approval of all required deliverables in the FEMA HMGP program before moving forward in the cost share assistance program.

**Watershed Monitoring, Mapping and Modeling**

In 2022 Q3, Watershed Monitoring, Mapping and Modeling activities under the MIT program, which are all planning activities, include:

- Statewide Modeling Program:
  - TO 1: LA DOTD held 3 Coordination Meetings between regional modeling consultants and TDQ, on July 8<sup>th</sup>, August 12<sup>th</sup>, and September 9<sup>th</sup> to address questions on LiDAR updates, hydrometeorology, survey guidance, USACE data requests, hydrology review matrix for rain on grid, consequence modeling, design storms, deliverables, data transfers, transition zone inputs, google land use dataset,
  - TO 2: LA DOTD has issued Task order 2 for all Regions.
  - TO 3: LA DOTD has issued Task Order 3 for all Regions.
  - General overall modeling updates.
    - Regions ready in contracting:
    - All 14 Task Orders have been issued Notice to Proceed
    - Note: Task order period is 24 months, modeling portion of schedule is only 20 months. We should have all the models substantially complete by October 2023.
    - All Survey Plans have been approved
    - The first submission for hydrologic setups in Regions 2 and 7 have been approved. The review of the first submissions for Regions 1, 3, 5, and 6 are underway.

- River and Rain Gauge Enhancement Program: The state continues to make progress as part the statewide River and Rain Gauge Enhancement program, which includes acquisition, installation and monitoring of rain and river gauges in those currently under-monitored and unmonitored areas, as well as the time and effort related to the operation, monitoring, collection and review of data from the gauges. To this end OCD entered into a \$15,419,380 CEA for six years with DEQ.

- Gauges Locations Reconned: 45
- Gauges Installations at Locations Reconned: 40
- Gauges Online: 40
- Precipitation Gauges Online: 39
- Gage Height Only Gages Online: 18
- Gage Height and Stream Level Gages Online: 5
- Gage Height and Velocity Gages Online: 14
- Gage Height and Discharge Gages Online: 0
- Gage Height, Stream Level, and Velocity Gages Online: 2
- Gage Height, Velocity, and Discharge Gages Online: 1
- Gauges Fully Functional: Currently there are no gauges fully functional due to all of the current data being provisional. The progress can be accessed as a list of completed gauges at USGS Current Conditions For Selected Counties in Louisiana or as a spatial map at Water Resources of the United States—National Water Information System (NWIS) Mapper (usgs.gov)

NOTE: For all activities in this QPR with no narratives, there were no expenditures in this quarter.

**Activity Description:**

This activity is for construction of flood risk reduction improvements at City Park, Erie, College, and Campus Lakes.

**Location Description:**

901 Stanford Ave., Baton Rouge, LA 70808

**Activity Progress Narrative:**

Changed Projected End Date from 12/30/2026 to 12/31/2024. Subject to Section 3 Requirements question was answered as "Yes". Updated proposed # of Section 3 Labor Hours to 596.75, proposed # Targeted Section 3 Labor Hours to 119.35, and proposed # of Total Labor Hours to 2,387. Received guidance from Jerald Ferguson on 8/5/2022, to only enter whole numbers into DRGR for Section 3 labor hours. Numerical data wasn't saved on 8/4/2022. I re-entered Section 3 hours as whole numbers. Updated proposed # of Section 3 Labor Hours to

596, proposed # Targeted Section 3 Labor Hours to 119, and proposed # of Total Labor Hours to 2,387. Expenditures this quarter were to University Lakes, LLC for mitigation measures of the LSU University Lakes Flood Risk Reduction Project. The Advance Work Project was completed (testing means and methods to observe settlement and consolidation). Community meetings were held to share design and implementation plans and allow for feedback.

**Other Funds:**

Overall	This Period	To Date
Match Funds	\$ 0.00	\$ 0.00

**Activity Description:**

The activity will provide approximately 1,271,307 cubic yards of additional storage capacity to East Baton Rouge's currently stressed drainage system. This additional storage will consist of constructing 197 acres of detention at approximately 4 ft. deep throughout the upper reaches of Ward Creek Watershed.

**Location Description:**

17200 Airline Hwy, Baton Rouge, LA, 70817

**Activity Progress Narrative:****Section 3 Qualitative Efforts:**

- No construction contracts awarded.

