

Grantee: Louisiana

Grant: B-08-DI-22-0001

July 1, 2024 thru September 30, 2024 Performance

Grant Number: B-08-DI-22-0001	Obligation Date: 04/27/2009	Award Date: 04/27/2009
Grantee Name: Louisiana	Contract End Date:	Review by HUD: Original - In Progress
Grant Award Amount: \$1,093,212,571.00	Grant Status: Active	QPR Contact: No QPR Contact Found
LOCCS Authorized Amount: \$1,093,212,571.00	Estimated PI/RL Funds: \$38,191,041.89	
Total Budget: \$1,131,403,612.89		

Disasters:

Declaration Number

FEMA-1792-LA

Narratives

Disaster Damage:

Hurricane Gustav caused major wind and flood damage throughout the state, from the southern coastal parishes through central and north Louisiana. Two weeks later, Hurricane Ike hit sending tidal surges across the State's southern coastal communities. Ike exceeded storm surge caused by hurricanes Rita and Katrina. More than 1.9 million Louisiana residents were forced to evacuate for hurricanes Gustav and Ike. Many of these residents were unable to return to their homes and jobs for a number of days, and a large number of residents whose homes remain unlivable continue to need short-term shelter and longer-term transitional housing. The State was forced to evacuate 30,000 critical transportation-need residents, including 10,400 medical evacuations. This represented the largest medical evacuation in U.S. history. The State was also left with 1.5 million cubic yards of debris from Hurricane Gustav along federal and state highways. Approximately 150,000 to 300,000 homes experienced some level of damage in the storm; more than 12,000 homes were flooded. Preliminary estimates show that approximately \$2 to \$7 billion in residential property loss was incurred. Even homes built to the Federal Emergency Management Agencies Advisory Base Flood Elevations flooded as a result of this storm. The state also estimates more than \$1 billion in public infrastructure damage. The state has spent more than \$400 million in emergency response and immediate recovery activities. Fifty-three (53) of the States sixty-four (64) parishes were included in the President's disaster declaration for individual assistance; all 64 parishes were declared for public assistance. The two storms caused tremendous damage, which, in turn, left most communities without electricity for days, and many for weeks. More than 120,000 homes received some damage.

Recovery Needs:

A large percentage of the State's educational facilities received damage from the storm. Preliminary estimates indicate that there was at least \$100 to \$150 million in damages to the primary (including pre-K) and secondary education facilities. While most of these repairs will be covered through FEMA's public assistance program, certain repairs or necessary rebuilds may be deemed ineligible through FEMA's program. Hurricanes Gustav and Ike impacted many of the State's port facilities resulting in large economic losses to the State and exposing the nation to large and significant economic impacts, from long-term disruptions as much of the nation's oil and gas, commodity and cargo traffic flows through south Louisiana facilities. While oil and gas enter the Nation through facilities in south Louisiana, many more commodities that are vital to the upper Midwest, and north and central Louisiana flow down the Mississippi River and are maintained at specific temperatures at port warehouse facilities along the Mississippi River before becoming exports. These raw products in turn employ thousands of Louisianans and create millions of dollars in economic value.

While the majority of public infrastructure repairs will be covered by FEMA programs, it is known from experience with the 2005 storms that there are certain costs of repair including improvements or rebuilding will be deemed ineligible for FEMA funding. Preliminary cost estimates for the repair of Federal Highway Administration (FHWA) eligible roads and bridges sustained as a result of Hurricane Gustav total \$127 million. Federal-aid highway damage estimates are about \$119 million.

While funding to address these damages is authorized under current law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical infrastructure. To repair this critical infrastructure, \$119 million would be needed for Louisiana (Gustav - \$53 million; Ike - \$66 million) through the Federal Highway Administrations Emergency Relief program.

Preliminary estimates indicate approximately \$1.7 billion in uninsured housing losses, with over half of that amount likely being homeowners. Hurricanes Katrina and Rita have taught us that repair costs generally outstrip insurance proceeds. Initial damage models based on flood and

wind damage vary widely, but have a midpoint between \$3 and 4 billion dollars. Half of this damage may be uninsured losses due to uninsured and underinsured properties.