Non-Match Funds	\$ 0.00	\$ 0.00

#### Other Funds:

Overall	This Period	To Date
Match Funds	\$ 0.00	\$ 0.00

#### Activity Description:

The activity involves construction of a sump area, pump station and force main to pump storm water runoff from a low lying residential area in the Georgia Street/Winnsboro Road vicinity to the Ouachita River.

#### Location Description:

2203 Georgia St., Monroe, LA 71202

#### Activity Progress Narrative:

#### Section 3 Qualitative Efforts:

- No construction contracts awarded.

#### Activity Description:

Informed decision-making requires the use of best available scientific data. Consequently, it is imperative for there to be detailed, accurate, dynamic, upgradable, accessible and consistent mapping and modeling that allows the state, regional and local governments and private industry to make smart immediate, intermediate, and long-term decisions related to development, investment in structural and nonstructural infrastructure, land-use decisions, and other public and private mechanisms for investment. This activity funds the acquisition and monitoring of data necessary for and the development of a comprehensive set of hydraulic and hydrologic models for all watersheds within Louisiana.

The data and models developed will enable long-term flood resilience, more targeted flood control project selection and regional coordination along watershed boundaries. Specifically, the data and models will:

- Enable strategic decision-making in flood or disaster preparation and response scenarios based on projected water elevation and inundation. Examples of this include using the H&H models to plan evacuation routes, evacuation or closure of hospitals and medical facilities, and estimate shelter needs based on a given flood scenario;

- Enable the analysis and prioritization of structural and nonstructural flood control projects;
- Illustrate the benefits of implementing policy changes to foster more resilient development;
- Enable resilient infrastructure design;
- Enable businesses and industrial facilities to implement flood-proofing or resilient site design;
- Enable local leaders within a given watershed to work from the same set of hydrologic assumptions, thereby enabling consensus;
- Empower homeowners and residents to understand their flood risk profile under different weather and climate scenarios; and
- Predict runoff and/or drainage impacts to avoid ecosystem disruption by flood control projects or other types of projects.

### Location Description:

In Acadia, Allen, Ascension, Assumption, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Cameron, Catahoula, Claiborne, De Soto, East Baton Rouge, East Carroll, East Feliciana, Evangeline, Franklin, Grant, Iberia, Iberville, Jackson, Jefferson Davis, Lafayette, Lafourche, LaSalle, Lincoln, Livingston, Madison, Morehouse, Natchitoches, Ouachita, Pointe Coupee, Rapides, Red River, Richland, Sabine, St. Charles, St. Helena, St. James, St. John the Baptist, St. Landry, St. Martin, St. Tammany, Tangipahoa, Union, Vermilion, Vernon, Washington, Webster, West Baton Rouge, West Carroll, West Feliciana, and Winn parishes in Louisiana.

### Activity Progress Narrative:

Changed the Environmental Status from Exempt to Completed. Expenditures this quarter were for furtherance of statewide hydrologic and hydraulic modeling efforts.

**Activity Description:**

The Statewide and Regional Watershed Management Planning activity focuses on large-scale regional and statewide floodplain management planning activities utilizing a watershed management approach. The activity includes planning and planning support efforts by state agencies and the development of the statewide and regional watershed management plans. It also includes the production of planning tools and local tools such as open space maps, model codes and ordinances for flood-safe development and CRS tools and capacity support.

**Location Description:**

In Acadia, Allen, Ascension, Assumption, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Cameron, Catahoula, Claiborne, De Soto, East Baton Rouge, East Carroll, East Feliciana, Evangeline, Franklin, Grant, Iberia, Iberville, Jackson, Jefferson Davis, Lafayette, Lafourche, LaSalle, Lincoln, Livingston, Madison, Morehouse, Natchitoches, Ouachita, Pointe Coupee, Rapides, Red River, Richland, Sabine, St. Charles, St. Helena, St. James, St. John the Baptist, St. Landry, St. Martin, St. Tammany, Tangipahoa, Union, Vermilion, Vernon, Washington, Webster, West Baton Rouge, West Carroll, West Feliciana, and Winn parishes in Louisiana.

### Activity Progress Narrative:

Expenditures for this quarter were for participation in LWI working group meetings, watershed council meetings and review and progression of Operational Guidance for State Agencies, Long-Term Model Use, Storage and Maintenance Plan.