With losses of housing stock concentrated in certain communities, Louisiana could have up to \$1.5 billion in uncompensated housing losses. Of this, the State will need to design programs in concert with local communities to rebuild and make up this loss. The State will develop the programs in concert with local communities to rebuild and make up this loss.

Based of the 2007 Summary of Agriculture and Natural Resources by the LSU Agriculture Center and NMFS Revenue Data, the seafood industries experienced nearly \$250 million in revenue loss as a result of the two storms. Even prior to hurricanes Gustav and Ike, Louisiana,s fisheries were struggling to recover from more than \$528 million in losses resulting from hurricanes Katrina and Rita in 2005. Hurricanes Gustav and Ike moved across the central Gulf of Mexico through some of the nation's most valuable and productive fishing grounds at the start of the state's most valuable shrimp season.

Overall Progress Narrative:

July 1, 2024 – September 30, 2024

The State of Louisiana, Office of Community Development continued to move both projects and programs to completion. Total grant expenditures over the quarter were \$413,470.67. A refund check was received for Activity 17PARA3601 in the amount of \$920,350.82. There is background information in the activity narrative for 17PARA3601. Program managers continue to work with grantees to reallocate remaining funds from completed projects and programs to existing programs or new initiatives. As the number of active state-run programs continue to decline, project and program managers focus on closing out the remaining projects and reallocating funds as programs reach completion.

Parish grantees continue to amend allocation budgets due to projects coming in under budget or acquiring other funding sources and other projects deemed no longer viable due to permitting or other issues. The budget reallocations are resulting in additional funds for existing projects being moved to priority status. Among approved parish projects representing more than \$553 million in funding, approximately 99.6% (or more than \$551 million) has been expended among 56 parish grantees.

Management and close-out staff continue to systematically track project completions and notify grantees that close-outs are due. As of the end of this quarter, 732 Gustav/Ike (G/I) activities have been closed. Close-out efforts at the local level are also enabling grantees to reallocate funds as needed to existing disaster recovery projects, in particular drainage, sewage and road repair that may require additional mitigation or adjustments once the work needed can be thoroughly assessed.

For all activities in the QPR with no narrative, there were no expenditures in this quarter.

Project Summary

Activity Description:

The Lamar Dixon Expo Center is a 247.5 Acre property with existing multi-use facilities located just off interstate 10 near Gonzales, LA. The purpose of the Expo Center is to provide the community with a multi-use events facility. This project focuses on the 4-H Building specifically – enclosing the facility, installing insulation, energy efficient light fixture, light sensors, upgrading the restrooms and the addition of HVAC systems in order to expand and diversify the number, type and frequency of events as a publicly owned facility.

Activity Description:

Purchase of a 247.5 acre property with existing multi-use Expo center in Gonzales, LA. The purpose of the Lamar Dixon facility is to provide the community with a multi-use events facility - with in the past has been used primarily as an equestrian and 4-H activities as part of the LSU Extension Program. This is a privately owned facility, leased to the parish. Were the facility not owned and managed publicly by the parish, it would be a major loss both economically and culturally.

Location Description:

Gonzales, Ascension Parish, LA

Activity Description:

This project consists of drainage improvements to Turner Canal, beginning at its intersection with La. Hwy. 115, thence extending a distance of approximately 2.8 miles in a southerly direction. The project also includes drainage improvements to an un-named tributary of Turner Canal, beginning at its intersection with Turner Canal, thence extending a distance of approximately 2,600' in an easterly direction to the corporate limits of the City of Bunkie. This project will increase the hydraulic capacity of the Canal. The probability of flooding in the area will be significantly reduced.

Activity Description:

This project involves the reconstruction of the Lightning Street Bridge to adjust the elevation. The existing bridge spans approximately 76 feet and consists of precast concrete deck panels, precast concrete pile caps with timber pile substructure. The timber piles are in poor condition with substantial physical deterioration. Proposed improvements consists of the demolition of the existing bridge in its entirety and replacement with a new bridge structure consisting of drilled concrete shaft piling with precast concrete caps, deck panels and guardrail. The existing concrete revetment under the bridge will be replaced with new cast in place revetment. An existing water main attached to the existing bridge will be replaced with a new water main to be attached to the new bridge structure. The new bridge superstructure (caps, deck and guardrail) will be located above the 100 year base flood elevation as established by FEMA Flood Studies for the City of Sulphur incorporated area. Street approaches for the bridge will be rebuilt/raised to accommodate the new higher bridge.

Activity Description:

The purpose of a Stage 0 Study is to reach a decision regarding this project's feasibility. The basic steps for completing this Stage 0 study are:
 Develop preliminary purpose and need of the bridge/roadway; and Identify initial project concept to address the need; and Conduct preliminary environmental review with regard to natural and human environment; and Develop preliminary scope and cost estimate; and Identify expected funding sources.

Activity Description:

During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes. Majority of the areas drained through the channels that pass beneath these bridges are low to moderate income areas (LMI).

Location Description:

East Baton Rouge Parish

Activity Progress Narrative:

10/3/24: Expenditures were for advertising and recording fees; and the final construction payment and retainage. Grantee is reconciling the budget to de-obligate the remaining funds: Denise Fox

Activity Description:

The East Baton Rouge Redevelopment Authority ("RDA"), as part of the disaster recovery initiative, will purchase and develop a 196-acre tract of vacant land commonly referred to as Smiley Heights ("property"); located in a distressed urban community in North Baton Rouge called Melrose East. The development of this property will realize a community-driven strategic vision for a mix of educational institutions, new retail, commercial development, and mixed-income residential units in a green, walkable setting. In addition, the physical and natural conditions of the site lend an opportunity to introduce sustainable approaches to site resource management. Once completed, this project will create educational campuses, thriving commercial areas, successful neighborhood businesses, access to equitable quality jobs, and new affordable and market-rate housing options.

Location Description:

Smiley Heights Neighborhood, Baton Rouge, LA 70806

Activity Progress Narrative:

10/1/24: Refund from Baldwin Title in the amount of \$920,350.82.

Background: The 194.06-acre parcel was acquired by Build Baton Rouge (BBR) in the 17PARA3601 Smiley Heights Acquisition activity for a total purchase price of \$1,960,000.00 of which \$1,500,000.00 (\$7,729.56 per acre) was funded by the LAOCD Gustav/Ike Community Development Block Grant Disaster Recovery Funds and \$460,000.00 (\$2,370.40 per acre) was funded by BBR directly.

The site now includes areas that were developed by the East Baton Rouge School System and the Baton Rouge Community College, the initial phases of the Choice Neighborhoods Initiative project which is currently under construction and the current undeveloped areas within the Ardendale Master Plan. The challenges posed by the COVID pandemic, inflation of construction costs and the Environmental Review process, though, resulted in delayed activity completion and prevented projects from meeting the National Objective. This has prompted a collaborative effort to address concerns related to meeting the required National Objective under the Low-to-Moderate Income Housing Benefit.

Activity Description:

The RDA is offering a reimbursable, matching grant program as an incentive to owners of buildings and small businesses to improve facades within the identified Target Areas (see map). This is a matching grant for funds spent on improvements to commercial properties that are visible from the street. Eligible facade improvements may include removing old facade structures, installing new and replacement awnings, canopies, and signs, landscaping, and performing other improvements in a manner consistent with applicable regulations, codes and ordinances and the adopted Community Improvement Plan for the area, if applicable.

Activity Description:

Provides up to \$40,000 to eligible applicants in order to assist with unmet needs resulting from damages caused by Hurricanes Gustav and/or Ike as an incentive to remain residents of the Parish. Funding recipients will be required to sign a covenant agreeing to occupy the home and maintain proper insurance for 3 years. The award is calculated as the total cost of elevation project less funds received from other sources (intended to compensate individuals for their out of pocket expenses). The program is limited to individuals that have already completed the elevation project or obtained a permit to complete the work by 2/1/11 with priority given to LMI households.

Location Description:

Across Iberia Parish, LA

Activity Progress Narrative:

7/30/2024: The Flag for this activity can't be cleared due to the Activity type doesn't exist any longer. A remediation note has been written in the Flag section: Denise Fox

Activity Description:

Provides up to \$40,000 to eligible applicants in order to assist with unmet needs resulting from damages caused by Hurricanes Gustav and/or Ike as an incentive to remain residents of the Parish. Funding recipients will be required to sign a covenant agreeing to occupy the home and maintain proper insurance for 3 years. The award is calculated as the total cost of elevation project less funds received from other sources (intended to compensate individuals for their out of pocket expenses). The program is limited to individuals that have already completed the elevation project or obtained a permit to complete the work by 2/1/11 with priority given to LMI households.

Location Description:

Across Iberia Parish, LA

Activity Description:

This drainage lateral was one of many throughout the Parish that was flooded and severely eroded which hampers drainage conveyance producing large runoff as was experienced during Hurricanes Gustav and Ike. The drainage basin serves as a major drainage lateral for the Town. In its current condition, the canal has issues such as erosion, encroachment into adjacent properties, and it is inefficient for conveyance of flows from large rain events. The existing steep side slopes also prevent routine maintenance and mowing by Parish personnel. Herbicides currently used to control vegetation along the existing outfall has resulted in further erosion problems by killing vegetation that tends to aid in stabilizing the existing outfall side slopes. Because of the very steep eroded side slopes, the Parish has determined that the outfall would better accommodate hydraulic flows and result in the resolution of on-going severe erosion, if the outfall was constructed with a subsurface piping system of catch-basins, pipes, and backfill.

Activity Description:

The Lafourche Parish Government, in collaboration with the Town of Golden Meadow, is requesting \$580,000.00 in CDBG Disaster Recovery funding to cover the design and construction costs to expand emergency vehicle parking and enhance municipal emergency operations at the Golden Meadow Multi-Purpose Town Hall and Community Center. The proposed project will consist of:

Construction of an expanded concrete parking area with emergency outdoor lighting for mobilizing multi-agency and first responder vehicles, and

Construction of an approximately 50' x 80' s. f. building to consolidate on-site storage of emergency operating equipment and disaster recovery supplies including operating equipment, portable pumps, generators, and sand bags.

Prior to Hurricanes Gustav and Ike, the Town of Golden Meadow operated its municipal services from a single 1,200 s. f. building, which was damaged during the storms resulting in a failure to function by local officials to immediately mobilize emergency response operations within the community. In November 2010, a new 6,000 S.F. Town Hall including an "Emergency Operations Center" was completed utilizing \$1.8 million in grant and loan assistance from the U. S. Department of Agriculture. The newly constructed Multi-Purpose Center and

Town Hall houses most of the city's offices and serves as a critical link for emergency coordination and communication between the Town of Golden Meadow and both parish and state Offices of Emergency Preparedness and Homeland Security during emergency disaster declarations.

The Multi-Purpose Center currently lacks a concrete parking area capable of accommodating parking for emergency vehicles as well as a centralized facility where emergency operating equipment and supplies can be safely stored in preparation and response to future disaster events.

The design and construction of the improvements will be built in conformity with the Louisiana Uniform Construction Codes, ADA handicapped accessibility, and local ordinances and building codes. Upon completion of the project, the improvements will be owned and operated by the Town of Golden Meadow.

Activity Description:

This shall be a drainage project to facilitate drainage in Bastrop and portions of unincorporated Morehouse Parish. Please see the attached map, for the area to be served. The project is all or selected portions of Staulkinghead Creek, which begins just West of LA 3051 and our area of interest ends about Spyke Road. Lateral W-10 flows into Staulkinghead Creek. Staulkinghead Creek is designated as W-9, which is a major drainage channel for the region. Drainage-access easements may be required for construction of berms, access with heavy equipment and shaping.

Activity Description:

St. Bernard Parish Government has revised their Long Term Recovery Plan to include the completion of a Comprehensive Master Land Use and Zoning Plan for the entirety of St. Bernard Parish. The Plan will address land use with the direct goal of successfully re-developing the Parish with an emphasis on economic development and supports sustainability.

The Comprehensive Master Land Use and Zoning Plan will contain a Fair Housing component that will not only guide housing development but will also assist and guide government and the community as to fair housing opportunities throughout St. Bernard Parish. The Comprehensive Master Land Use and Zoning Plan will also embrace floodplain and wetlands management in St. Bernard Parish, as well. The Comprehensive Master Land Use and Zoning Plan will serve as a policy framework for a wide variety of decisions concerning land use, infrastructure, commercial/industrial, institutional development and fair housing opportunities, design, capital outlay priorities, environmental issues, and growing commerce.

The Comprehensive Land Use Plan will incorporate strategies to implement the land use patterns promoted

through the recovery planning process and depicted in the work developed by Duany-Plater-Zyberg (DPZ) and Waggoner and Ball Architects. These plans have created Post-Katrina land use issues for the Parish. Combining these visionary elements into modern comprehensive plans and zoning regulations conforming to the promotion of fair housing is crucial step.

Activity Description:

Provides up to \$60,000 to eligible applicants in order to assist with unmet needs resulting from damages caused by Hurricanes Gustav and/or Ike as an incentive to remain residents of the Parish. Funding recipients will be required to sign a covenant agreeing to occupy the home and maintain proper insurance for 3 years. The award is calculated as the total cost of elevation/mitigation project less funds received from other sources (intended to compensate individuals for their out of pocket expenses). The program is limited to individuals that elevated their homes or constructed floodwalls around their homes following Gustav/Ike with priority given to LMI households.

Activity Description:

The state is required to spend at least 10.6 percent (\$46,520,525 of the first allocation) of the entire allocation on affordable rental housing activities. Fifty percent of this dedicated portion shall be allocated to the five most damaged parishes, in proportion to their damages, for eligible programs to be administered by the parish. The remaining 50 percent will be administered by the state for implementation of affordable rental housing projects. The top 5 impacted parishes will have the option of establishing their own affordable rental housing programs or using their portion of the affordable rental housing allocation to participate in the state-implemented program.

Activity Description:

The primary goal of the Delcambre Fishery Recovery Project is to create/maintain employment in the commercial fishing industry and preserve the commercial commercial fishing culture of coastal Louisiana by providing the commercial fishermen with a means to sell thier catch at higher than wholesale market prices. This venue, which does not exist anywhere else in the area, will increase retail business within the community and create an attractive incentive for the commercial fishermen.

Activity Description:

Plaquemines Parish proposes to use its Gustav/Ike Sustainable Fisheries Grant Allocation of \$900,000 to mitigate the Buras Boat Harbor Site in order to provide permanent site improvements that will create capacity for current and future fisheries programs. Site improvements will consist of the following:

- Four hundred (400) linear feet of bulkhead and concrete dock
- Access to electricity and water will be set up on the dock so any vessels or equipment needing these services can have access quickly and be used to its highest efficiency
- Grading will be performed on the property to level the ground
- Limestone will be added to create a better road and working surface
- An eight foot (8) tall, two hundred and sixty two (262) linear feet, chain-linked fence will be erected to make sure security measures are in place.

Activity Description:

The purpose of this program is to provide a range of projects that will assist communities to recover from Hurricanes Gustav and Ike in a manner that protects them and makes them more resilient to future storms. This program includes coastal restoration and protection projects that allow coastal communities to recover and exist safely and sustainably, as well as planning and implementation projects that make the long-term transition to sustainable coastal communities possible. All projects involving construction within this program shall be managed and implemented by the State of Louisiana Office of Coastal Protection and Restoration (OCPR).

Location Description:

Across Louisiana

Activity Progress Narrative:

7/29/2024: Reconciling entry to Total Funds Expended from a prior period to clear a flag: Denise Fox

Activity Description:

The project is a Clean Rice Packaging Facility that will be added to the current milling facility at 3211 Hwy 397 S, Lake Charles, Louisiana. The improvements will allow Farmers Rice Milling (FRM) to increase output rates from the mill and eliminate slowdowns that result from the current packing, loading and storage system. FRM will be able to increase productivity of the packaging line by 50% and increase packing efficiency by 20%, or a downtime reduction of twenty (20) hours per week. The new packaging system will also allow more flexibility in packaging size, opening new markets to their products.
